Dates: 19th – 25th July 2009

Acknowledgments

We would like to thank all the colleagues who participated to the training and contributed to the success of this mission in one way or another, particularly Mr Moustache the CEO of the Seychelles Agriculture Agency (SAA) for allowing the mission, Mrs Sandra Moumou and Dr Jimmy Melanie from SAA for having organized all logistics for the events, our colleagues from the Agricultural Statistics Ministry of Health and Environment, the SAHCT Training centre and the National Statistical Bureau NSB, for the warm welcome accorded to us and their patience during the intense and fruitful discussions. Their commitment to the LIMS community is highly appreciated.

BACK TO OFFICE MISSION REPORT

Summary

Country : Seychelles

Mission team : Dr Pascal Bonnet CTA PRINT, Dr B. Bedane Information specialist PRINT

Dates : 19th – 25th July 2009

Venue : Care House Victoria, Seychelles (Mahé Island)

Introduction: mission rationale and objective

The Livestock Sector Unit (LSU) in the Food, Agriculture and Natural Resources (FANR) Directorate of the SADC Secretariat is entrusted to promote regional integration and sustainable livestock development. The PRINT Livestock Project in FANR became operational in July 2005. The project's specific objective is to establish a livestock information management system (LIMS) in Animal Production and Health, Marketing and Trade. The generation of up-to-date and reliable information will assist the coordinating role of FANR as well as the development of harmonized policies and strategies in the SADC livestock sector.

The mission team comprised two SADC staff, namely, Dr. Pascal Bonnet (Animal Health & Livestock Economist, CTA Chief Technical Adviser PRINT – CIRAD), Dr B. Bedane Information Specialist PRINT.

Summary of SADC PRINT mission:

The mission was the launching of the SADC LIMS system in the Seychelles and comprised three components:

- a 3 days Training of trainers on the LIMS application and the principles of the LIMS system. It also served as a preliminary stage for establishing the rules of and drafting the first elements of Standards Operating Procedures of LIMS in Seychelles.
- Seminar on AIMS: It included discussions with the potential contributors to and potential users of the LIMS system.
- Situation analysis of the sector: visits of the major stakeholders in the sector

Detailed ToR's and timetable of the mission are provided in full in the annexures.

Funding of mission:

PRINT CIRAD budget (operational budget: April to October 2009, cf Addendum CIRAD contract).

Bedane Information specialist PRINT.

1. OBJECTIVES OF THE MISSION

The overall objective of the mission in SEYCHELLES was to launch the LIMS system. This mission was also a follow up of the comprehensive situation analysis and information needs assessments in this new SADC member state as it had started by PRINT in all SADC member states in 2007.

The **LIMS system** is made of 1/ the **LIMS software** developed in MS Access© (to capture data or import specially formatted MS Excel data sheets), 2/ **LIMS reporting templates** (a set of eleven (11) LIMS core quantitative data reporting modules) which national staff are sensitized and trained on, 3/ **procedures** for information **exchange** (**SoP**, Standards Operating Procedures) and for using **LIMS application** applied through 3/ a **network of stakeholders** working in collaboration (forming the **national LIMS network*** and from which some nominated members are also members of the four LTC **regional sub committees**), 4/ a set of technical **reference documents** and **training material** (i.e. LIMS manuals, Training handouts etc..), 5/ a **LIMS portal** (web site) embedded into the overarching AIMS portal and shared by several FANR information sub systems, using **common WEB20 ICT** derived technologies (WIKI, Dgroups, webmapping..) or using **tools specifically developed** for the sub system (e.g. for LIMS the Geoclip web-mapping).

*The **national LIMS network** means the various institutions being sources of livestock data / information in the respective member states, all sharing the effort to collect and compile data into the **collaborative LIMS** firstly at **national level** (some countries also soon operating at regional/provincial level like Zambia and Mozambique since they are decentralized states), then transferring the information to the SADC secretariat at **regional level** using the procedures agreed upon.

Therefore a selection of national professionals involved in national livestock statistics was trained on the harmonized templates, the software and on the procedures. Secondly one purpose of the mission was to assess, thanks to a participatory approach, how the national sources of data will collaborate in the areas of Animal Health, Animal Production and Livestock Trade and Marketing in order to start the drafting of the SoP's and share the responsibilities for running the LIMS system in SEYCHELLES.

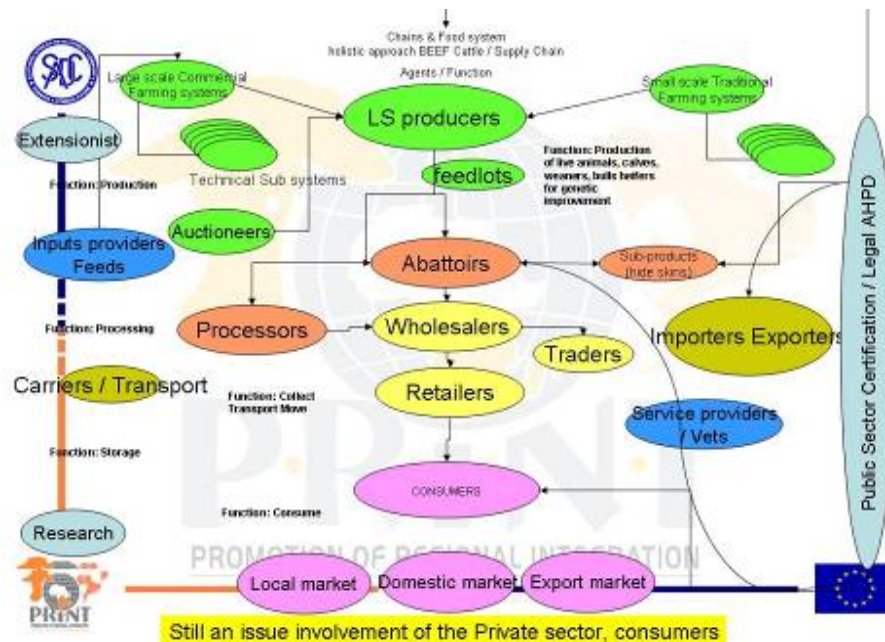

2. INSTITUTION VISITED AND PERSONS

The full listing of trainees and persons met at the seminar or during the situation analysis is provided in the tables attached in the following chapters.

3. ACTIVITIES

3-1. Stakeholder meeting

The objective of such stakeholder workshop is to present the entire AIMS initiative in order for participants to “locate” the LIMS system as a component (or sub system) under the AIMS system. It is therefore a follow up of former meetings dedicated to regional agriculture information systems, but this time focussing on the Livestock sector.

The sector represented as a series of **commodity chains** maps: all stakeholders from the system should participate to the national livestock community (forum)

Background:

Two AIMS workshops were held in 2007 and 2008 in collaboration with SADC sister projects have been opportunities to sensitize the Member States (MS) on the expected achievement of AIMS:

- formation of **AIMS networks**,
- compilation of numerical data and key information at national and regional level by sub sector and given stakes – topics (data contributors perspective),
- improvement of systems **interconnectivity** so that information is available from browsing in databases and in a portal (users perspective).

Seychelles which became a MS in August 2008 was not participating to such events and therefore the mission briefed the authorities during the seminar on past achievements.

The attendants to the LIMS AIMS seminar proudly wearing the LIMS community shirt, with the two SADC experts Dr Bonnet and Dr Bedane. The full listing of participants is in the following table.

---------------	------------	--	---	------	---------	--	--	--------------------------------------	---------------------------	--	--

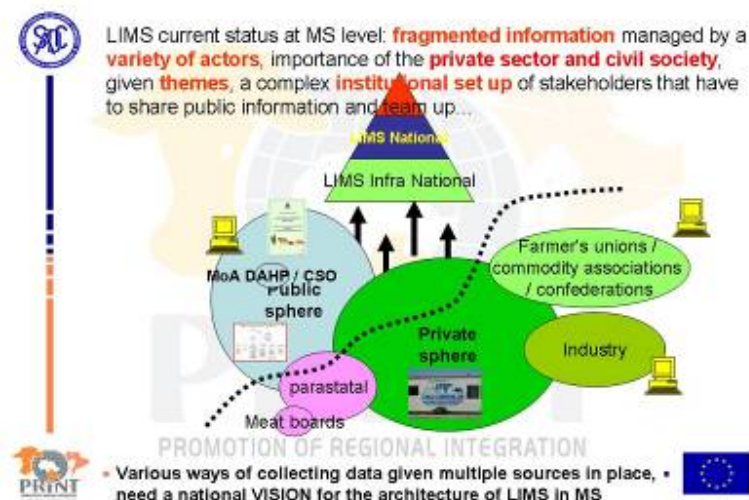

The entire presentation made by PRINT as an introduction to a full stakeholder meeting was provided as an annexe of the CD left to the authorities. The following slides summarize the contents presented.

The expected components of AIMS and the place of LIMS elements were presented (i.e. the Excel Templates, database in MS Access = an application to facilitate data compilation and exchange, and LIMS web 2.0-based portal and mapping tools to display indicators computed from the database).

LIMS is a system not only a database: it has **contributors** (from the LIMS national network) and **users** (any one using the portal as a member of the LIMS community sometimes requiring an active registration to access the contents). They use a full package and toolkit made of Excel Templates, database in a MS Access and **procedures** for data compilation and exchange.

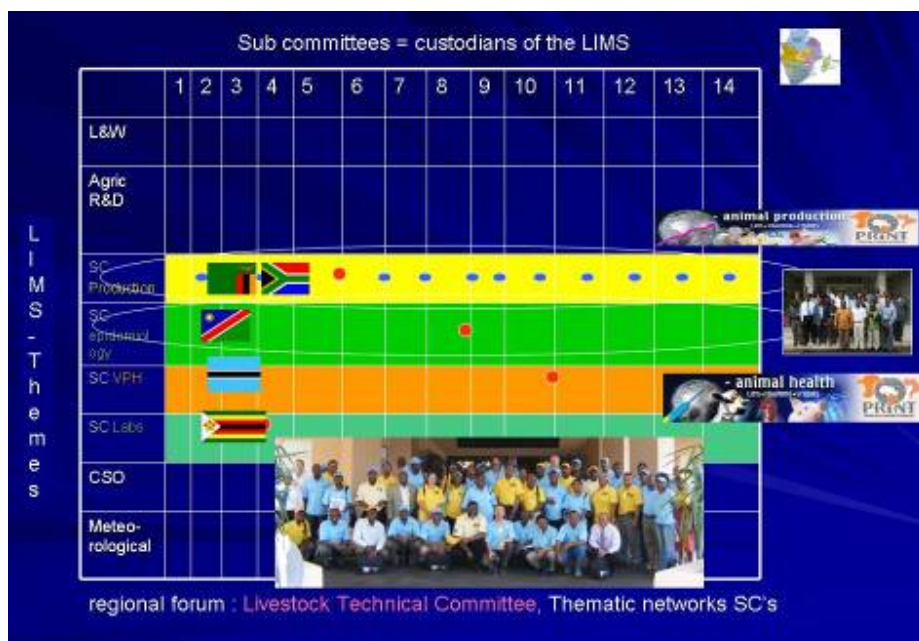

Contributors to LIMS are expected to originate from **multiple institutions** and therefore represent various **sources**. **They** will have to work in collaboration thanks to the formation of a LIMS national network. Therefore, LIMS provides for capturing data from various stakeholders and institutions, given their expertise and interest in the system, at various scales. It can therefore be decentralized and it is therefore a modular system. There are two ways of entering data into the system firstly by **typing data** directly into the database, or by **importing** already available data formatted into a specific Excel-like datasheet (specification described into the manual).

Nevertheless a **central coordination and management unit** is required (coordinated by the network) as there will be a national LIMS database centralized in the country.

Networking of institutions

PRINT has already worked out the networking aspect of the information system (IS) by supporting the **horizontal integration** of actors, thanks to the support given to the 4 **SADC sub committees of the LTC**, composing four task forces aiming at managing part of the LIMS and therefore being its **custodian at regional level**. Horizontal integration therefore means the need for the integration of a network of stakeholders in specific areas of interest in the LS sector

Four subcommittees of LTC horizontally integrated

The AIMS initiative and the LIMS launching missions are also opportunities to complement the process initiated in 2007 of boosting the **vertical integration** of national networks hence “at the periphery” of the core Livestock sector represented by the four representatives to the sub committees of SADC, this topic being central on this occasion. The Vertical integration therefore means an aggregation and integration of new players (e.g. specialist of meteorology, of early warning systems), i.e. new professionals to the core group, i.e. to the network of pure Livestock specialists. This is of primary importance as the management of risks and vulnerability required the collaboration of various specialists.

Enhancing vertical integration in the agricultural sector

An application in the Seychelles

During the stakeholders meeting, the following concerns were raised:

- The Fisheries sector is an important component in the economy of the Seychelles. LIMS should have included modules on fisheries¹.
- Data collection from registered farmers is relatively easy. However, as there are several farmers, which are not registered, this may pose formidable challenge for getting data from them (informal sector). It is expected that the efforts given to control effluents will help for regularizing their status and for bringing new information to public statistics.

¹ Fisheries was unfortunately not part of the PRINT mandate neither was it to include aquaculture though an important potential for the Seychelles (formely prawns were reared in some Seychelles islands)

Seychelles joins livestock data exchange system

The meeting yesterday at which the Livestock Information Management System was launched locally

Continued from page 1

today at Curve House in the presence of SADC officials and Seychellois who use or give information on livestock.

He also said there are plans to build an abattoir on Praslin, which will mean information will be easier to collect as all animals on the island will be slaughtered in the same place.

Mr Moustache said Seychelles has a duty to fulfil a number of obligations to the SADC after re-joining it in 2008 and is now the only member that has not yet launched its livestock information system.

"One of Seychelles' obligations as an SADC member state is to correctly collate data on livestock and forward it to the organisation's headquarters," he told farmers, agricultural advisers and representatives of the Ministry of Health and Social Development, the National Bureau of Statistics, the Ministry of Finance, the Ministry of National Development and others.

"The launch today brings us a step closer to the adoption point, and I'm glad you are all here to witness this historic event."

Mr Moustache said Seychelles has a number of advantages, making data collection here easier than in some SADC member countries, for example its small size and the fact that chickens, cattle and pigs are all slaughtered in one abattoir.

He noted that there is no such central slaughter of animals on Praslin but said an abattoir will be built there soon.

He said talks on details of the proposed abattoir have started, adding that the number of animals slaughtered there "in a traditional

way" is big enough to satisfy the island's demand. There are facilities for slaughtering poultry there, he added.

Mr Moustache called on farmers who rear hens to keep better records of the number of eggs they collect.

"Even though there are many who keep records, there are still a few who don't. To get the correct data, all the layer farms without exception have to keep records of eggs laid and the number of birds left on the farm," he said.

"Livestock officers will be going round to see how we can help, and I thank them in advance because I know they will cooperate with us."

Two trainers from the SADC – Dr Pascal Bonnet and Dr Berhanu Bedane – have since Monday been showing officers who collect information on livestock the correct way to do so.

Among those present at the launch of LIMS were the two trainers, special adviser for agriculture Walter Tulu and principal veterinary officer Dr Jimmy Melerie.

The role of fishermen

ties for the artisanal sector, which is seen as vital for food security.

It is also expected to solve the medium to long-term ice supply problems at times when fish are plentiful and to bring such facilities closer to the fishing communities.

Seychelles Agriculture Agency (SAA)***

**AGENDA FOR LIMS TRAINING OF TRAINERS
20 to 22 July 2009, Victoria, Seychelles**

DAY 1 – Monday 20 July 2009

8:15 – 8:30	Arrival and registration
8:30 – 8:45 Agency	Welcome by the Representative of the Seychelles Agriculture
8:45 – 9:00 Representative	Objectives of the LIMS training mission – By SADC
9:00 – 9:45	Installation <ol style="list-style-type: none"> 1. First time installation of the LIMS Application 2. Key files and folders 3. Uninstalling LIMS 4. Re-installing LIMS
9:45 – 10:30	Basic concept of LIMS operation <ol style="list-style-type: none"> 1. Opening, navigation and closing the application 2. Menu and sub-menu structure
10:30 – 10:45	TEA BREAK
10:45 – 11:30	Basic concept of LIMS operation (Continued) <ol style="list-style-type: none"> 3. Standard tool bar and other GUI
11:30 – 12:00	Administration: Access Control <ol style="list-style-type: none"> 1. Creating users 2. Assigning roles and granting rights 3. Validating Partitions of the country (GIS) relevant for statistics
12:00 – 13:00	LUNCH
13:00 – 14:00	Data entry, modification and saving Livestock numbers and composition (Module 1 – Template and database)
14:00 - 14:30	Data entry, modification and saving (continued) <ol style="list-style-type: none"> 1. Livestock numbers and composition (Module 1 - Template and database)
14:30 – 14:45	TEA BREAK
14:45 – 15:15	2. Livestock Production (Module 3 - Template and database)
15:15 – 16:00 5) –	3. Livestock Marketing (Module 4) and Livestock Trade (Module 5) – Template and database)

DAY 2 – Tuesday 21 July 2009

8:00 – 9:00	Revision of day 1 - Discussion
9:00 – 10:30	Data entry, modification and saving (continued) 4. Livestock Infrastructure (Module 6 - Template and database)
10:30 – 11:00	TEA BREAK
11:00 – 11:30	Data entry, modification and saving (continued) 5. Meat Inspection (Module 7 - Template and database)
11:30 – 13:00	Data entry, modification and saving (continued) 6. Laws, regulations and acts (Module 9 - Template and database)
12:00 – 13:00	LUNCH
13:00 – 14:00	Data entry, modification and saving (continued) 7. Disease Report (Module 10 - Template and database), and control measures (Module 11 Vaccination)
14:00 – 14:30 query results	Building queries, generating reports and exporting 1. Livestock numbers and composition (Module 1) 2. Livestock Production (Module 3)
14:30 – 14:45	TEA BREAK
14:45 – 15:15 query results (Cont.)	Building queries, generating reports and exporting 2. Livestock Production (Module 3)
15:15 – 16:00	3. Livestock Trade (Module 5)
17:00	END OF SECOND DAY

DAY 3 – Wednesday 22 July 2009

8:00 – 9:00	Revision of day 2 - Discussion
9:00 – 10:30 results	Building queries, generating reports and exporting query (continued) <ol style="list-style-type: none"> 4. Meat Inspection (Module 7) 5. Disease Report (Module 10)
10:30 – 10:45	TEA BREAK
10:45 – 11:15	Exporting query results and further analysis Disease distribution mapping exercise
11:15 – 12:00	Administration <ol style="list-style-type: none"> 1. Data Management: sending and receiving files (electronic reports) 2. Data Management: backup and restore 3. Interoperability (importing and exporting data)
12:00 - 13:00	LUNCH
13:00 - 14:30 Portal	Information dissemination from LIMS, the use of LIMS/AIMS <ol style="list-style-type: none"> 1. Networking through DGroups (Discussion groups) , participating to regional thematic debates; 2. Visualizing data : The LIMS web GIS, an example of LIMS & AIMS integration 3. LIMS software Forum and WIKI pages (LIMS Manuals) 4. Using resources posted (document posted, institutional repository) and contributing to the collaborative LIMS/AIMS Portal (News, events)
14:30 – 14:45	TEA BREAK
14:45 - 16:00	General Discussion <ol style="list-style-type: none"> 1. The way forward for the implementation of LIMS in Seychelles

2. The use and contribution to LIMS/AIMS Portal
3. Any other business related to the training

16;00

END OF THE TRAINING

The Training group and Dr Bonnet SADC PRINT

From left to right: Sandra (SAA), Sandro (SAA Agric Stats), Marie Michelle (SAA), Simon (SAA AH), Tyron (Min. of Finance Trade), Molta (SAA), Jimmy (SAA AH), Marianne (SAHTC), Nicholas (nikko, MoH), Joel (SAA), Therese (NSB GIS)

The training group and Dr Bedane SADC PRINT

The training aims at sensitizing the **future trainers** to the rationale of the LIMS system. Obviously it serves also to train them on the **LIMS application functionalities** and the **templates contents**, so that they become familiar with the entire concepts and system. Besides, it is also expected that from the training, participants will be in a position to design and produce *specific training material* derived from the *generic training material* provided by PRINT, i.e. training manuals for trainers and for data clerks, with specific examples and illustrations selected from the country context. Generic Manuals are provided as hard copies and can be downloaded from the LIMS portal, they are also posted as Wiki documents (cf. relevant chapter).

The composition of the group for the Training of Trainers was well balanced, drawing participants from the Livestock development and extension, Veterinary Services, Agricultural statistics, Ministries of Finance & Trade and Health & Environment , as well as the National Statistics Bureau.

The weak point of the training was the heterogeneous & generally poor computing skills of some of the participants. That has interfered with quick understanding of the operation of the LIMS MS Access application.

The list of attendance was as following:

The details and list of the LIMS trainees will be added on the relevant LIMS web page like for this one in Namibia.

The training room accommodated for 11 trainers plus Dr Bonnet and Dr Bedane. Eleven “eee ASUS” mini laptops computers from PRINT project were available, all running XP OS and Access 2003, thus reducing the loss of time due to adjusting LIMS on other systems like Access 2007 and Vista (though LIMS can adapt to other systems and OS and install procedures for such systems are provided in the training package and CD’s).

External QWERTY keyboard were available to switch from AZERTY genuine keyboards of the minilaptops, to English setting keyboards. In such a training with the LIMS software , all PC’s must be set up with regional parameters preferably as **English UK** to properly run LIMS software (i.e. numeric decimal is a dot and thousands space separation is allowed). This will also be a prerequisite when running LIMS in all MS (therefore to be put as a warning message in the training material and FAQ)².

General Principle for the training

The training is based on the principle: *“if you master one template, you master them all”*, as most screens and templates share a similar tabular presentation and screens have the same rationale to enter data into the LIMS application.

Validation of Geographical Partitions

The Seychelles has re-joined SADC in August 2008. Due to this, the situation analysis and the LIMS information needs assessment mission was not undertaken in the country before the LIMS adoption mission. That led to the assumption that the country made of several islands, because of its size, is composed of one administrative unit without any internal divisions. During the LIMS

² Refer to Annexe and training handouts for more explanation

adoption mission, however, it was learned that in fact the country has about five regions and **26 districts**. The details are presented in the table below.

The concept of partitions of a country is generally well understood (= Administrative divisions and Cadastral Boundaries on one hand and any Technical divisions used for the purpose of managing technical issues like Livestock or Human Health on the other hand). Nevertheless, the alternative use of **technical partitions** versus **administrative partition** must be discussed in depth during a LIMS adoption mission, as these are key features into LIMS to insure interconnectivity with other information chains and provide room for populating the LIMS with external data originating from other data sources within or outside the Ministry of Agriculture (e.g. zoonosis records from MoH will use health zones).

This aspect of the LIMS allows capturing data from various sources by respecting the **observation units** they originally use. It therefore allows to interact and interconnect with other systems by assuring that one can import/export some information / data in compliance with the relevant observation units required (i.e. with logical and geographical compliance and GIS interconnectivity).

Partition Types

Country	Partition Type	Partition Level
Angola	Administrative	1
Angola	Administrative	2
Angola	Technical	1
Angola	Technical	2
Botswana	Administrative	1

Country: Angola

The LIMS screen (reference parameters section) which allows to pre populate and therefore define the administrative and technical **partitions** of a country (this must be also reflected into the LIMS database at SADC level as SADC regional level will consolidate national data using the same shared partitions).

For SADC purpose (regional database), it needs to be populated with at least the **ADMIN2 level** of a country (generally named a “district”, and it refers to the ISO standard for its coding), so that all data are aggregated at such a level and sent to SADC accordingly.

Nevertheless for a national utilisation of LIMS one can think to implement a rather more detailed set of zones (ADMIN3, or Dip Tank catchments areas etc..) in the future. Such level of information will remain in the **national LIMS database**, as only aggregated data at ADMIN2 level will be sent to SADC for **regional compilation** at SADC in Botswana.

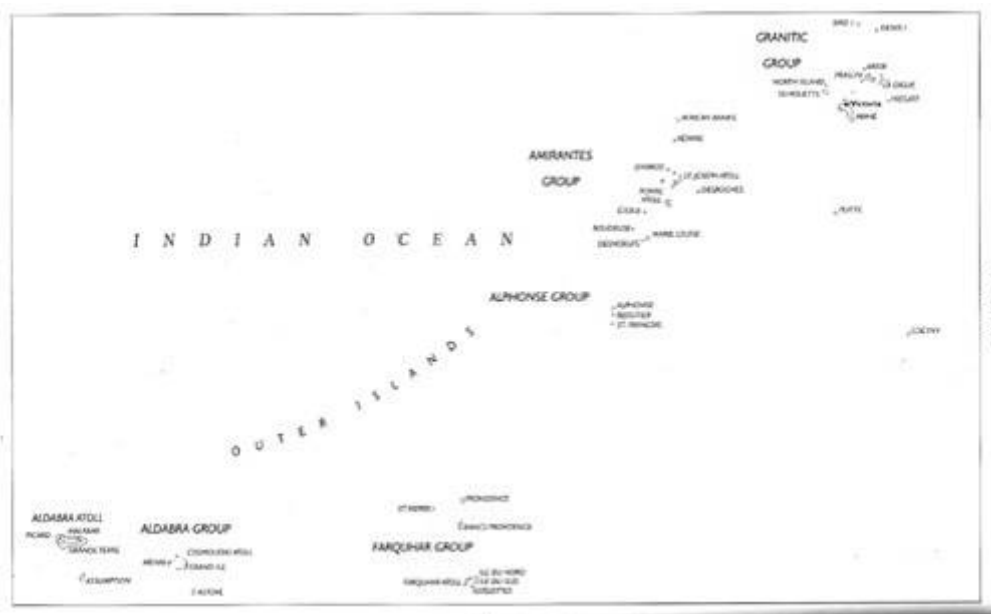

The facility that allows export of data or import allows the selection of the partitions of preference for data exchange.

Interconnectivity between systems: geographical compliance of observation units:

As an example, if data shall be imported into LIMS by Livelihood zones, this set of partitions must be populated into LIMS, thanks to the technical partition facility predefined in such a way. Or if animal census data (Module 1 of LIMS) shall be exported by dip tank or crush pens zones, or by vaccination zones, LIMS can export such information to be inputted in any other system, including a GIS.

The generic partitions; Admin1, .Admin2; and some technical partitions were revisited and validated in SEYCHELLES and we provide them into the annexe with some elements of explanation in the following paragraphs. The **Web-mapping** facility under the AIMS portal (Mapserver cf. <http://LIMS.sadc.int> or the Geoclip) requires consistent correspondence between partitions implemented on the portal and in LIMS, therefore the need to monitor any changes into the system. This is also the responsibility of the LIMS nationataskforce to follow up and inform SADC on any change.

Seychelles geography and partition: context and specificity of Islands

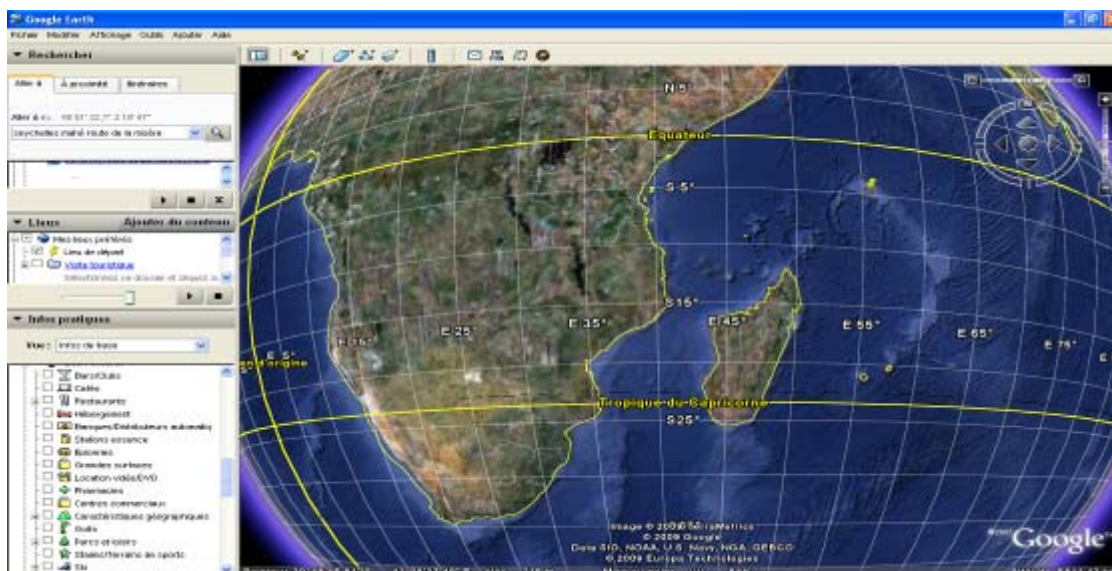

The archipelago is vast and only selected and relevant islands will be covered by the LIMS system

The context of an archipelago of islands like the Seychelles must be appreciated when implementing the LIMS. The 115 islands represent an EEZ of 1 million km² of sea & 455 km². Only three islands will be looked at for they participate to the Livetsock sector, i.e. Mahé, Praslin and La Digue forming the inner islands of Seychelles. No LIMS partitions will be implemented on the other islands. Nevertheless, the rest of the islands are important for environmental purpose and for fisheries (national waters) statistics.

The tourism is an important activity and add consumers for livestock products (over 100 000 visitors annually) on top of the residential population of about 85 000 inhabitants.

The position of Seychelles in the Indian Ocean making the country an important basiefo fisheries.

The inner islands will be used for LIMS

Administrative partitions (AP)

The sources of information for the item were multiple and were investigated before the mission (desk study), we only cite some of them that may serve as reference source.

Maplibrary

It only features for the island polygone ADMIN0, therefore not for sub zoning

ADMIN type, Level 1 and 2, Region / Province and District names

Proposed Edited Version of Partitions agreed on during the mission to be implemented into LIMS

Districts: 26

26 administrative districts shall be considered (source LIMS adoption mission) as they were revised in 2002:

[Anse aux Pins](#) [Anse Boileau](#) [Anse Étoile](#) ~~[Anse Louis](#)~~ [Anse Royale](#) [Baie Lazare](#) [Baie Sainte-Anne](#) ([Ste Anne](#)) [Beau Vallon](#) [Bel Air](#) [Bel Ombre](#) ([Belombre](#)) [Cascade](#) [Glacis](#) [Grand' Anse](#) ([Mahé](#)) [Grand Anse Mahe](#) [Grand' Anse](#) ([Praslin](#)) [Grand Anse Praslin](#) [La Digue](#) [English River](#) ~~[La Rivière Anglaise](#)~~ [Mont Buxton](#) [Mont Fleuri](#) [Plaisance](#) [Pointe La Rue](#) ([Larue](#)) [Port Glaud](#) [Saint-Louis](#) ([St Louis](#)) [Takamaka](#) [Roche Caïman](#) [Au Cap](#) [Les Mamelles](#) [Other Islands](#)

One removed: ([Anse Louis](#)) not a district

4 added: [Roche Caiman](#), [Au Cap](#), [Les Mamelles](#), [Other Islands](#)

+ **Some editing in the spelling** (the official way to write it only) e.g. [Bel Ombre](#) or ([Belombre](#))

Regions: 5

[Central](#), [East](#), [West](#), [North](#), [Praslin/La Digue](#)

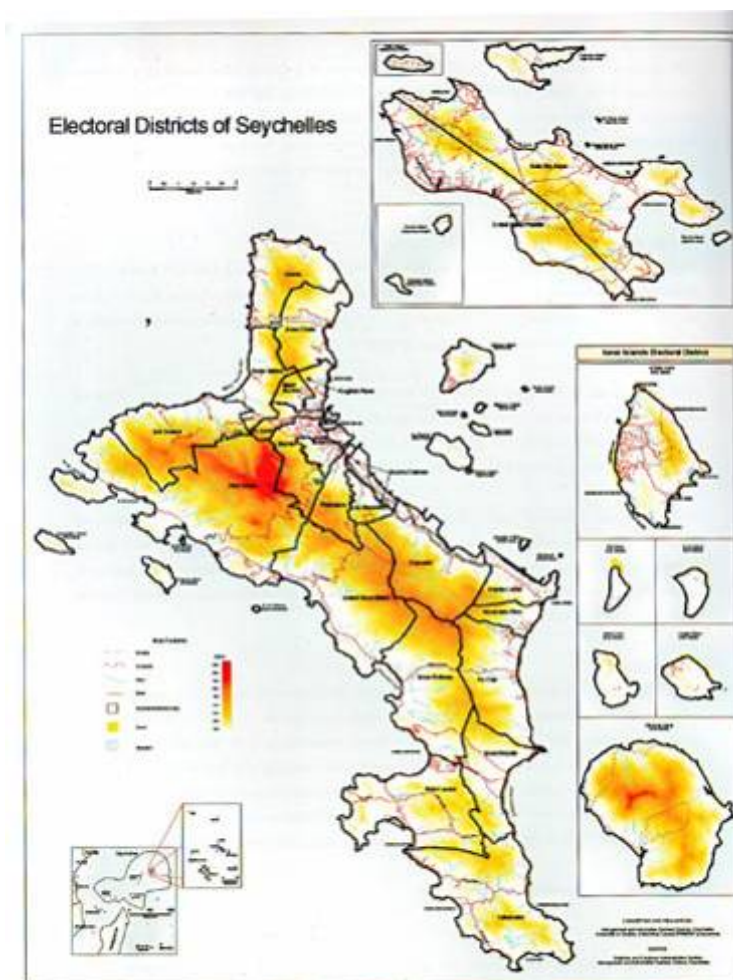

A correspondance list has been established by NSB for parent / child partitions (with options for writing them)

For the purpose of the training, the regions and the districts of the Seychelles were created in the application under the Administrative module, Reference Data, and provided to the trainees. This, however, should be included into the application in the near future (by the developers , the listing being provided by PRINT to them). Issues of dating the partitioning changes were well addressed and understood in general. Similar arrangement of including the regions and districts in the application were made to the version to be used for live data entry for the interim period.

Major towns**TECHNICAL partitions Type (TP)**

Wards electoral districts or enumeration areas (used by NSB) can be implemented into the LIMS

No Technical partitions were implemented prior to the mission into LIMS Seychelles

Electoral districts as they feature on a map

Proposed Technical partitions that could be implemented into LIMS Seychelles: Status of our discussions

Areas used by NSB: **Enumeration areas**

In red result of data provided (i.e. editing)

Enumeration areas: Year 2002 status (source: GIS unit SAA) for enumeration areas (50 households on average per Enum Area). This is a dynamic partition as they are redelineated according to changes in demographic and land use.

Villages and towns gazeteer

One can implement a list of Villages, cities, towns with their names into LIMS, since some screens use such details (e.g. Module 10 or modules on infrastructures M6).

One of the problem of implementing a **full Gazetteer** into LIMS is that the implementation of a long list is not always necessary and will render LIMS a bit “heavy” and slow when it comes to accessing such a listing (by a scroll down feature in the software).

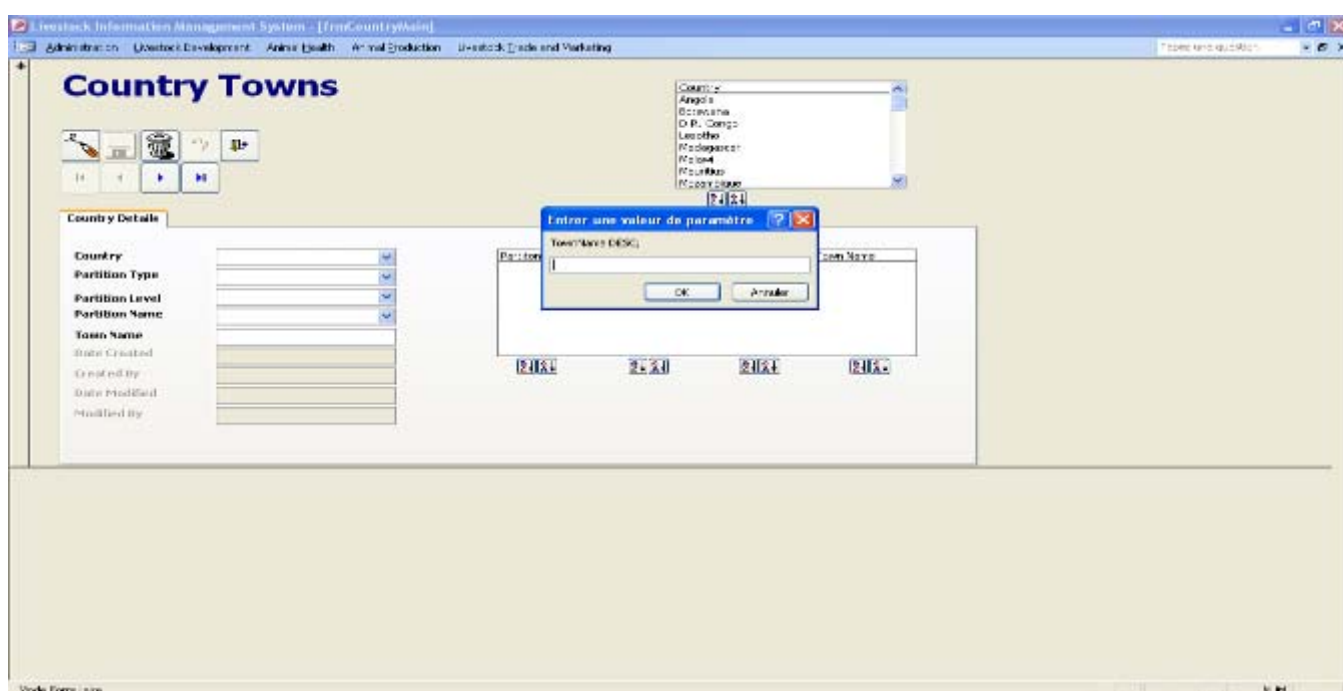

As a mater of facts only a few items (a few names from the list) will be finally used (e.g. use of only towns where Livestock infrastructures do exist). This remark is important to consider before we implement such a listing into LIMS.

In Seychelles though the current gazetteer has less than 20 items (towns or cities or village names). PRINT recommends exploring the official list, validating it and only using it as a “reference list of towns” (in LIMS manual and in the guidelines for SEYCHELLES), so that any data capture for a new city or village will be made in compliance with such an official listing and will follow a nomenclature.

Given the small size of Mahe and its districts it is assumed that the capital of districts will be used as village’s names.

Official gazeteer (source GIS SAA°

Any city or town' list can be implemented into LIMS thanks to this screen, before becoming available in any screen (by a scroll down menu item) when requiring access to a town name.

Therefore we recommend that a person be in charge of monitoring any change in the national Partitions list (ADMIN1 and 2) and towns and then be updating LIMS with information communicated to SADC

Components, Modules and Templates looked at during the training

The following paragraphs show how the components of LIMS already match some of the available LS data in Seychelles.

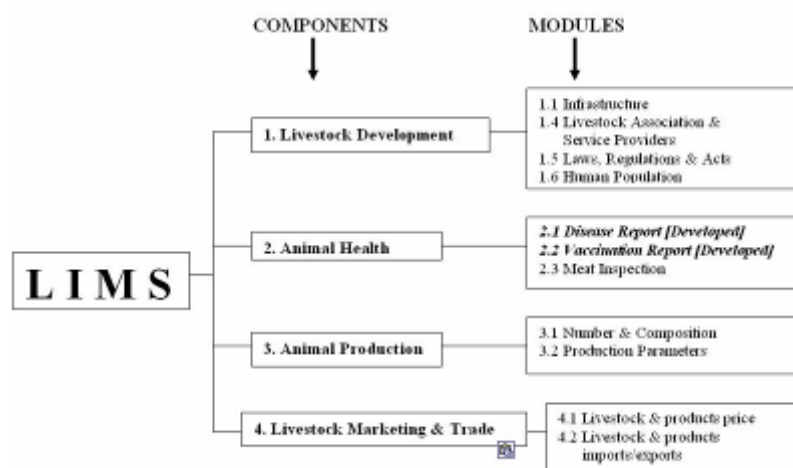

Diagram: the four components of LIMS core on which future trainers have been trained (in addition to the administrative module and other functionalities of LIMS).

According to the LIMS there are 11 modules to be shared

LIMS Full « Information system »

- **Reports = Modular Harmonized templates** to collect data for SADC MS and SADC secretariat
 - Excel spreadsheets/ hard copy forms
 - Derived questionnaires (in MS)
 - Three languages / spatial temporal scales
 - **Derived forms (DPT)**
- **Application LIMS (software)** to facilitate exchange of information and interconnectivity with other systems
 - MS Access
 - Interoperable / Import Export / Transfer
- **LIMS task forces = Networks** to run system (People)
 - LIMS national coalition / teams
 - organized, supported & trained
 - Regional networks
- **Procedures, MoU, SoP's** to run LIMS system
 - national / regional
- **Portal WEB** to access AIMS & LIMS information
 - Dynamic cartography and WEB20 networking tools
 - Information posted: yearbook, atlas, brochures, News etc..

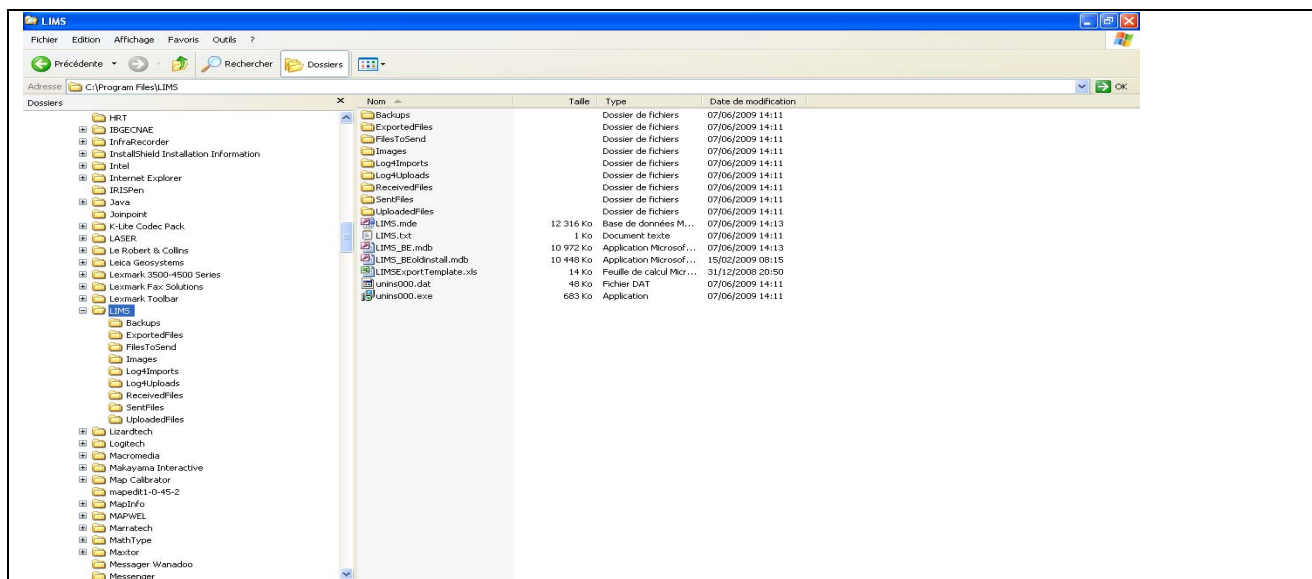

LIMS a Full information system

The Training of Trainers is meant primarily to enable national experts to operate LIMS and that they can conduct similar training sessions at national level at a later stage (multiplier effect), for livestock information officers at provincial, regional and district levels. The replication of training sessions at national level is a prerequisite for the roll-out of LIMS in the country.

The LIMS training had two major components. These are the training on the LIMS template and the training on the operation and use of the LIMS application.

- a) Training on the LIMS templates – Before embarking on data entry to the database, trainees need to know the data collection forms or templates. The knowledge of what type of data is collected, how often and the right columns where these should be entered are crucial for better understanding of the database at a later stage. Hence, all the 11 modules templates were described to the trainees. Additional information included as footnotes for the selection of parameters where there are multiple choices to pick from were also covered. The trainees were briefed on the Standard Operating Procedure for providing comments and suggestions for further improvement of the templates as well as for daily use when these are introduced to the grass roots from where data is captured on paper copies or MS Excel sheet. The trainees also received both the electronic and hard copy prints of all the templates for the 11 modules of LIMS.
- b) Training on the LIMS application – This component of the training focused on the proper operation and use of the LIMS database. Trainees were taken through the installation and configuration of the application, data entry and modification, query building, report generation, export of data for final analysis and procedures for backing up data and transfer data files between different installation. The complete training timetable is attached. During the training

of the three days, most of the 11 modules were covered, first by demonstration followed by exercise using live and in some cases dummy data. All modules were fully covered.

At the end of the three days training, a general discussion was conducted with the participants. The trainees expressed their satisfaction with the LIMS performance, but stressed the need for networking to increase awareness on LIMS. The participants committed themselves to forming a trainer committee and to work out a monitoring and coordination arrangement for LIMS activities.

All the trainees received a CD containing training materials, a copy of the LIMS application ver 204 and templates, SOP, presentations on LIMS and AIMS, among others (cf annexe).

A full and comprehensive compilation of Livestock statistics (production and import) is available on a monthly and quarterly basis from SAA. Hereafter we provide some Stats for 2008, 2007, 2009 available in Excel. Their reformatting to match Import templates of LIMS will allow direct importing into LIMS tables.

An example of Importing Format

Liste des Modules et écrans (rapports types Excel) correspondants au système LIMS / *Lista dos Modulos e ecrã (relatorios tipo Excel) do LIMS* / **List of Modules and screens (SADC Harmonized templates) of LIMS**

- Front page national / page de guarda nacional / page de garde nationale
 - Headers / Timbre / Entête
- Module 1 *Numbers & Composition of Herds* / Effectivos animais do rebanho nacional / Effectifs nationaux – recensement animal
 - 1. *Nr by species* / efectivos animais por espécies / Nombre par espèce
 - 2. *Nr by economics* / efectivos animais por função economica / Nombre par fonction économique
 - 3. *Nr by breeds* / Effectivos animais por raça / Nombre par race
 - 4. *Nr by herd structure* / Effectivos animais por idade e sexo / Nombre par âge et sexe (démographie)

The Livestock population (estimates) in Seychelles: composition & infrastructure
(source SAA)

Cattle:	1 200 - AMZ, Zebu, Sahiwal, Jersey, Friesian & Brown Swiss
Pig:	10 000 - Duroc, LW, LR,
Poultry:	600 000 - Ross (broiler), WL & GL bred (layers)
Goats:	1 500 – Mixed breed (Anglo Nubian X Sanaan)

- Module 2 *Human Households & Population in Livestock farming* / Agregados familiares criadores / Ménage engagés dans l’agriculture et l’élevage
 - 1. *Human Population* / Agregados familiares / Ménages et population humaine

This information is available from NSB.

- Module 3 *Production Parameters* / Produção animal / Production animale
 - 1. *Slaughter* / Abate (carne) / Abattages
 - 2. *Milk* / Leite / Lait
 - 3. *Dairy products* / Lacticínios / Produits laitiers
 - 4. *Eggs* / Ovos / Oeufs
 - 5. *Hides, skins* / Curo e Peles / Cuirs et peaux

Example of a training sequence: Component Animal Production with two modules and 9 templates (reporting templates)

These templates are all reflected into the LIMS application with a similar tabular visual approach.

2. Livestock numbers - by economic function

Parton Type*	Parton 1, e.g. Region/District	Parton 2, e.g. District	Cattle					Sheep			Goats

Livestock Information Management System - [first Livestock Module]

Year: 2005
Date of Report: 21/06/2006
Date of Submission:

Report Header: Livestock Number by Species | Livestock Number by Economic Function | Livestock Number by Breed | Livestock Number by Head Structure

Partition Details:

Partition Type	Partition Level	Partition Name	Species
Administrative	1	Central	Sheep

Partition	Partition Name	Dairy	Beef	Dual Purpose	Draft/Work	Others	Created Date	Created By	Modified Date	Modified By
1	Central									

Screen corresponding to the census template by economic function (also attached to the header template in the first screen tab).

We will not display in this report the **entire set of templates and related screens** (provided into the CD delivered at the end of the training).

We will only **highlight** hereafter **some templates** where **comments were made** during the presentation and the training on both the templates and the application (screens). More comments will flow to PRINT thanks to the participants who shall use the **comment sheet** provided during the training.

Type of product	Locally produced (tons) and % coverage	Imports (tons)	Total (tons)
-----------------	--	----------------	--------------

Pork	687 (55%)	564 (45%)	1,251
Poultry:	1,439	960 (40%)	2,399
broiler	(60%)		
Eggs	21 M	800 (98.8%)	810
Beef	(100%)		
	10 (1.2%)		
Lamb	None	163.61(100%)	163.61
Goat	(though	59.25 (100%)	59.25
Duck	Goat	5.58 (100%)	5.58
Turkey	starting)	0.6 (100%)	0.6

Production (% self sufficiency) and Import (source SAA)

Various production are promoted in the Seychelles . Some farm management is trained at SAHCT for young farmers.

Goat trial at SAHTC

Dairy Cattle trial stable at SAHTC, the litter is made of tree leaves

Cattle in the islands : traditional way of rearing (alike most islands in the Indian Ocean or the Caribbean islands where land and space is scarce)

Cattle traditional way of rearing, close to the mangrove swamps: all sort of edible plants can be used.

A Sow at the genetic centre with its piglets, the centre keeps gilts and boars for dissemination. Cuban technical assistance is given to the centre (advisors attended our seminar).

Fatteners use piglets from the genetic centre or from their own farm breeding system

Production slaughtered in Mahe and Praslin in 2007 and 2006

INTERNAL POLICY		
LIVESTOCK PRODUCTION		
Poultry		
All poultry operations have to be set up in accordance with existing legislation.		
Broiler		
Existing Producers		
Mahe		
1.	SADCO	= 45-50,000/cycle
2.	IDC	= 57,000 /cycle
3.	N. Adeline	= 41,000 /cycle
4.	Unice	= 3,000 /cycle
5.	Anne Polite	= 12,000 /cycle
6.	Potlan	= 1,500 /cycle
7.	R. Pillay	= 4,000 /cycle
8.	Laurie	= 4,000 /cycle
9.	M. Pillay	= 2,000 /cycle
Praslin		
10.	Anne Kerlan Farm	= 5,000 /cycle
La Digue		
11.	L'Union Estate	= 2,000 /cycle
* The schools, Bird, Denis, Darros and Fregate Islands each take a small amount for teaching/own consumption.		
- It is accepted that a total of 15 broiler producers will be allowed within the country ie:-		
	13 on Mahe	
	1 on Praslin	
	1 on La Digue	

Production Quotas are provided to the producers.

Farms and farming premises can be high in altitude within the slopes of central mountains

Layers in Mahé

Some egg production trays ready to go to Victoria market.

Seasonally Seychellois also eat *Golet* eggs from a natural tern population (collection on the nesting sites where authorized).

Tern eggs are also eaten

(6) Estimated Egg Production

Month	Total from Hatchery	Allowance Mortality 10%	Estimated Birds In Lay	Estimated Eggs Per Day	Egg Production For Month
January	104471	10447	94024	61116	1,894,596

November	100825	10082	90743	58983	1,769,479
December	91650	9165	82485	53615	1,662,073
Total					21,130,474
Average/Month			89064	57892	1,760,873

Parameters used for above calculations

- No of day old chick sold by the hatchery over a rearing period of 18 months.
- Mortality over rearing period 10%
- Laying period 13 months
- Average laying 65%

Egg production estimates (source SAA)

Wood shaving is used for littering in poultry farms, as forest and trees are plenty in Seychelles

Day old chicken

Diversity of functions of the livestock: Manure could be accounted for in the module M4 of LIMS to value its frequent use like wood shaves kept from fattening pigs. It is used in Seychelles for fertilizing vegetable and gardening of Hotels and private garden etc.. Historically fertilizer was also taken from the *guano* on the coasts.

Diversity of functions of the livestock: Cart and animal draft power is another use of cattle in La Digue (also used by tourists). It is also used in some mills for grinding the *coprah* produced from the coco tree.

- Module 4 *Livestock & Products Price* / Preços dos productos animais / Prix des produits d'élevage et animaux vivants
 - 1. *Live animals* / Animal vivo / Animaux vivants
 - 2. *Meat products* / Producto de carne / Produits carnés
 - 3. *Milk products* / Leite e Lacticínios / Produits laitiers
 - 4. *Eggs* / Ovos / Oeufs
 - 5. *Hides & skins* / Curos e Peles / Cuirs et peaux
 - 6. *Fiber & feathers* / Fibras e plumas / Fibres animales et plumes

Frozen products (from national production) in supermarkets

Frozen products (from national production) in supermarkets

Frozen products (from national production) in supermarkets

Some bush meat (from flying foxes “Roussette bats”) can also be found in traditional markets as they abound in the islands.

The roussette bat eats fruits

- Module 5 *Livestock & Products trade: import/export* / Importação e Exportação / Import et Export
 - 1. *Live Animals* / Animal vivo / Animaux vivants
 - 2. *L. stock Products* / Productos animais / Produits d'élevage
 - 3. *L. stock Inputs* / Inputs / Intrants de l'élevage

Import of live animals are summarized in the following items (source SAA)

- Poultry: all hatching eggs imported (Holland).
- Swine : breeding stock imported and distributed to farmers by the Pig Genetic Center, (2007 from Spain & 2003 from RSA)
- Bovine: AMZ in 1979 from Australia Brown Swiss (semen) from Germany
- Small ruminants: last import 1980 from UK

Production at the abattoir in Mahé

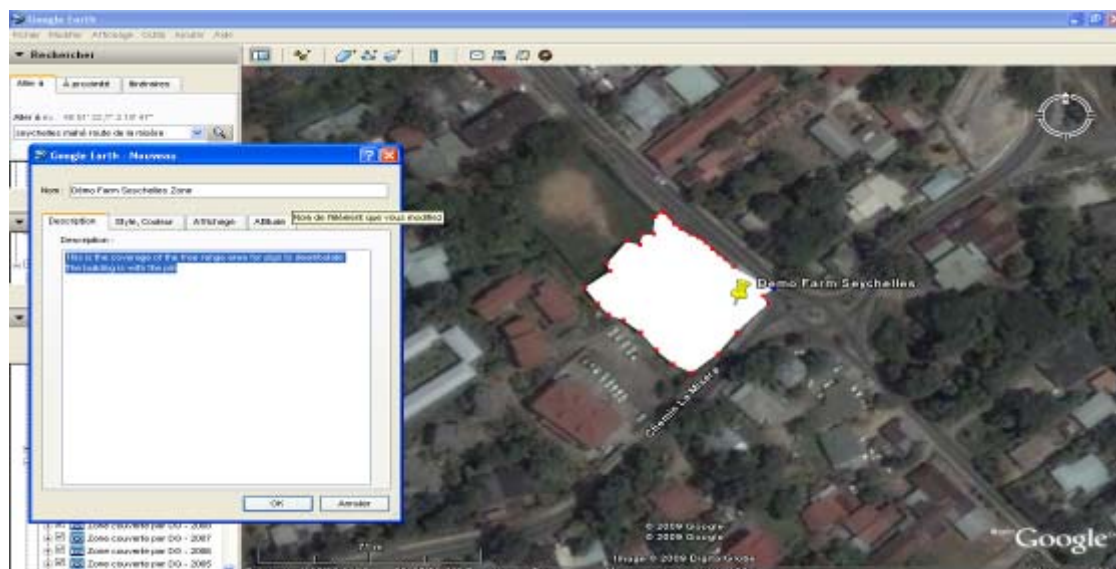

The Pig Breeding centre

Some of the IS of interest that could be recorded are the Hatchery, the Feed mill & the Abattoirs (in Praslin and Mahé), the breeding centre etc... If no GPS marks is know it is easy to use Google Earth or zonum to record their GPS location in WGS 84.

Marking and informing on a location, you do not need a GPS: in some cases you can do it from your office cf. <http://www.zonums.com/gmaps/digipoint.php>

An example demonstrated during the training on how to record a location without a GPS using Google Earth: Training on GIS concepts, Lat: -4°38'22.67"S / Long: 55°27'53.97"E

- Module 7 *Meat Inspection / Food safety / Segurança Sanitaria dos alimentos / Sécurité sanitaire des aliments*
 - 1. Ante-mortem / Inspeção ante mortem / Inspection ante mortem en abattoir
 - 2. Post-mortem / Inspeção post mortem / Inspection post mortem en abattoir
- Module 8 *Livestock Associations and Service Providers / Associações de criadores e fornecedores de serviços / Association d'éleveurs et fournisseurs de services*
 - 1. *Umbrella org & assoc / Associações profissionais / Associations et Confédérations*
 - 2. *Private companies / Sector Privado / Secteur privé*
 - 3. *Government / Sector Publico / Secteur public*

The SFM (SFM Seychelles Farmer's Marketing) is one of the associations that can be inventoried into the LIMS. They nowadays are the owners & managers of Abattoir, the Hatchery, Feed mill

- Module 9 *LS related Laws, Regulation and Acts, policy docs* / Legislação e políticas agro pecuária / Législation et documents de politique sur le secteur élevage
 - 1. *National Docs* / Documentos al Nivel nacional / niveau national
 - 2. *International Docs* / Documentos al Nivel internacional e regional (SADC) / Niveau international ou sous régional (SADC)

Regulations covering livestock production:

Pig Production Control Act (1984 – SAA)
 Poultry Keepers Act 1986 (SAA)
 Animal (Diseases and Imports) Act (1981 – SAA)
 Public Health Act (1978 MoH)
 Food act (MoH)
 Environment Management and Protection Act (MENR & T) -
 Town and Country Planning Act (MND -)

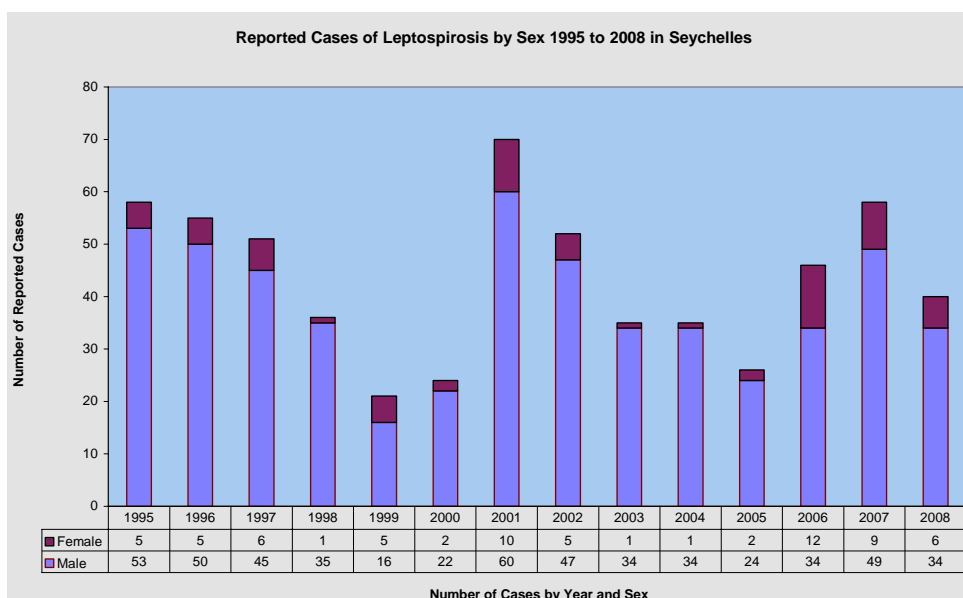

Policy documents

The Agricultural Development strategy (2007-2011) launched in November 2007.
 The Food Security Strategy 2008-2011 launched May 2008
 Economic restructuring programme

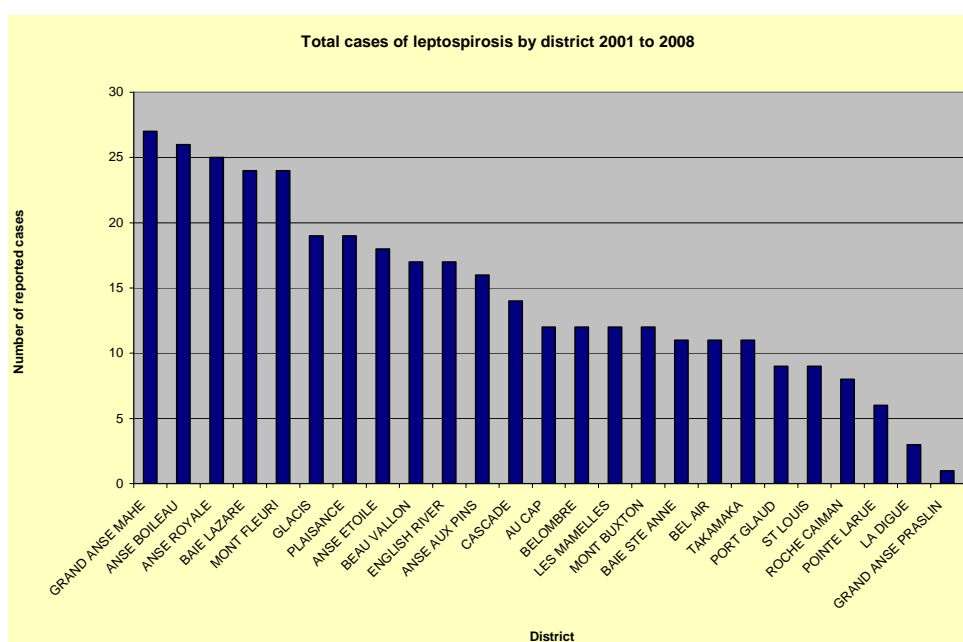

- Module 10 *Disease Outbreak notification* / Notificação dos surtos de doenças / Information sanitaire notification d'épidémies animales
 - *Outbreaks* / Epidemias focos / Foyers d'Epizooties animales

Seychelles has a **highly favourable** animal health status and is free from a number of livestock diseases of public health & economic importance. Over the years, the surrounding seas have been an effective barrier against unwanted pest and diseases (TADs & NEDs). Nevertheless informal trade in neighbouring islands (Comorus and Madagascar) should be looked at seriously as it may represent a threat to the local animal population (e.g. after the recent importation of theileriosis (ECF) in Comorus). Besides the climate change is bringing new conditions that may pose the problem of vector import and newly emerging diseases (NED's).

Some diseases are of public health concern like **leptospirosis**. The ministry of Health and the SAA can easily collaborate by sharing epidemiological data and information in view of tackling the disease. It was not possible to know the leptospirosis strains involved.

Information on **leptospirosis** (source MoH) : Time series **leptospirosis**

Leptospirosis by district

- Module 11 *Vaccinations* (e.g. TAD's) / Vacinação / Vaccinations
 - 1. *Vaccination* / Vacinações efectuadas / Vaccinations effectuées (prophylactique et de contrôle)

Mareks – layer DOCs (hatchery 72K ds)
 IBD – layers (1 farm 60Kds)
 Fowl pox – layers (1 farm 60Kds)

Principles to be used for LIMS management

Components have **modules** with indicative “reporting **templates**” (provided as an Excel data sheet, all contents reproduced into the application in MS Access© into screens) which pertain to modules. Therefore there are three levels for categorizing and coding the contents Component Ci Module Mj Template Tk, example C1M1T1.

4. Processed Dairy Products (from all species)												
Partition 1, e.g. Region/Province	Partition 2, e.g. District	Pasteurized milk Lt**	UHT milk Lt	Fermented milk Lt	Yoghurt Lt	Cheese Kg**	Butter Kg	Cream Lt	Powder milk Kg	Other* products	Other* products	Other* products
Reg/prov 1.....	Dist 1.....											
	Dist 2.....											
	Dist 3.....											
Reg/prov 2.....	Dist 1.....											
	Dist 2.....											
	Dist 3.....											
etc												
* Specify which product												
** Lt= Litres, Kg= Kilograms												
LIMS: Milk equivalent not working					LIMS gives option for cattle and goat = wrong							
LIMS: unit of measure kiloliters??					LIMS: take out option "milk"							
					Not in LIMS: fermented milk, cream, other products							
					LIMS: Yoghurt/fermented products together							

The dairy production template belongs to the production parameters module and to the animal production component.

Comments	

The header of the template also repeats the source of information used.

Customized front page are used (can be changed by MS) to improve national ownership on the system

The data templates can be customized using the country and institutions' logos or insignas.

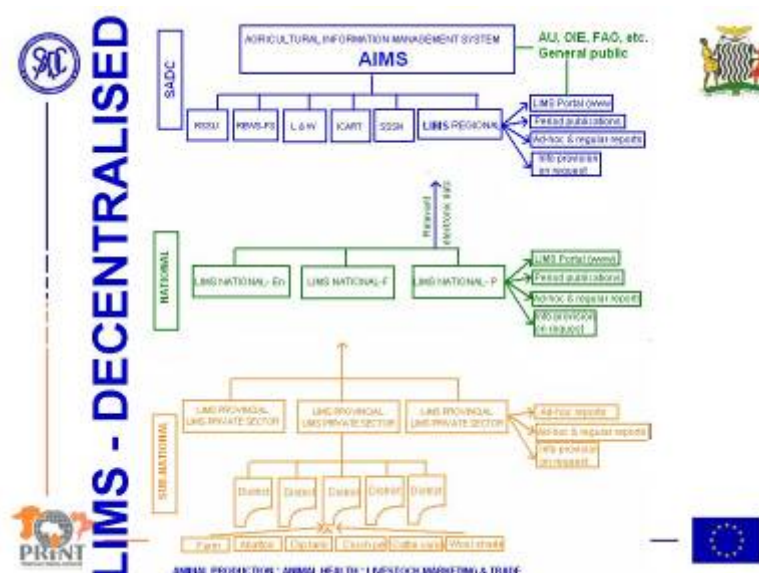

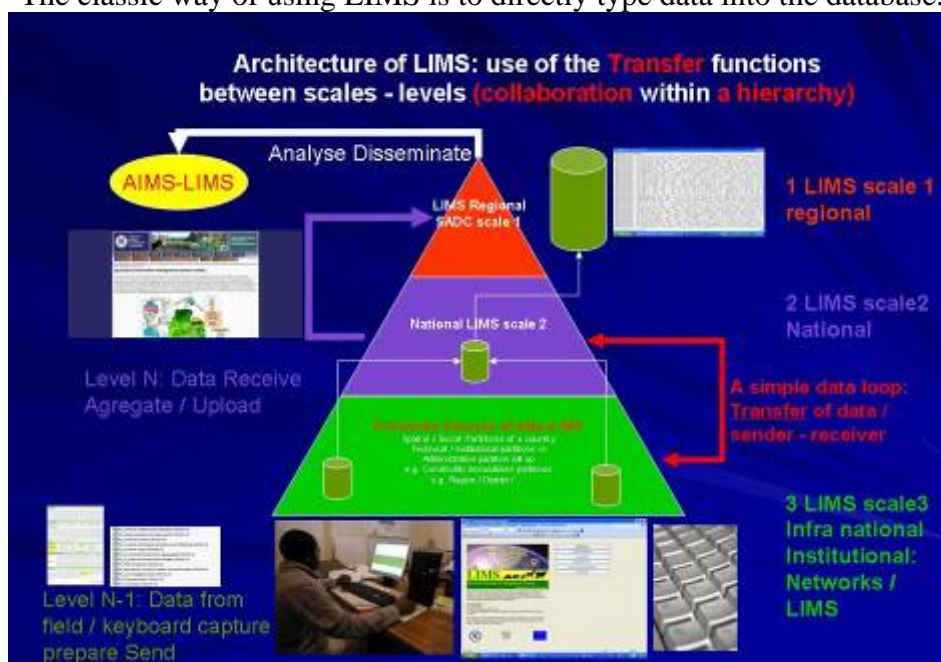

Figure: a simplified and structured Diagram of the potential ways of transferring data within a country and between SADC and countries. All layers cannot be equipped with **computers** or connectivity so far, therefore the use of **excel templates** and **paper report** mimicking the excel templates is also recommended. The use of some **cell phone and mobile Internet (3G modem**

technology) should soon facilitate the sending receiving of some information from a level to another.

The classic way of using LIMS is to directly type data into the database.

Field survey questionnaires can be derived from the tables to be used in the field at any hierarchical level, for instance linking the system with field data capture devices like Palm PC or the DPT (digital pen) technologies, soon to smart phones equipped with databases.

The templates can be used to derive field questionnaires used for censuses and surveys as they will represent the minimum dataset expected to be recorded in MS. The next agricultural and human censuses planned in 2010 and 2011 could be an opportunity to record LIMS data is the most appropriate way by adapting the already existing survey material.

4. Processed Dairy Products (from all species)												
Partition 1, e.g. Region/Province	Partition 2, e.g. District	Pasteurized milk Lt**	UHT milk Lt	Fermented milk Lt	Yoghurt Lt	Cheese Kg**	Butter Kg	Cream Lt	Powder milk Kg	Other* products	Other* products	Other* products

	Dist 2.....											
	Dist 3.....											
etc												
* Specify which product												
** Lt= Litres, Kg= Kilograms												
LIMS: Milk equivalent not working												
LIMS: unit of measure kiloliters??												
LIMS gives option for cattle and goat = wrong												
LIMS: take out option "milk"												
Not in LIMS: fermented milk, cream, other products												
LIMS: Yoghurt/fermented products together												

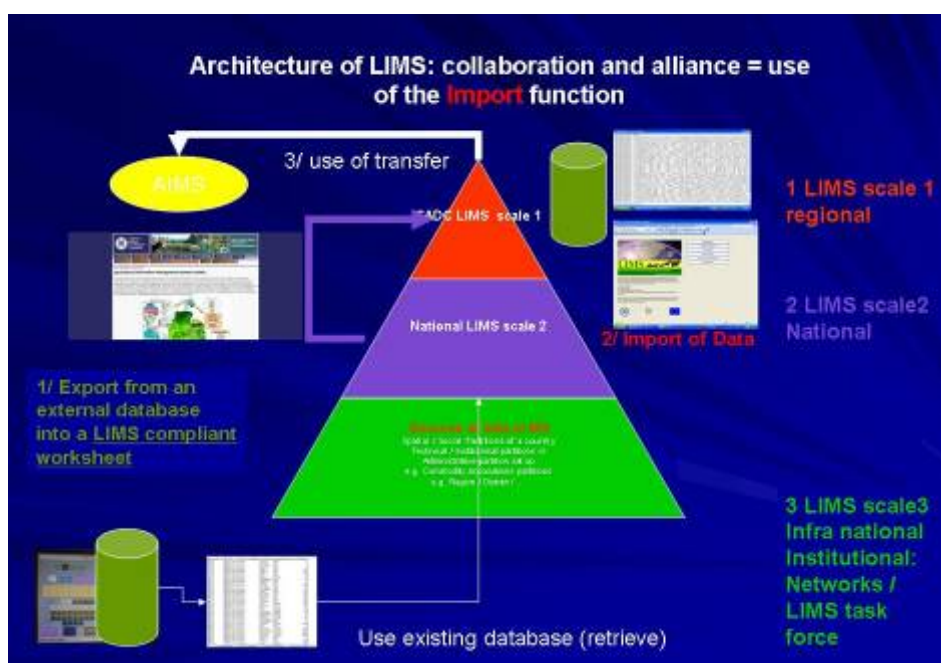

The image shows a detailed questionnaire form for DPT (Diphtheria, Pertussis, Tetanus). It is divided into several sections:

- 1. Vaccines:** A table with columns for Vaccine, Dose, and Date. It includes checkboxes for 'Vaccine available' and 'Vaccine not available'.
- 2. Epidemiology:** A section for reporting cases, with checkboxes for 'Diphtheria', 'Pertussis', and 'Tetanus'.
- 3. Surveillance:** A section for reporting deaths, with checkboxes for 'Diphtheria', 'Pertussis', and 'Tetanus'.
- 4. Summary:** A section for overall statistics, including 'Total number of cases' and 'Total number of deaths'.
- 5. Comments:** A free-text area for additional information.

DPT Questionnaire derived from the template (minimum data set included): they are developed for Module 1 (census), Module 10 (disease), and 11 (vaccinations).

Once data captured it can imported using the Import facility of LIMS

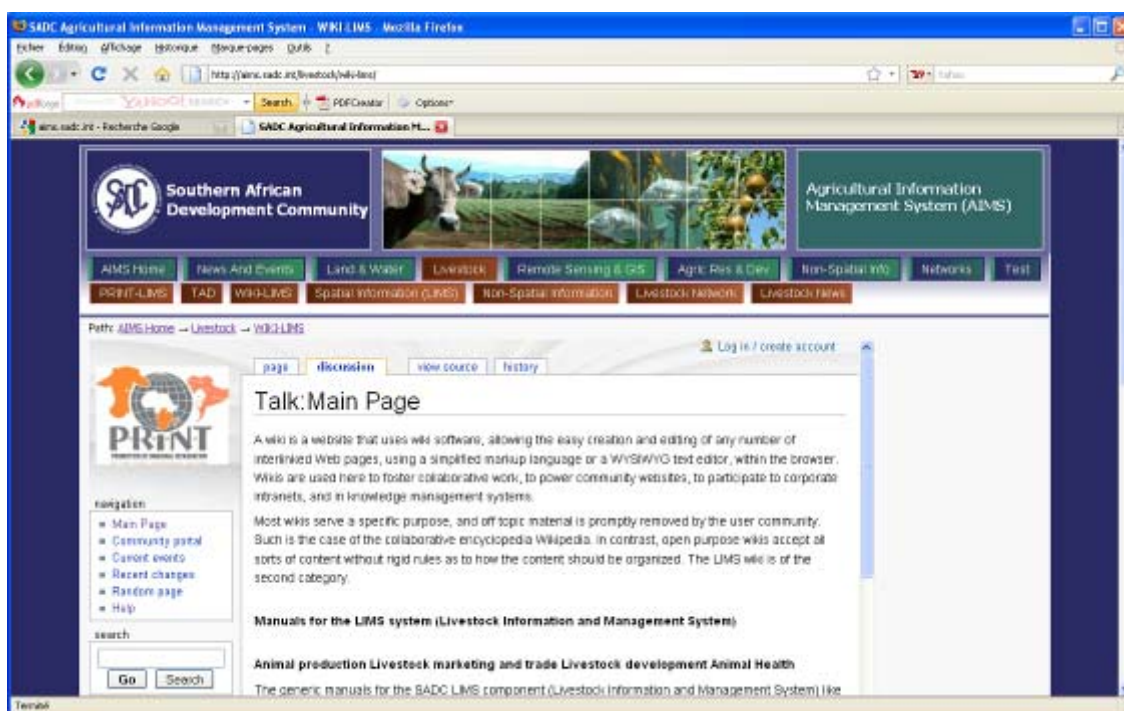

Related Manuals on templates and the LIMS application

The generic manuals prepared by PRINT were released in the CD at this stage; they will be soon uploaded on the LIMS portal (Seychelles being the last country to be visited). The same applies for the Users manual (on how to manage the software).

They will be posted on line for download (last agreed version), including in a dynamic *wiki* manual for suggesting improvement, hard copies distributed during further meetings and workshops and sent to MS by the end of 2009 and in 2010.

The purpose of WIKI manuals: In general we recommend specific illustrations and comments for the country be added for any national training, to make them user friendly and more specific for the country. Therefore, it is recommended to add an empty frame in any national manual for MS to add

their own illustrations and text, in addition to the SADC “generic” contents in the manual provided. The revision of the manuals shall be further part of the mandate of the sub committees of SADC LTC which can make use of the WIKI platform.

The wiki manuals on line (cf chapter 3-4)

3-3. Drafting of first LIMS SoP's for SEYCHELLES

The general principle of LIMS is to share the effort of collecting the data therefore it is named a collaborative statistical system. It requires the contribution of various institutions selected from the existing sources belonging to the national AIMS / LIMS networks. Therefore it is essential that such LIMS networks are formed and strengthened in all MS and procedures agreed upon by the members.

All **templates** (part of the modules) shall be associated with an **SoP**. This SoP is actually made of some **Metadata** (source of data etc..) on the report and statistics, plus an indication of which **institution** and **person** is dealing with the particular set of statistics (**module or template**) discussed. We at SADC recommend the drafting of SoP on the principle of at least **“one SoP per Module”** (or ideally it should be one SoP per template as part of a given module, but in general one institution will be in charge of an entire module).

The two following screens show the Excel version of one Metadata and one SoP as part for one module.

Every time a template is filled (equivalent of a data screen in the application) then a **header must be filled** with the given template to indicate e.g. the methodology used to get the data, the source of the data and the person responsible for the module. There are 11 modules, some have quantitative attributes (9/11) and two are non-quantitative (listing). All modules have such a header, which is almost similar in all templates, indicating the frequency of reporting and of submission to SADC, the person responsible and some indication on methodology and source for data submitted to the secretariat.

SoP worksheet embedded into the LIMS Excel files (there is also a word version for a comprehensive SoP, with an indication of the process recommended to collectively build an SoP by the LIMS national networks, cf. Annexe)

SoP's are aimed at indicating the **roles and functions** of institutions when **contributing** (and **using**) the LIMS. After listing (mapping) the relevant institutions that could contribute to the LIMS, one should select the most relevant ones, and then convene a meeting with them and then agree on to organize the data flow. Therefore it will support the completion of the entire information chain for the given module or component of LIMS taken care of.

An example: a comprehensive **stakeholder map** made in DRC for LIMS information, shall now be reduced according to templates and modules and then reorganized in order to produce a set of recognized and accepted diagrams for contribution and use to/of LIMS.

An example: a diagram to be included into an SoP for the Module 5: in DRC three institutions were identified as potential sources and one was selected to capture the data into LIMS and then transfer dataset to a national database, before it is reported to SADC. An information system using a LAN is highly recommended though the system provides for transferring data in other means (email an attached file, uploading through FTP, physical transfer by flash disk etc..).

The aggregation of individual diagrams can be attempted to present a global picture on how information will flow, therefore providing for the entire rationale of the LIMS network. It would explain how data flows from primary source to secondary and to the central database, using multiples sources (private and public) and multiple scales, all data being aggregated at a certain stages, therefore respecting the privacy of information provided.

It is essential to derive from such diagrams and SoP's (hardcopies) the roles and functions that will be implemented into the database (cf dedicated screens in the Administration Module), therefore giving access to some or all the functionalities and/or modules.

NUP

The structure of the LIMS Folders reflects the circulation of information which is transferred: i.e. it is easy for training purpose to establish a correspondence with a letter which is written (files to send), posted (at the post office, sent files), then received (received files), open and read (uploaded files), and contents well recorded with traceability (log4upload)

Besides the Import and Export functions, back up & archiving functions are also featured in the structure with folders corresponding:

Stages recommended for implementing the LIMS in a given country.

In general, we recommend MS be gradually implementing the LIMS, by upgrading **hardware, software and humanware** given a national road map (a business plan specific to the country), though taking into account with due respect some **regional milestones** agreed upon at LTC and in sub committees of the LTC.

First stage

Firstly, it is advisable to make an **inventory** of what **data is available** without effort (already available in some institutions being major sources) therefore only requiring a networking exercise.

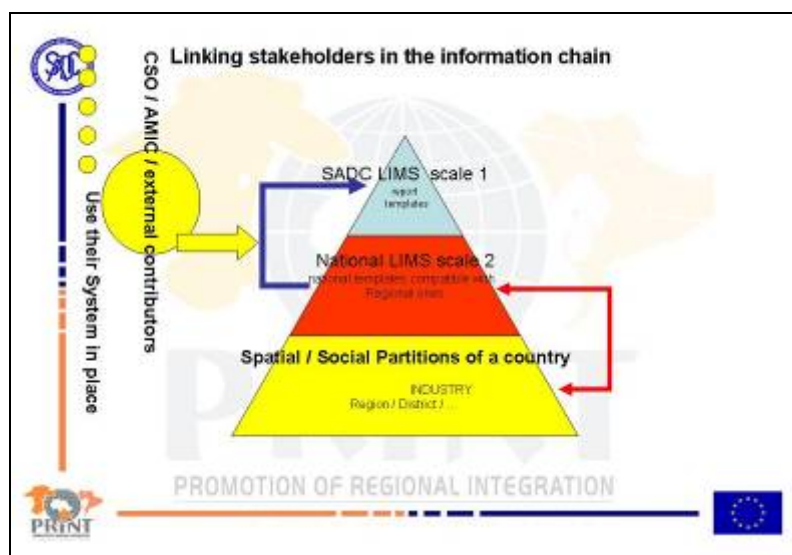

Second stage

Secondly, the system shall be improved by adding information when it will require little effort.

Third stage

A third stage will be when the completion of the data collection which will require significant effort. It is advised to benefit from other project funds, especially when such projects have been tasked to implement an **information system or a monitoring tool** for a part of or the entire Livestock sector.

An important aspect to consider is **HOW** the contributors will send their contribution **WHO** will, **WHEN**, **WHERE** with which **WHAT** i.e. their dataset (therefore contributing to the LIMS).

Last stage: Contribution and adoption of LIMS procedures, system and tools into other global information chains designed for monitoring the economic development of a country

LIMS SoP's Sheet (cf annexe)

A SoP sheet has been proposed by PRINT to be used as a guideline when drafting Standards procedures for exchange of information between the various members of LIMS network and sources (such SoP should be designed and improved by MS during their networking exercise).

This sheet shall be used to respond to the questions: **Who** will do **What** regarding LIMS templates and LIMS application? **Why When and Where?** This check list requires firstly the description of all potential actors: Institutions and name of a personnel and its details etc..

The objective of such guideline is to develop and gradually finalize the **National & specific LIMS SoP's** in the country, i.e. **standard operating procedures** for running the LIMS system, therefore generating a **national network of stakeholders** (with their names and positions) which will have **FUNCTIONS** regarding data contribution and use of the system, such as:

- Be part of the **LIMS national Taskforce** which meets quarterly
- Take a responsibility or/and leadership to **provide** data (**contributors** as **primary** source **or secondary** source) and/or **submit dataset** to a “**parent**” **partner** (it could be NALEIC...) in the information chain. Such function can be broken down like:
 - filling some templates (paper work or possibly into the corresponding excel worksheets)
 - entering data into the screens of LIMS application (where ever it is installed)
- **Coordinate** the data capture, **follow up** the versioning of the LIMS application and update LIMS software in locations where it is installed (update may include changes in the reporting excel templates), and coordinate and **monitor** the submission to SADC
 - **Act** as a national coordinator for the regular **submission to SADC**, but it could be required for any level of submission in the information chain
 - **Download** the new **versions** of the **LIMS application** and **templates** (cf. versioning code) and of the **training material** (manuals) when released and
 - **Revise** the national **SoP's** regularly (yearly)
- Act as a **Trainer** on LIMS, using generic manuals and update manuals by drafting country specific contents to better illustrate the use of LIMS (to **customize manuals** for a national purpose)

- **Use and Interact on the AIMS / LIMS portal:** use and contribute to the portal with general information on LS related events and information
- Participate to the **AIMS national network**

Drafting the first **country SoP's**, one by LIMS module, will also ensure:

- 1/ the proper **starting of the data reporting** to SADC (in excel or with LIMS) after the date of the visit of PRINT to MS (firstly using LIMS templates and preparing the compilation of datasets, secondly and gradually using the LIMS application)

- by using **TEMPLATES in EXCEL** if one cannot use the application for some reasons, or if one wishes to use the excel templates in hard and soft copies in the field (at province and district levels). One should then also follow up updates of new versions of templates (if any) on the LIMS AIMS portal

- by using **LIMS application** facilities, one should then also follow up updates of new versions on the LIMS AIMS portal: <http://aims.sadc.int> (Livestock part)

The drafting of SoP will again need to clearly:

- **Identify and list the various and potential source(s)** of information, the **types of data** that sources could provide and manage, one should acquire and share the knowledge on when and where data are available and published (i.e. sources like web sites) in institutions where data are managed by experts (CSO etc.).
- **Prioritize and Select** a few **sources** which will contribute to the core system of 11 modules and start dispatching the LIMS roles and functions: list functions firstly so that *in fine* one institution will be selected to report to SADC
- 2/ A second goal during the networking effort with partners (when drafting SoP's) is also to start an in depth collection of the most recent **dataset available in the country for a year of reference (retrospective and detailed data** in hard or electronic copies using the LIMS templates).

It is needed in order to properly analyse some trends in the sector and therefore adequately prepare presentations for various SADC meetings like the LTC. It is also needed to prepare the drafting of the Regional Agricultural Policy during the planned workshops, where such data will be used). Electronic files should be preferred and sent to SADC PRINT.

- 3/ thirdly to **start process of collecting** elements for a “**5 years data retrospective time series**” in hard or electronic copies as well (in order to properly continue trends analysis) (Particularly ask NSO to provide all relevant documents (possibly purchased for PRINT))

Constitution of a LIMS task force

It is recommended that a **LIMS task force** be constituted and that it meets **quarterly**.

It was agreed that the **Seychelles Agriculture Agency** should spearhead the adoption and day to day operation of LIMS in the countries. That is justified because the majority of data for several modules of LIMS are the mandates of the Agency. The stakeholders present at the meeting agreed to cooperate and with other partners whether these are data sources or users were identified.

As the way forward in creating the LIMS working group, it was agreed that the **SAA board** meet and discuss the LIMS adoption issues followed by invitation of the supervisors of the stakeholders present at the meeting for further concrete actions. Meanwhile, each participant will brief supervisors about the outcomes of the training and the stakeholder's seminar.

Potential contributors to LIMS in Seychelles

Some of the stakeholders mapped during the training and seminar:

Ministry of Environment, Natural Resources and Transport (MENRT)

Three departments:

Department of Environment:

This department has the port folio responsibility for biodiversity conservation through management of the National Botanic Gardens, the forestry sector, and the National Parks and reserves – both terrestrial and marine. Other responsibilities include Pollution Prevention and control, Environmental Impact assessment on a large scale projects, and solid waste management. The department also oversees the National Meteorological and climatological services section, the wetlands unit and the Drainage Unit.

Department of Natural Resources:

This department is the major government body engaged in the agricultural sector. Up until December 2008 this Department was responsible for development and implementation of all agricultural policies and the development of all fisheries policies. Fisheries policy implementation rests with the Seychelles Fishing Authority (SFA).

Department of Transport:

This department holds the responsibility for land transport, road works and maintenance, for maritime safety administration and the Seychelles Civil Aviation Authority.

SAA: Seychelles Agricultural Agency.

The Seychelles Agricultural Agency was enacted in December 2008 to see to the provision of better output and facilitation of better output and facilitation of the sector.

The **Agricultural Statistics Unit of SAA** collects production data from registered farmers. In 2007 the unit received technical assistance from FAO (TCP Assistance) to develop a database and plan for agricultural census in 2011. Therefore the LIMS model shall be used to ascertain full compliance to the SADC system and collect the minimum data set recommended for SADC regional statistics. Other additional data and information can be collected too for national use.

SAA has also a **GIS unit** which is currently revising the agricultural cadastre.

The central database of LIMS will be established at SAA which objectives are:

- To facilitate and support the enhancement of **national food security**;
- To facilitate the increase of the **contribution of agriculture** in the country's gross domestic product;
- To facilitate the modernisation and development and **development** of the agricultural sector.
- To assist in the formulation of **national agricultural policies** and implementation of those policies.
- To support the development of the agricultural sector by providing **technical assistance and services** to that sector;
- To facilitate formal and informal **training of food producing entrepreneurs and technical personnel**;
- To facilitate the **maximisation of local production of meat**, such as **pork** and broiler **poultry**, table eggs and **valorise** other livestock types;
- To facilitate the maximisation of local production of arable crops;
- To encourage and promote **agricultural production at household level**;

- To encourage the exploitation of spices, floriculture, essential oils and traditional plantation crops for export as **value added products** and raw materials;
- To promote the production of **organic** crops;
- To promote **small scale agro processing** in collaboration with other organisations;
- To assist with the stocking of adequate amounts of quality **agricultural inputs and supplies** to meet the requirements of the agricultural sector;
- To ensure compliance with frameworks;
- To implement **programmes and projects** relating to agriculture and collaborate with relevant agencies in the implementation of those programmes and projects;
- To participate in **meetings, seminars and discussions** relating to agriculture at **national, regional** and international level;
- To perform such other functions that the minister, by order published in the Official Gazette prescribed.

National Statistics Bureau

It is the official source of data collected nationally. The NSB collects agricultural data as part of the National Census. The last published National Agricultural survey was in 1978. The national statistics Bureau is the official information collection centre. Important agricultural information is collected during each population census. The last official agricultural survey was carried out in 1978 and one is being planned for 2011.

The NSB provides for the following list of publications, which contents can be selected to be used into LIMS

Title / Year / Prices

Census Report 1977 SR 80.00
Census Report 1987** SR 75.00
Census Report 1994 Volume 1 1994 SR 90.00
National Population & Housing Census 1997 SR 125.00
National Population & Housing Census 2002* SR 200.00
Seychelles Population & Housing Census - Atlas 2002* SR 150.00
The Population of Seychelles 1987 - 2012 1992** SR 35.00
Seychelles Population Projections 1996-2019 1997 SR 50.00
Household Expenditure Survey 1978 SR 60.00
1983/84 SR 45.00
1991 SR 60.00
1999* SR 115.00
Labour Force Survey 2005 SR 200.00
Agriculture Survey 1978 SR 60.00
Statistical Abstract 1977 SR 60.00
1978 - 1982 SR 50.00 each
1983 - 1986 SR 60.00 each
1987 - 1993 SR 70.00 each
1994 SR 75.00
1995 SR 85.00
1996 - 1998 SR 100.00 each
1999 - 2001 SR 115.00 each
2002 SR 130.00
2003 - 2005 SR 140.00 each
2006 SR 150.00
Trade Report 1978 - 1980 SR 60.00 each

 2001 - 2007 SR 15.00 each
 Statistical Bulletin Quarterly: 1980 - 1981 SR 25.00 each
 New series introduced since July 1982
 (Yearly Airmail Subscription) SR 500.00
 - Tourism Monthly SR 5.00
 - External Trade Quarterly SR 5.00
 - Retail Price Index Monthly SR 5.00
 - Production Indicators Quarterly SR 5.00
 - Employment and Earnings Half Yearly SR 5.00
 - Population and Vital Statistics Half Yearly SR 5.00
 - Visitors Survey Annually SR 5.00
 - National Accounts Annually (Pre 1989) SR 5.00

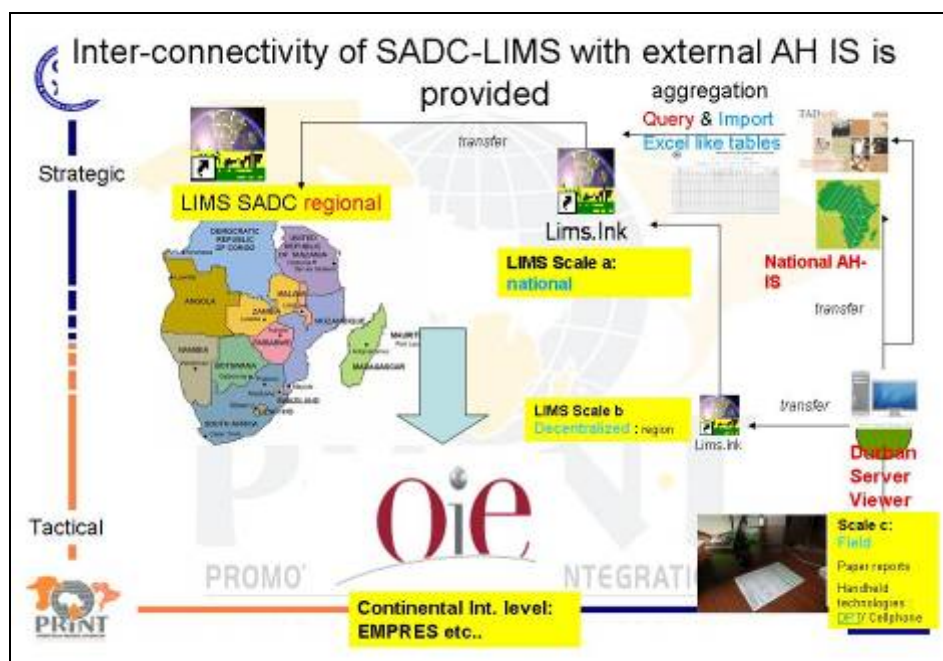

Other sources of information could be used though it is not recommended that such institutions be members of the “first” Livestock forum .

Development Bank of Seychelles

The Development Bank of Seychelles (DBS) was established in 1977 with a specific mandate to assist in the economic development of the Seychelles. DBS engages in local and external borrowings to finance economically viable projects in all sectors of the economy, particularly Agriculture, Fisheries, Industry, Tourism and Service.

Interoperability with other systems:

In some instances, one could insert the LIMS system into a more global system therefore reinforcing it. Here the diagram is highlighting how LIMS can be inserted into the information chain of DEVinfo; all supported by UN, and generally carried out by CSO's in SADC region. These systems are generally weak in capturing indicators and information related to the LS sector. We can actively change this by adopting LIMS as a standard in MS. The same principle applies for chain of information on agricultural statistics that can be sometimes a bit weak on the livestock sector.

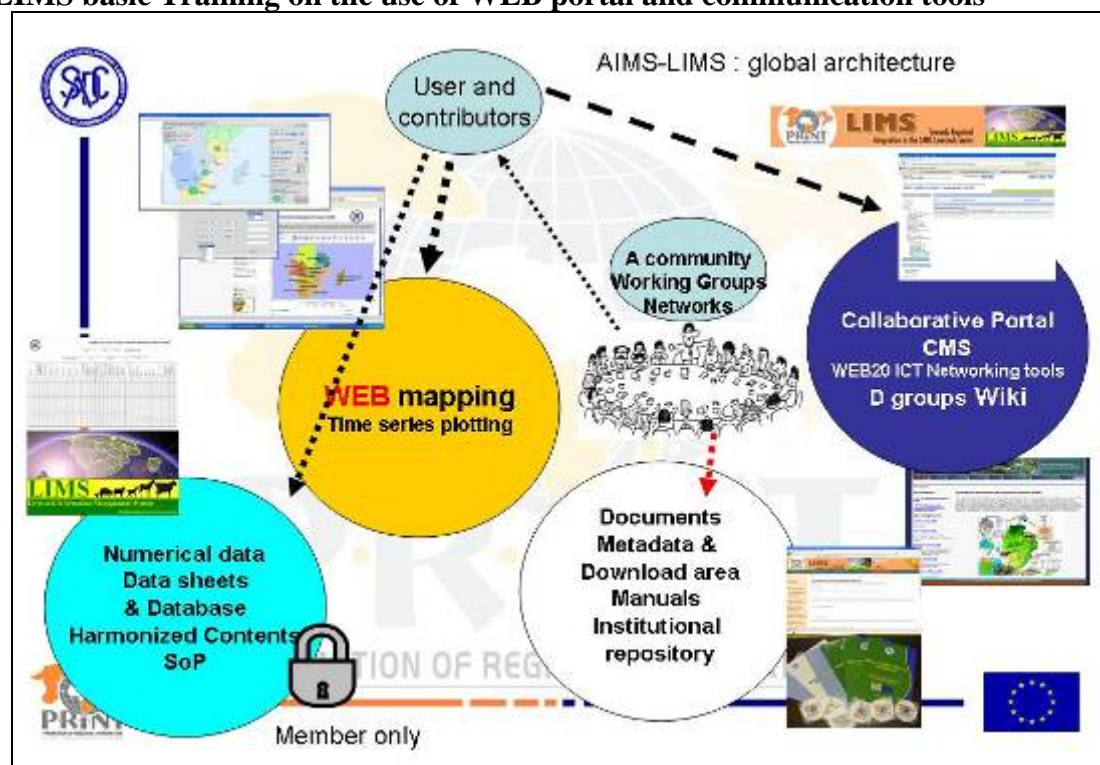

LIMS into a series of global information chains: towards development of links with external databases at various scales (national regional international) like OIE FAO AU IBAR, COI

3-4. Presentation of some features of the LIMS web portal

*“A **web portal** presents information from diverse sources in a unified way. Apart from the standard search engine feature, web portals offer other services such as e-mail, news, stock prices, information, databases and entertainment. Portals provide a way for enterprises to provide a consistent look and feel with access control and procedures for multiple applications and databases, which otherwise would have been different entities altogether. (source Wikipedia).”*

Web LIMS basic Training on the use of WEB portal and communication tools

LIMS portal under AIMS

As part of the LIMS system the portal is an important component. Therefore, a basic exposure to the portal was done by the facilitators with firstly the presentation of the general characteristics of the AIMS portal and its tools and secondly an highlight was given on the specific livestock and LIMS pages. About the later the focus was given on a few components:

The web part of the LIMS system can be seen integrated into the AIMS portal or independently. Therefore it can be accessed through different means:

SADC web: <http://www.sadc.int/fanr/print/index.php>

AIMS site : <http://aims.sadc.int>

Web-mapping AIMS-LIMS Mapserver: <http://lims.sadc.int>

Direct link to LIMS web pages: <http://www.printlims.org> for the temporary and independent LIMS site.

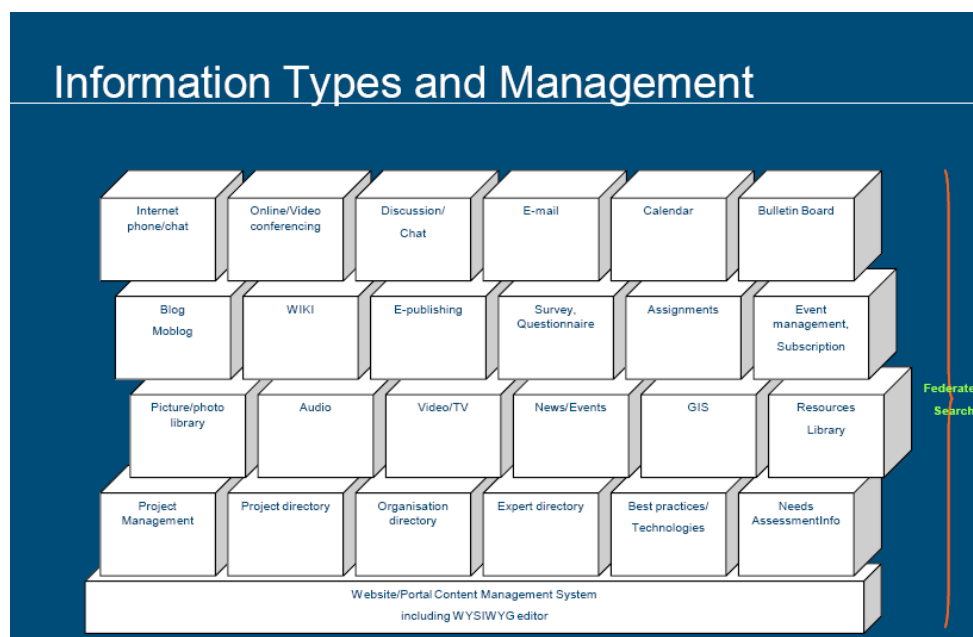

The preferred option is through the AIMS portal.

<http://aims.sadc.int/printlims> is an iframe of LIMS pages into AIMS

Link to livestock pages through AIMS: <http://aims.sadc.int/livestock/>

Link to LIMS contents (and PRINT) through AIMS: <http://aims.sadc.int/livestock/print-lims/>

Link to LIMS Wiki through AIMS: <http://aims.sadc.int/livestock/wiki-lims/>

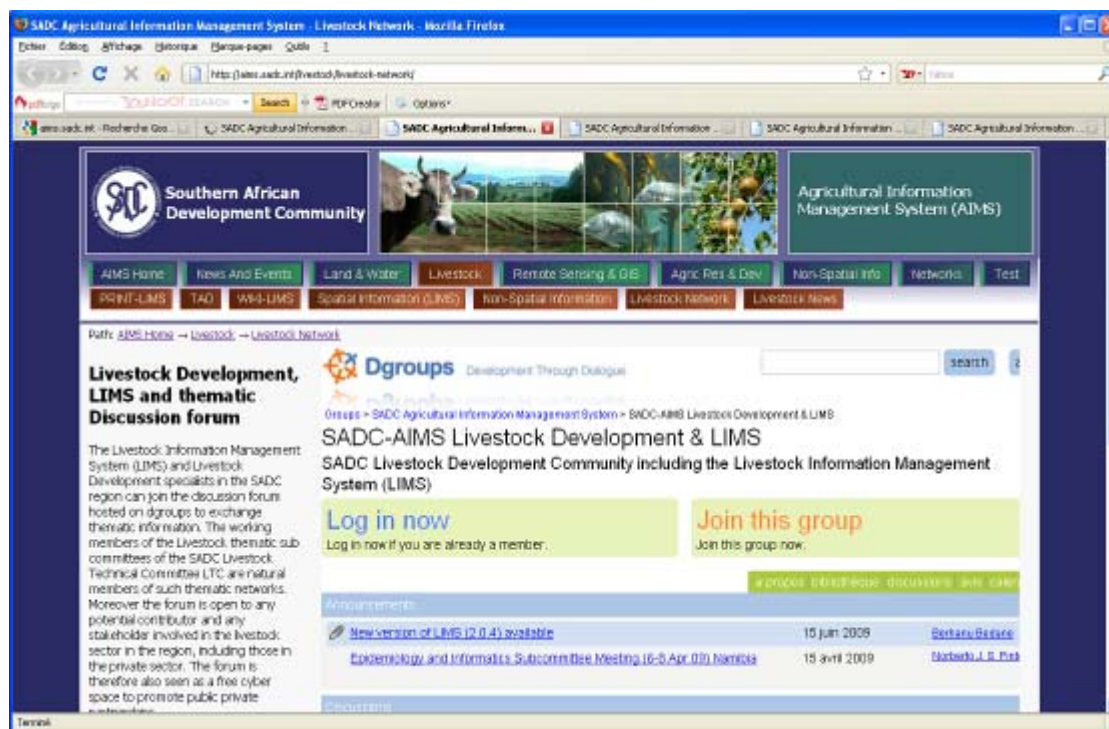

The AIMS portal has numerous features inherited from the WEB20 that facilitate interaction between stakeholders. Some are specific to LIMS.

D-groups

The Trainers of Seychelles will be invited to register to the LIMS D-groups and will soon become members of the SADC LIMS community.

- Discussion forums & mailing lists with D-groups enabling exchange and communication via e-mail keeping records of discussions messages (online). This will be used to run thematic and technical forum e.g. on the use of tools and templates.

The pages to register in the group

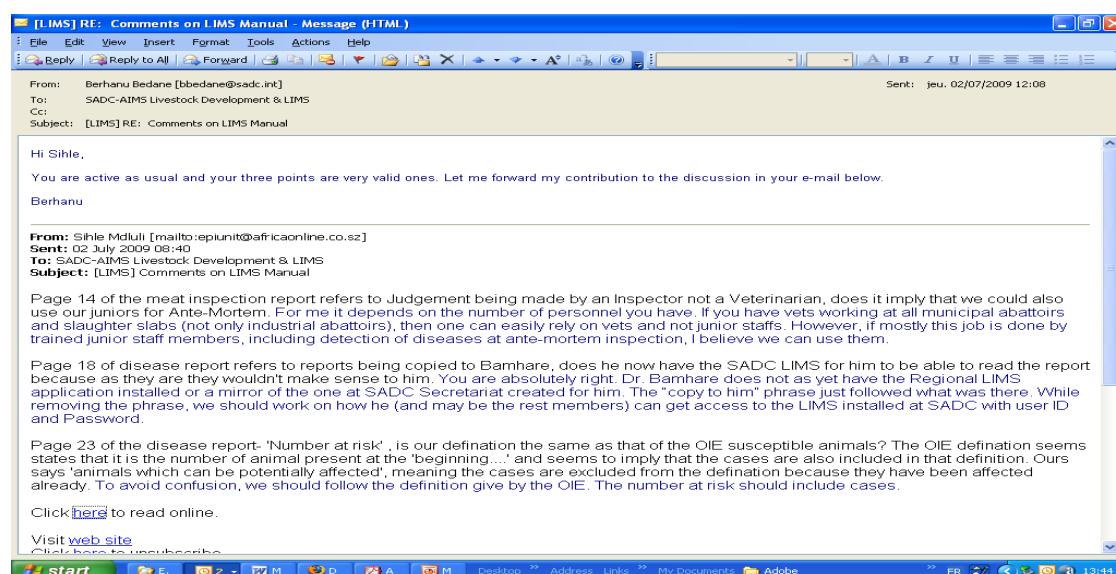

LIMS dgroups a tool for the community:

It can be accessed through different means. It is a subgroup of AIMS Dgroup a larger community.

- AIMS community
 - address : AIMS@d2.dgroups.org
- Livestock subgroup created
 - LIMS@d2.dgroups.org

<http://aims.sadc.int/livestock/livestock-network>

<http://d2.dgroups.org/groups/SADC-AIMS/LIMS>

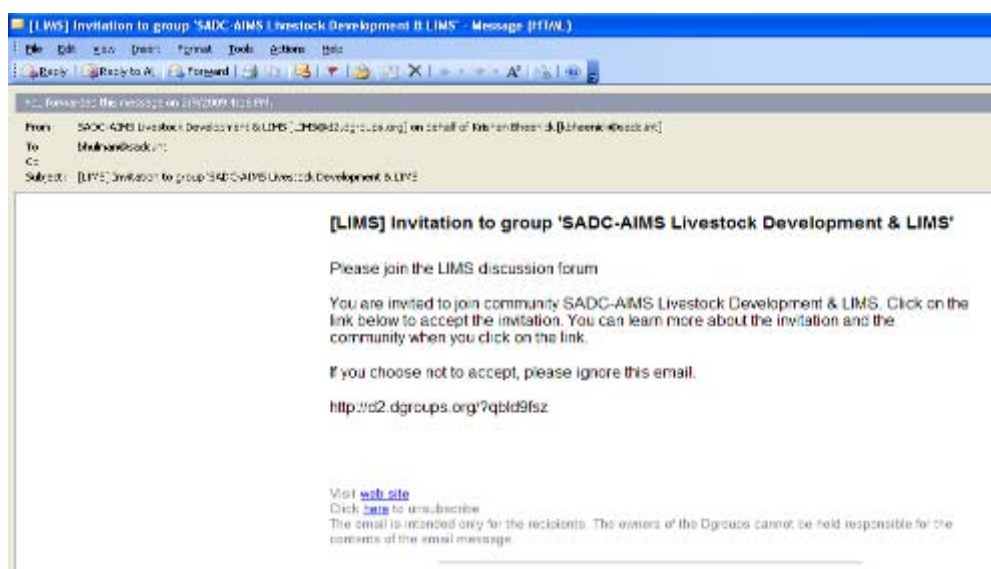

Dgroups use a normal email procedures hence facilitating adoption.

Membership of LIMS Dgroup is growing

The LIMS regional community

Specific Dgroup invitation for Seychelles

The week after the training in Seychelles, the following list of people were invited to register and participate to the LIMS community discussions (list from which some were already members and therefore were discarded from the invitation by the Dgroup system administration):

l.motta@yahoo.com, dr_joel@intelvion.net, jmelanie@intelvion.net, tyron@finance.gov.sc,
stats@email.sc / sandroernesta@yahoo.com, therese@nsb.gov.sc
pehol@moh.gov.sc or neshamlaye@yahoo.com, mmpayet@yahoo.com,
laurette1965@hotmail.com, sandrrou@seychelles.sc

Invité(e)(s): l.motta@yahoo.com, dr_joel@intelvion.net, tyron@finance.gov.sc,
therese@nsb.gov.sc, mmpayet@yahoo.com, laurette1965@hotmail.com

Discarded (already members) Les utilisateurs suivants ont déjà accès à cette communauté: Jimmy Melanie,
Sandra Moumou.

Dear LIMS "task force" from the Seychelles

I am very grateful of what we have accomplished there in your wonderful islands

We came back safely Berhanu and myself and it is time by now to reactivate the group as promised

This is an invitation to join the SADC LIMS discussion group (LIMS Dgroup community)

Just follow the procedure indicated in the email

Best regards

Dr. Pascal Bonnet PhD

CTA Chief Technical Adviser SADC / FANR directorate / PRINT project,
Promotion of Regional Integration in the SADC Livestock Sector
SADC Secretariat Southern African Development Community, FANR
directorate

Message: Millenium Office Park, Kgale views, SADC Building Ground Floor

LIMS Dgroups

You are invited to join community SADC-AIMS Livestock Development & LIMS.

[Accept the invitation](Le lien d'inscription sera inséré ici).

You can learn more about the invitation and the community when you click on the link.

If you choose not to accept, please ignore this email.

Dgroups should support the work of national LIMS networks and of regional subcommittees. PRINT is studying the interest of forming sub groups like the livestock subcommittees thematic groups:

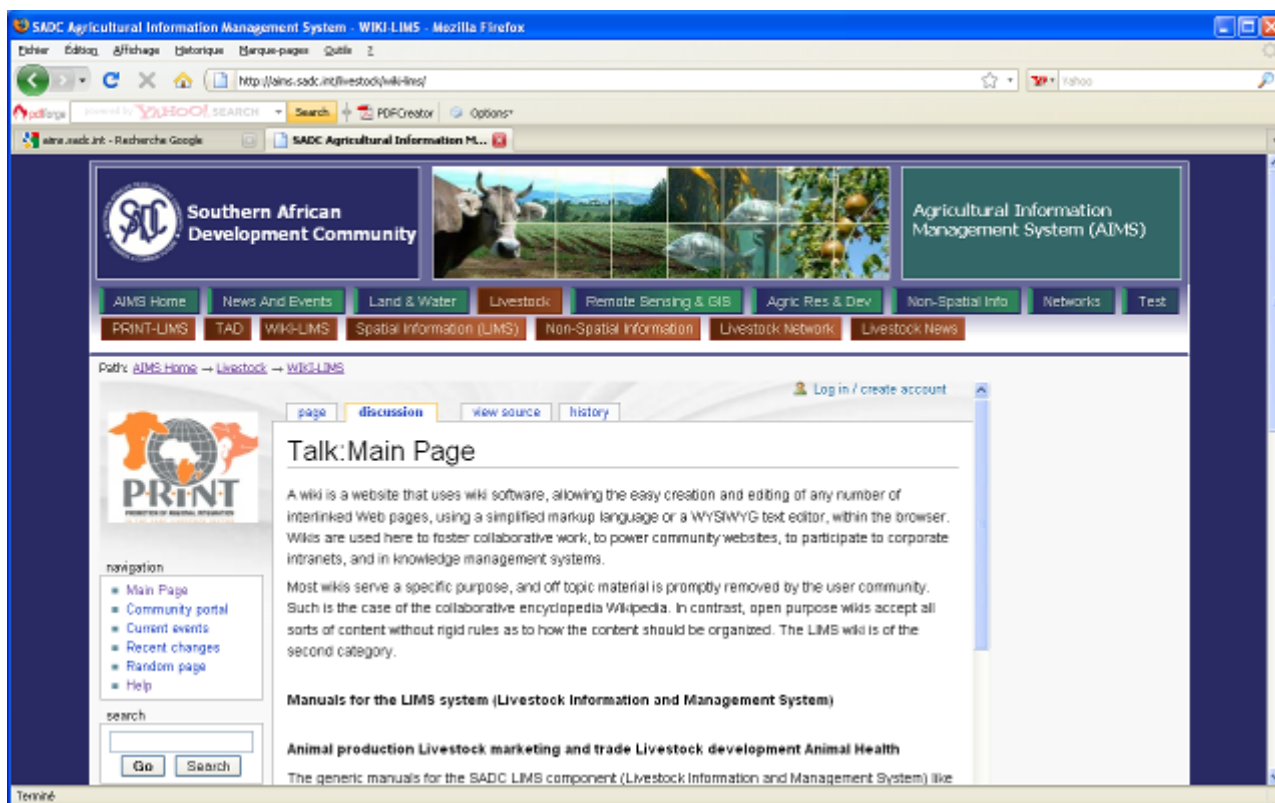

- LIMS-EIS@d2.dgroups.org
- LIMS-APVMGR@d2.dgroups.org

Wiki

*“A **wiki** is a [website](#) that uses [wiki software](#), allowing the easy creation and editing of any number of [interlinked Web pages](#), using a simplified [markup language](#) or a [WYSIWYG](#) text editor, within the browser. Wikis are often used to create [collaborative websites](#), to power community websites, for personal [note taking](#), in corporate [intranets](#), and in [knowledge management](#) systems.”* “Most wikis serve a specific purpose, and off topic material is promptly removed by the user community. Such is the case of the collaborative encyclopedia [Wikipedia](#). In contrast, [open purpose wikis](#) accept all sorts of content without rigid rules as to how the content should be organized.”

For LIMS, the Wiki is based on the model of Wikipedia, it will serve the collaborative enrichment and editing of LIMS manuals

Though the generic LIMS manuals have been released and given in the training CD and will be posted for download in the LIMS website, it is important that WIKI version are enriched gradually with illustrations by member states.

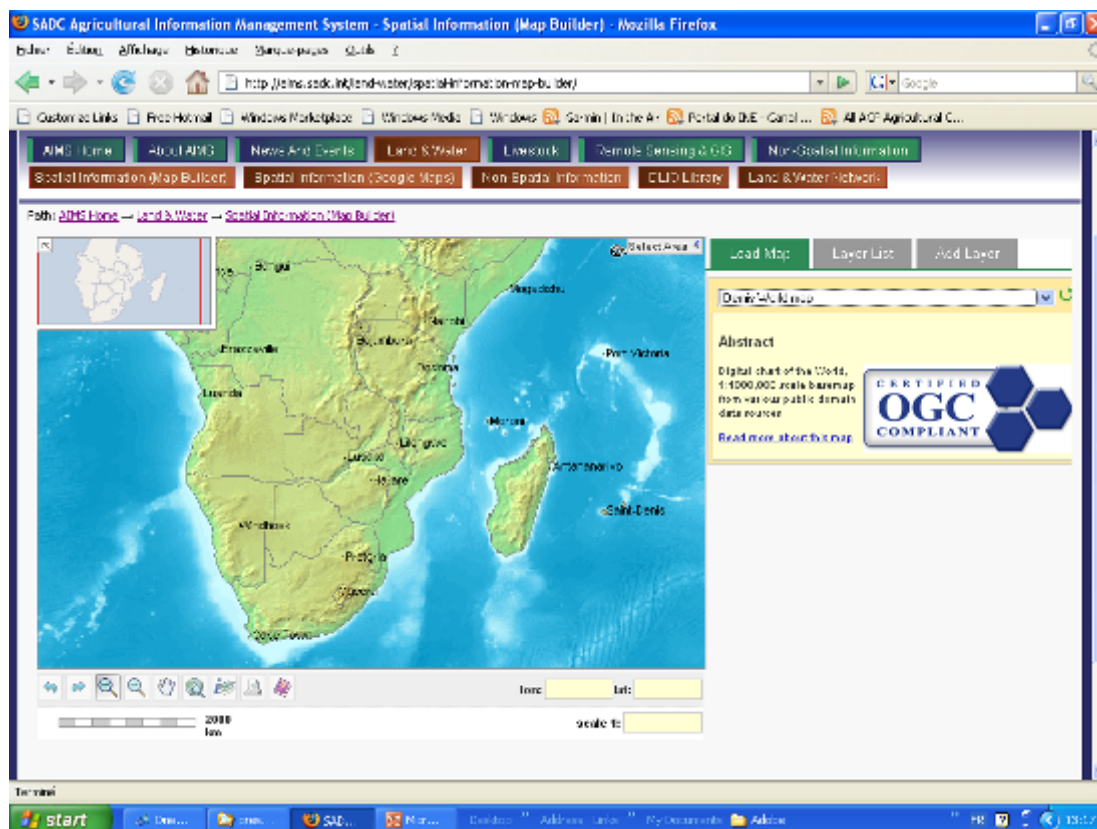

Besides, other documents could be edited / commented / enriched, on line using their WIKI version, e.g. the annual yearbook on animal health or animal production that should be produced by MS

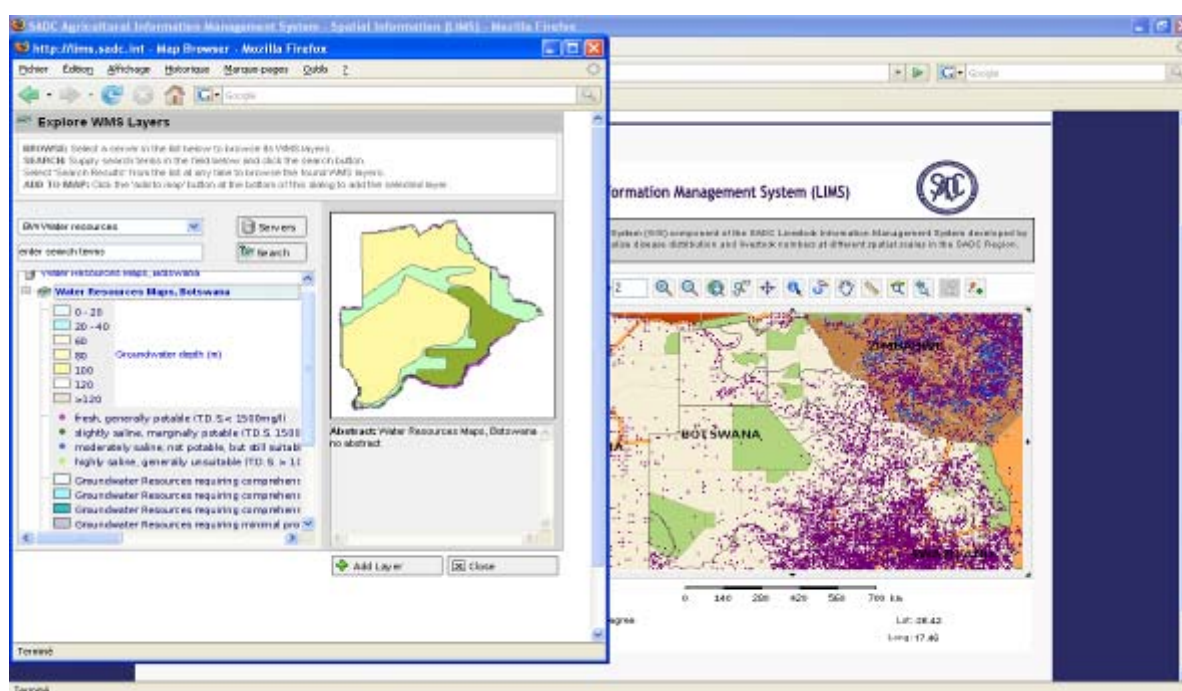

Web mapping

Web mapping / collaborative cartography: Regional Mapserver

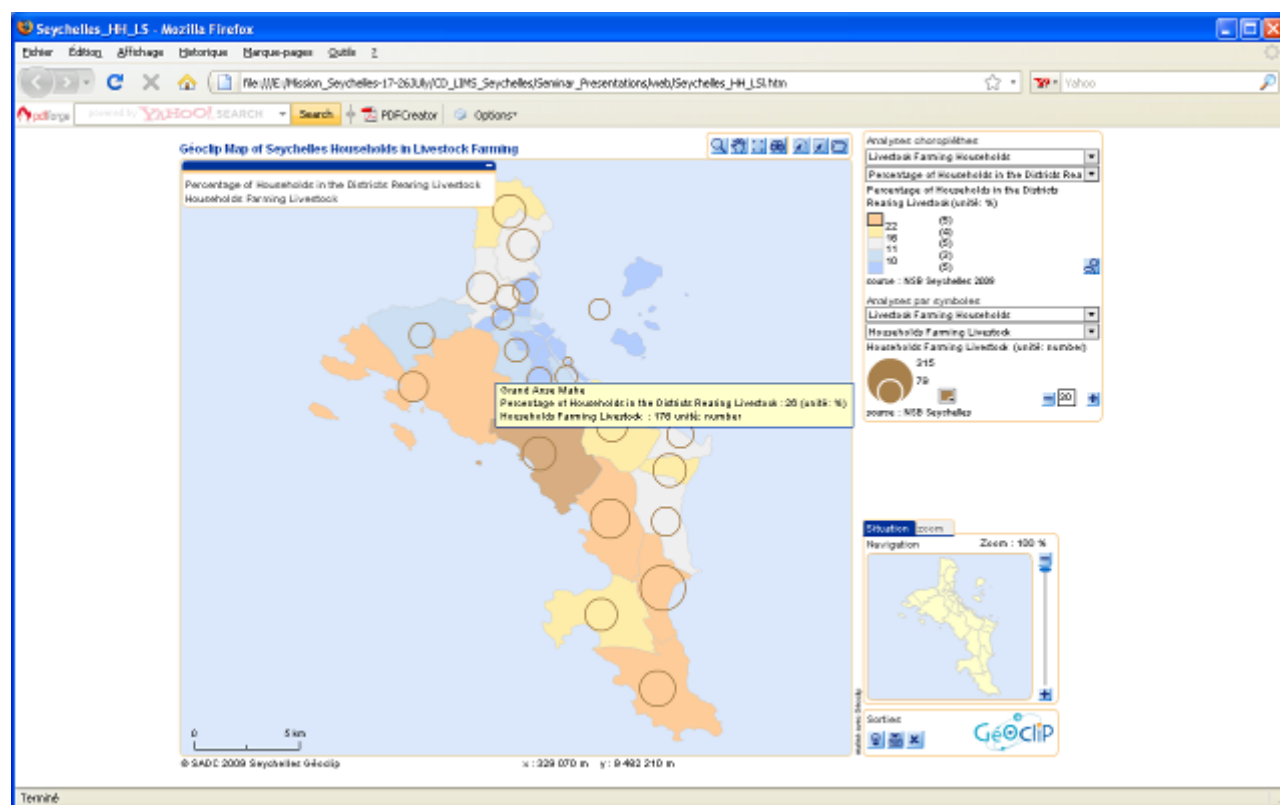

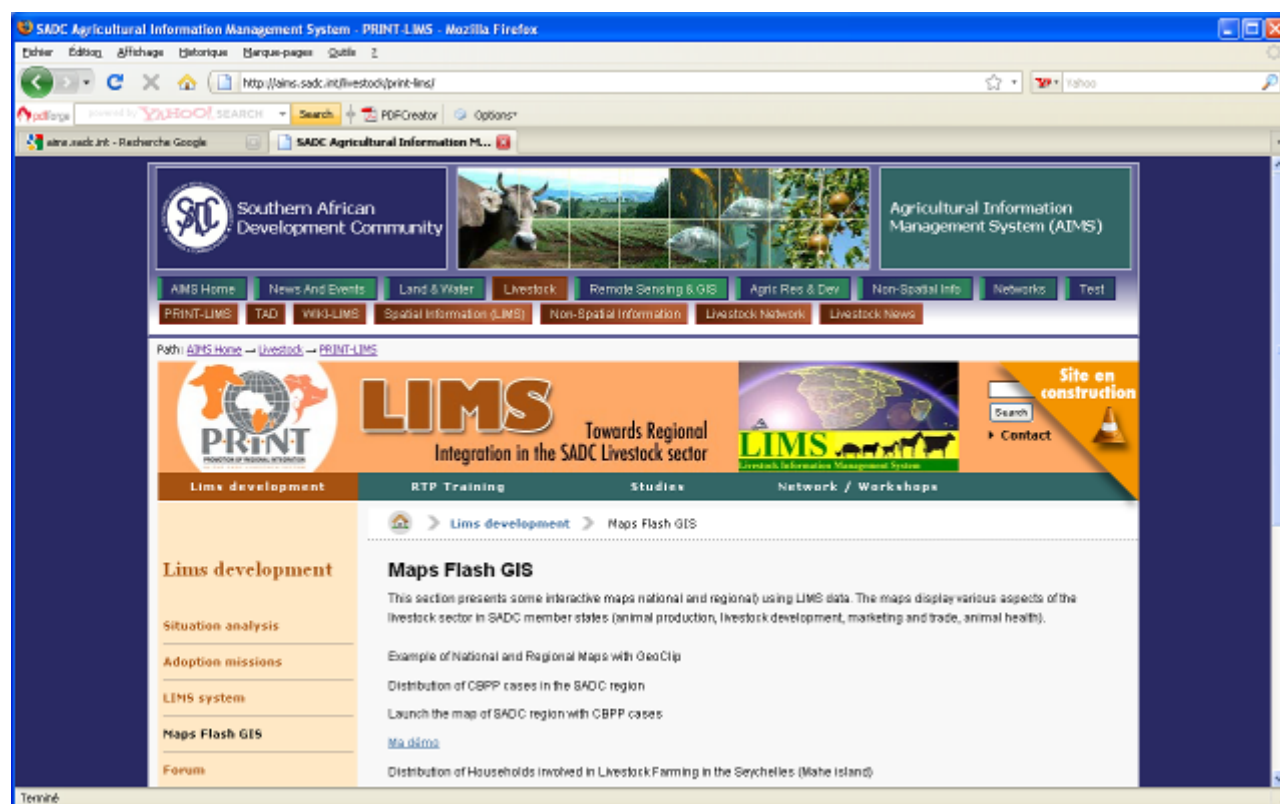

The Mapserver is already a component of AIMS and LIMS. It is where one can display regional data using WMS web map servers & services (OGC standards).

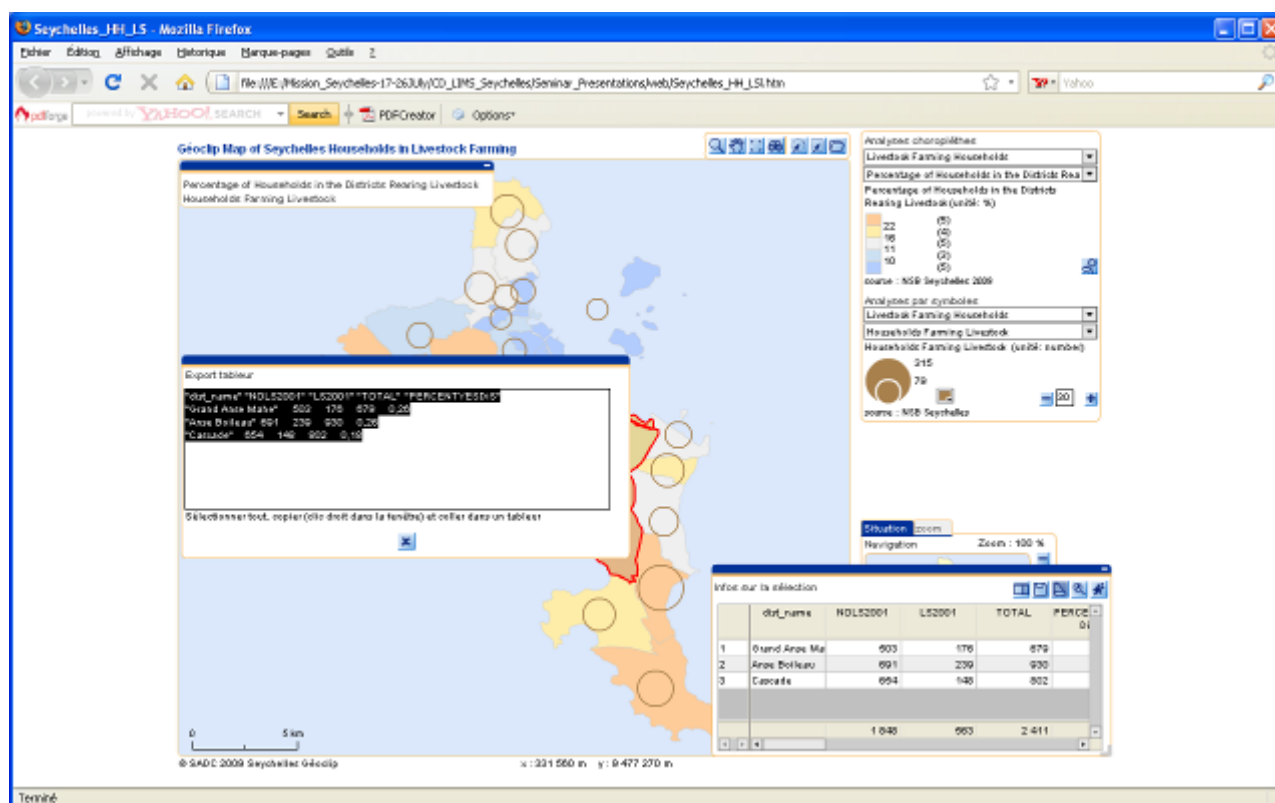

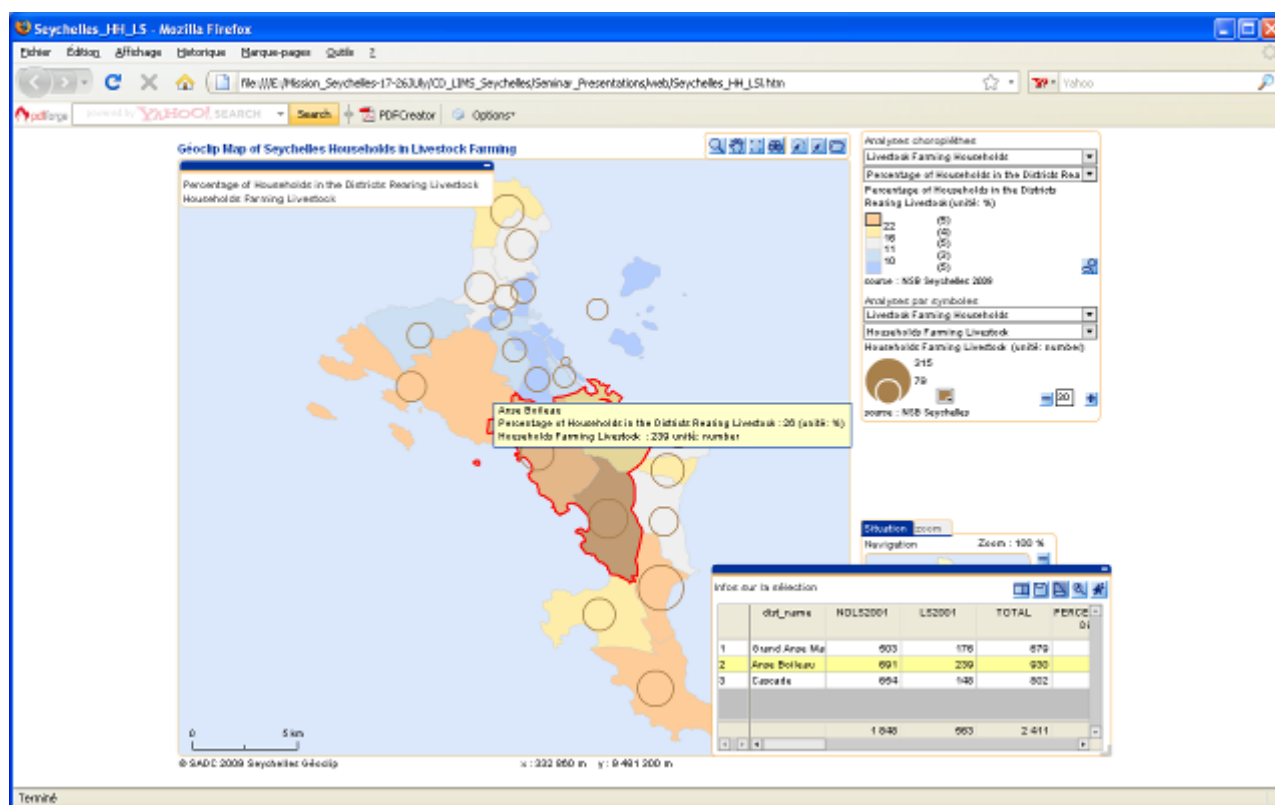

Specific National Interactive Geoclips for Seychelles

Geoclips maps are small flash-based maps that can be generated with little effort from shape files and selected attribute data and posted online for consultation. SADC (PRINT) has acquired a license for using it.

An example of a geoclip map was put on the web site representing the % of HH involved in Livestock farming in the Seychelles' main islands, thanks to data provided by NSB. The followings screen shots show some of the various displays allowed by the system including the option for displaying specific data (table) retrieving raw data from the geoclips on line (in text format).

CMS

The final objective of the LIMS web site is to use a Web site managed by MS themselves through a CMS Content management system (software) directly managed by institutions. For LIMS we have selected EZ publish to complement the one used into AIMS.

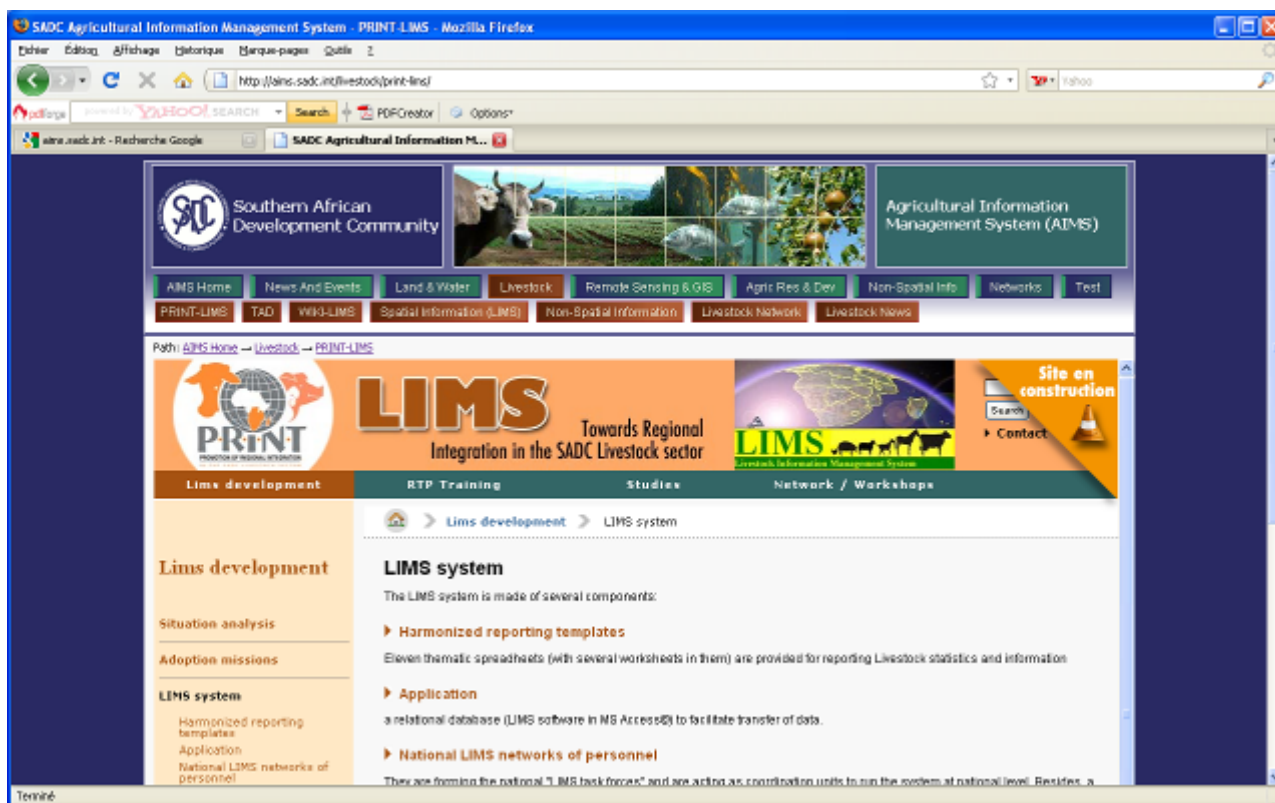

The CMS allows inputting contents and making accessible items and documents (though some documents will be made accessible only to registered members).

LIMS EZ publish portal contents as managed by EZ Publish

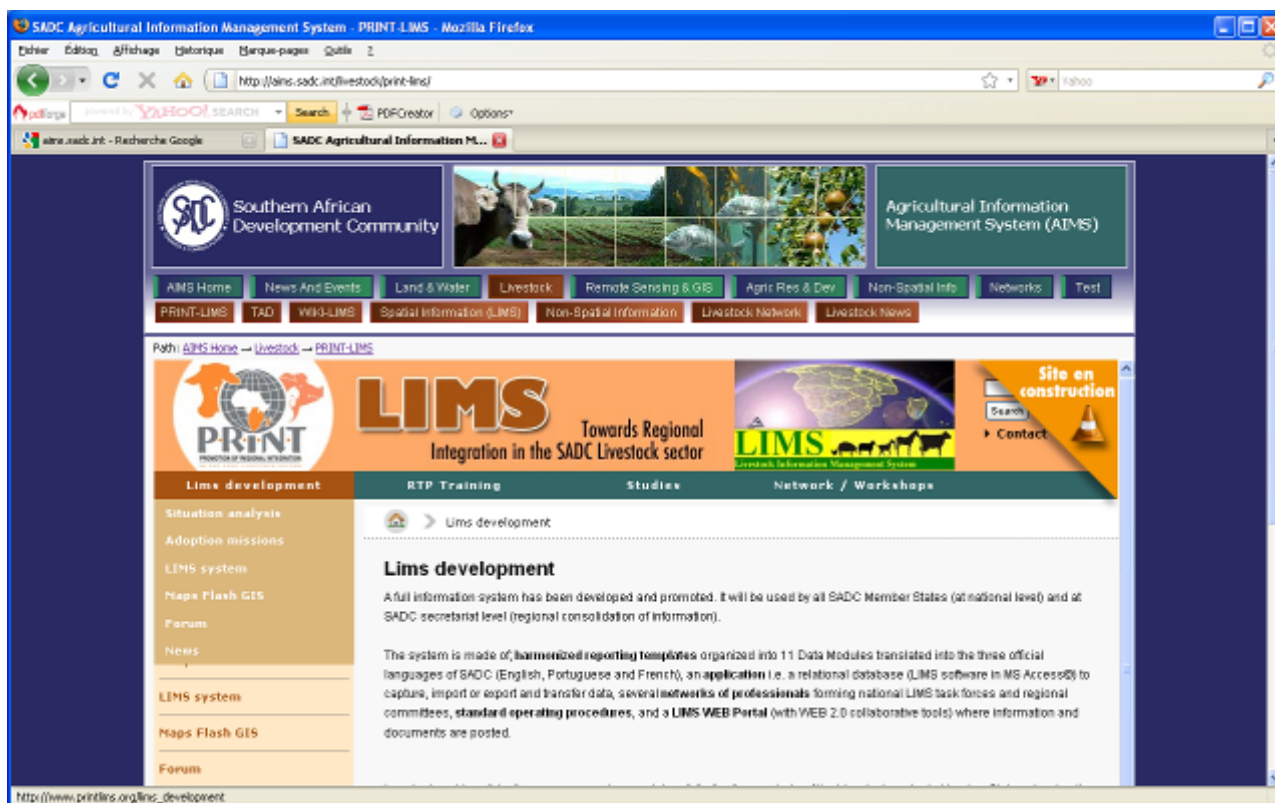

The LIMS web site is provided as an independent site (<http://www.printlims.org>) to allow its launching (in 2009 and its sustainable management by CIRAD in 2010) , and is also included as an iFrame under AIMS main portal to show the integration of sub systems.

LIMS website included as an iFrame under the AIMS main portal & site (<http://aims.sadc.int/printlms>) here displaying the RTP contents (training)

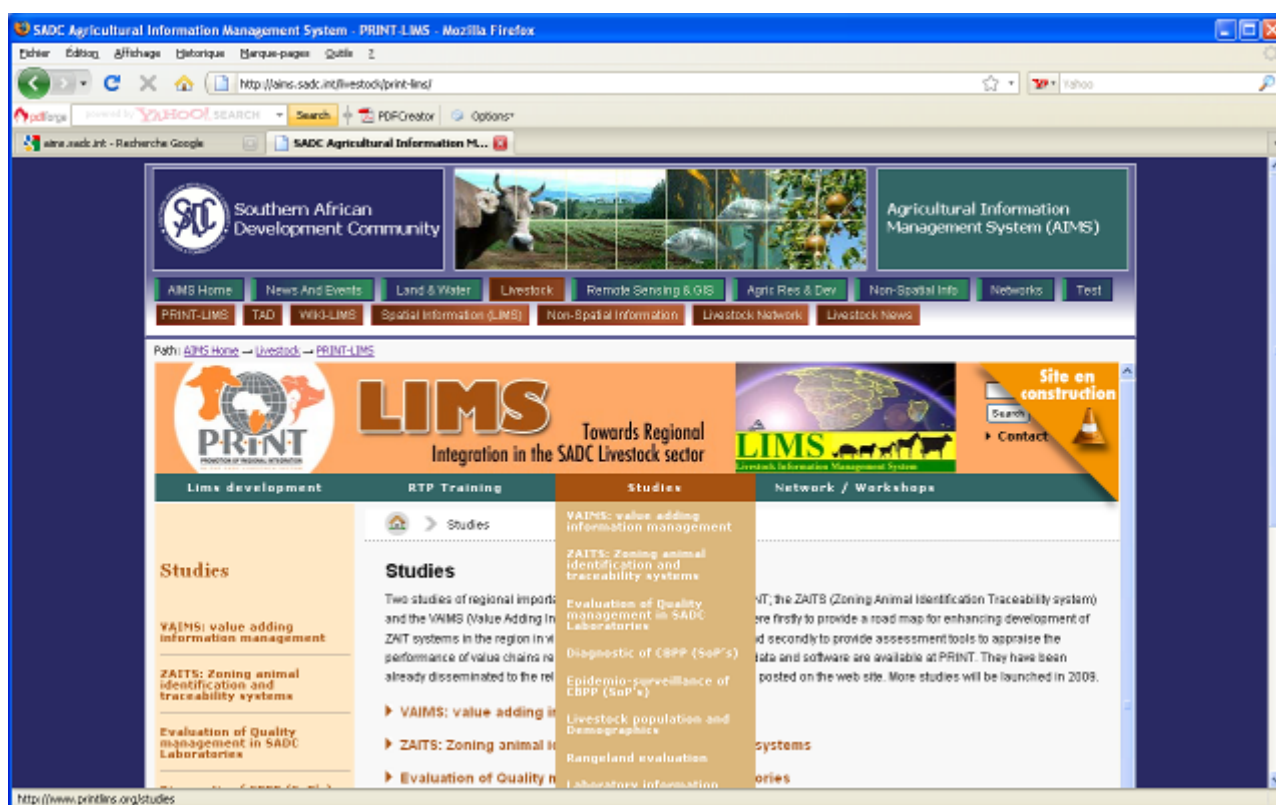

A few Screen shots showing the structure of the various LIMS component

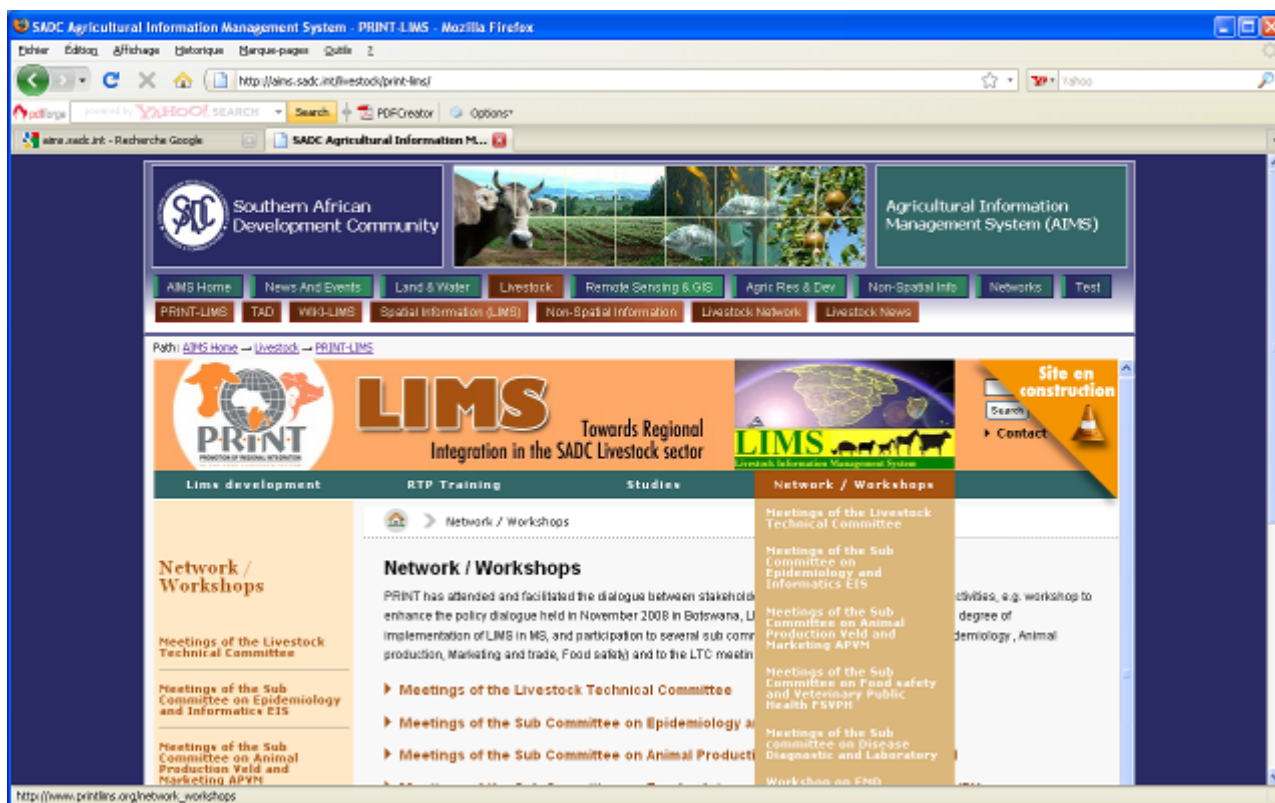

LIMS development

LIMS training

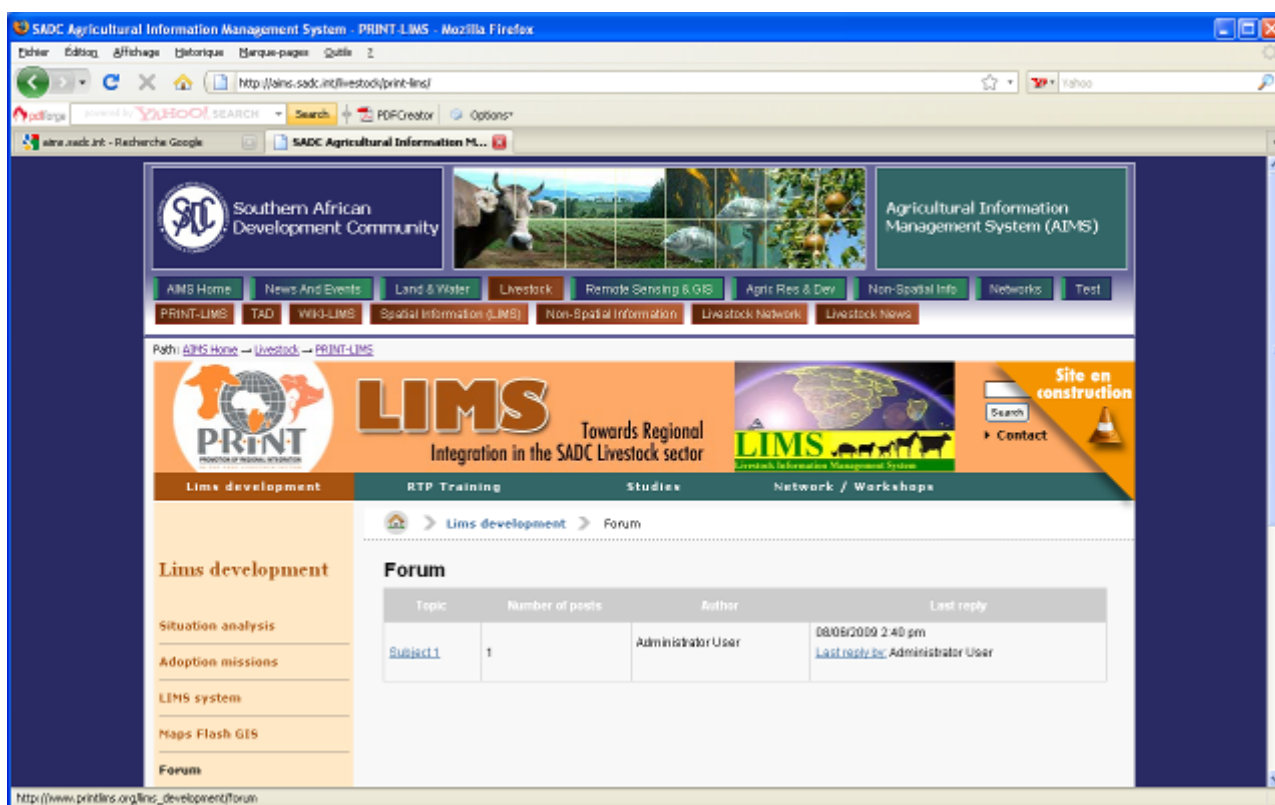

LIMS studies

LIMS networks and Workshops

FAQ and LIMS application forum

A Specific forum on LIMS software is available with the objective of managing **FAQ** about the LIMS application, on Topics like *Install*, *Roles and Functions*, *Data Capture*, *Transfer of data files* (*sending receiving*), *Query Export*, *Others* (*use of webtools*). Registration is managed by an administrator.

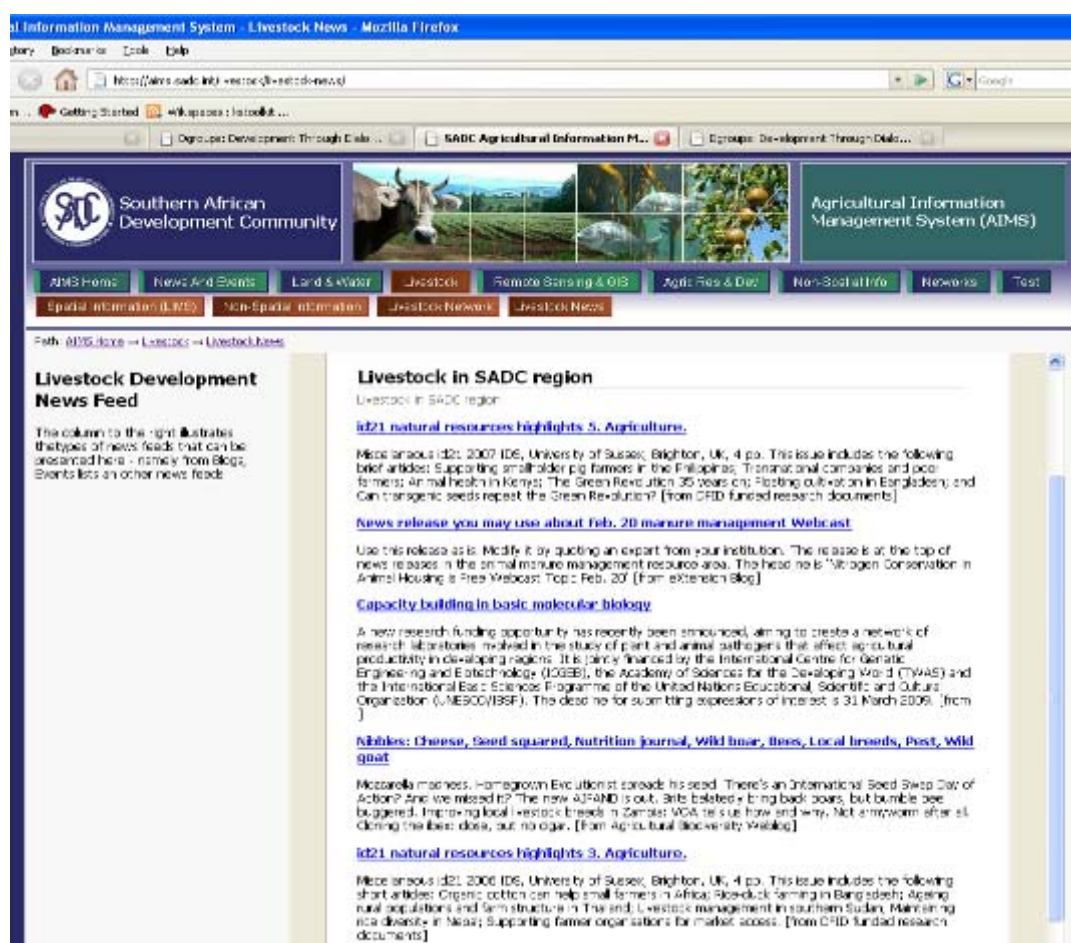

AIMS tools and specific Django CMS

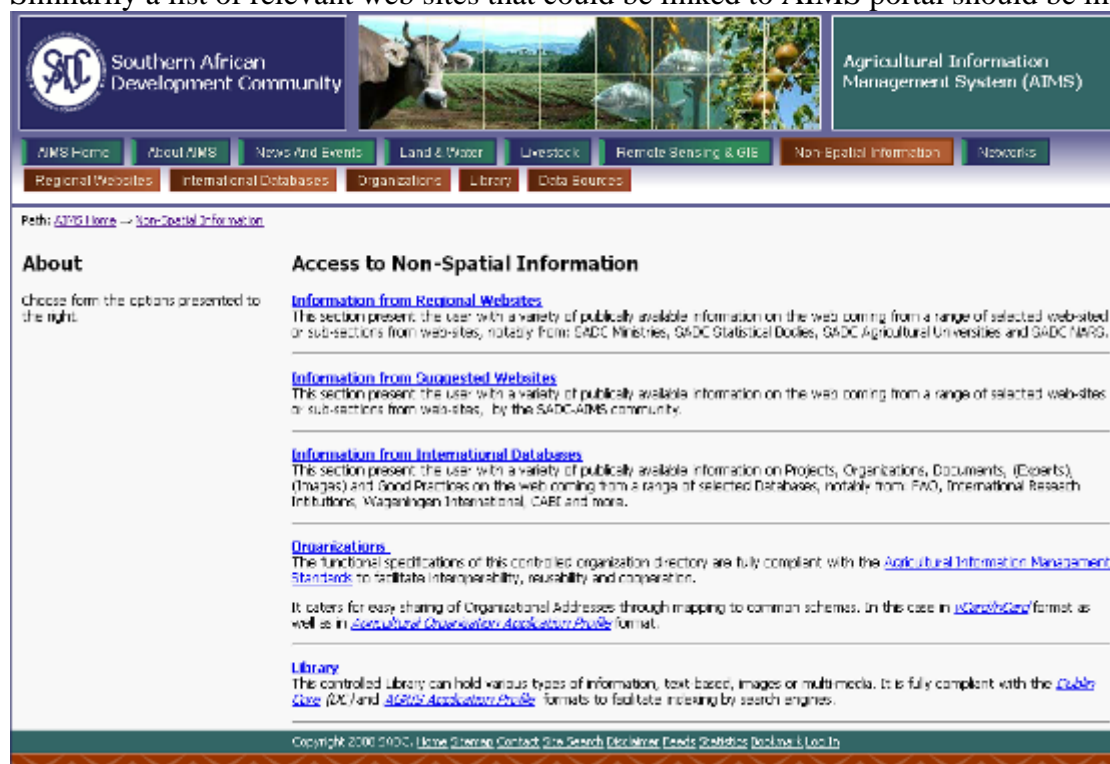

The main Livestock page of the AIMS portal.

AIMS is using the Django CMS.

A list of Links (to be established and fine tuned any time) with websites that allow RSS feeds can be established for feeding the AIMS portal with the relevant news in the livestock sector.

Similarly a list of relevant web sites that could be linked to AIMS portal should be implemented.

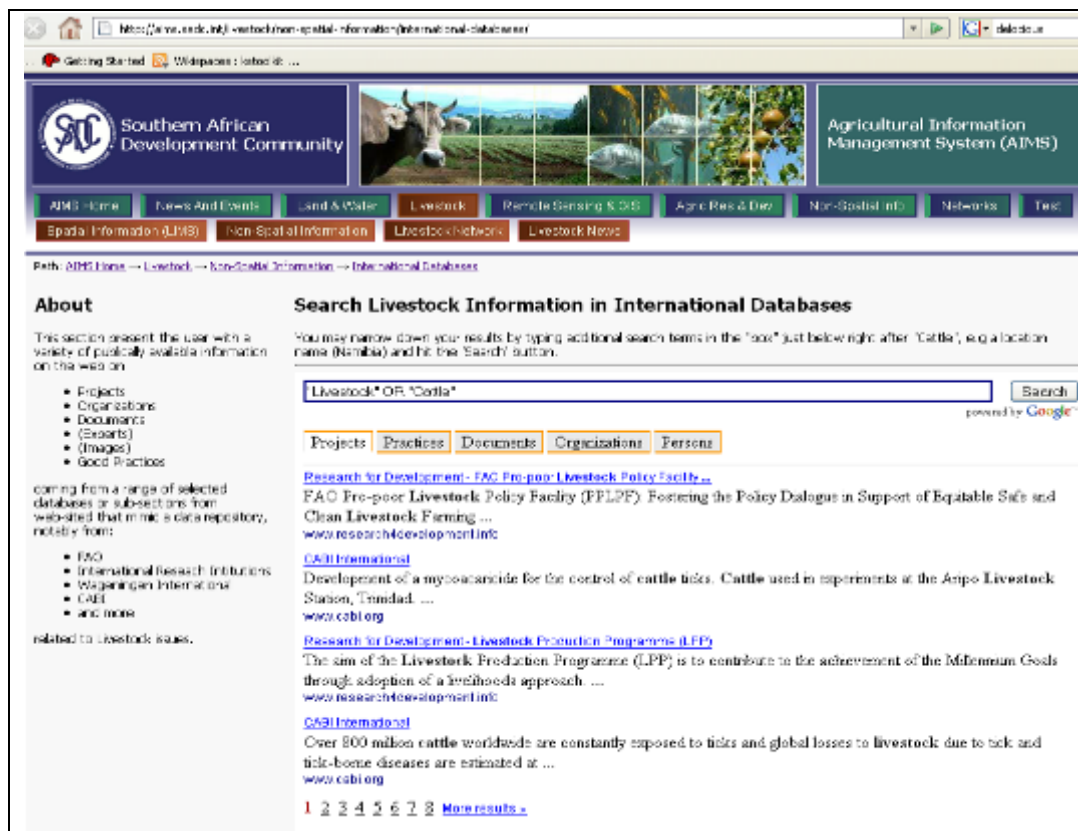

The following list of sites relevant for Seychelles provides as a starting point

<http://www.nation.sc/index.php?art=16351>
http://www.natureseychelles.org/index.php?option=com_content&task=view&id=151&Itemid=149
<http://www.virtualeyechelles.sc/gover/me.htm>
<http://www.nsb.gov.sc/pages/Statistics/CPI.aspx>
<http://www.cbs.sc/>
<http://www.sib.gov.sc/>

<http://www.statehouse.gov.sc/>
<http://www.siba.net/>
<http://www.civilsociety.sc/en/home/index.php>
<http://www.env.gov.sc>

A few Seychellois have been trained by ICART Implementation & Coordination of Agricultural Research & Training project (Krishan J Bheenick, Regional Information, Communication and Training Officer), about the use of some tools available in the AIMS portal (e.g. sessions at NIIT in June and May 2009) and development of a RAILS website for the research in Seychelles e.g. www.e-rails.net.

The ICART last trainee's names are mentioned as follows with their institutional origin: (Sandra Sinon (Res), Jose Guerreiro (Ext), Maryse Arrisol (Info), Emie Joseph (Info), Keven Nancy (Res), Joy Govinden (Res)). One should remember that the livestock sector is not represented in the research station in Seychelles. Research on livestock is partly the mandate of the SAA though not well developed.

The search tool using key words specific to agricultural research is implemented into AIMS.

4. Other Topics (than LIMS) discussed during the mission: FaNGR

Situation analysis, meetings with key informants in institutions

During the mission some key institutions were visited and discussions undertaken on how SADC could help developing the sector through trainings, studies, participation to regional meetings etc... Beside the already provided lists, the following persons were also met and visited.

SURN AME	FIRST NAM ES	TI T L E	Gen der	DA TE OF BIR TH	DESIGN ATION	MINISTRY/ORGANISATION	FULL ADDRE SS	PHYSICAL ADDRESS	Landline FAX	MOBILE	E-MAIL
Agathine	Danny					SAHCT	PO BOX 383	Victoria Mahe Seychelles	Landline : +248 514126	Cell: +248 783898	danagathine@yahoo.com
Humphreys	Herdleys				Field officer	GIS unit SAA, Agric. Land Management			Landline : +248 566868		Herdley_seychelles@yahoo.com
Tilly	Julina					National Statistics Bureau	P. O. Box 206	Caravelle House, Manglier Street, 3rd Floor	Landline : +248 611651 / FAX: +248 225634		Stats@nsb.gov.sc / Website: www.nsb.gov.sc

- **The Participation to the LTC and to sub committees**

The Participation to the LTC and to sub committees was addressed as Seychelles is not used to the modus operandi adopted by SADC. The web site will help them keeping abreast for new development and opportunities.

Results of last LTC meeting are accessible by MS on the web site

The next APVM&GR SC meeting should be focussing on genetic resources. It is important that Seychelles participate.

- Introduction to Animal Genetic Resources
 - o *Farm Animal Genetic Diversity*
 - o *Roles and values of Animal Genetic Resources*
 - o *Driving Forces in the Livestock Sector – future challenges and issues*
 - o *Assessment of major needs*
- Inventory and characterization
 - o *Introduction*
 - o *Assessment*
 - o *Main area, Strategic Priorities and list of actions*

(these subchapter are repeated in each of the four chapters)

- State of Utilization
- State of Conservation
- Institutions and Capacity Building

1. *Improving the understanding of the status and characteristics of animal genetic resources to enable their sustainable use, development and conservation (5 SP*)*

2. *Enhancing the use and development of animal genetic resources in all relevant production systems as part of efforts to achieve food security and alleviate poverty (4 SP)*
3. *Conserving animal genetic resources to ensure their availability for future use and development in all production systems (5 SP)*
4. *Enhancing institutional development and capacity building to achieve the successful implementation of national programmes for animal genetic resources (9 SP)*

- **Training for the SAHTC Seychelles Agricultural and Horticulture Training Centre**

The Participation to trainings was particularly discussed during a visit to the SAHTC in Mahé. The centre will be added in the inventory of training institutions made by SADC ICART.

The visit to SAHTC (the CTA with Danny Agathine and Maryanne from the centre) showed the need to train trainers of such centres to new agricultural technologies that could be adopted in Seychelles and to ICT tools.

PROSPECTUS 2006-2007

The General Agriculture Phase 1 Programme is made up of the following modules and Co-modules.

Compulsory Modules	1	Factors Affecting Agriculture
	2	Soils Science
	3	Soil Fertility
	4	Farm Machanisation
	5	Crop Protection
	6	Irrigation and Fertigation
	7	Farm Management and Farming Systems
	8	Crop Production
	9	Poultry and Health
	10	Piggery & Health
	11	Cattle & Health
Co-Modules	1	Technical English
	2	Agri-Maths
	3	Personnel & Social Education
	4	Information and Communication Technology
Elective Modules	1	Horticulture & Landscaping
	2	Small Ruminants and Bee Keeping
	3	Agro-Processing
	4	Information and Communication Technology

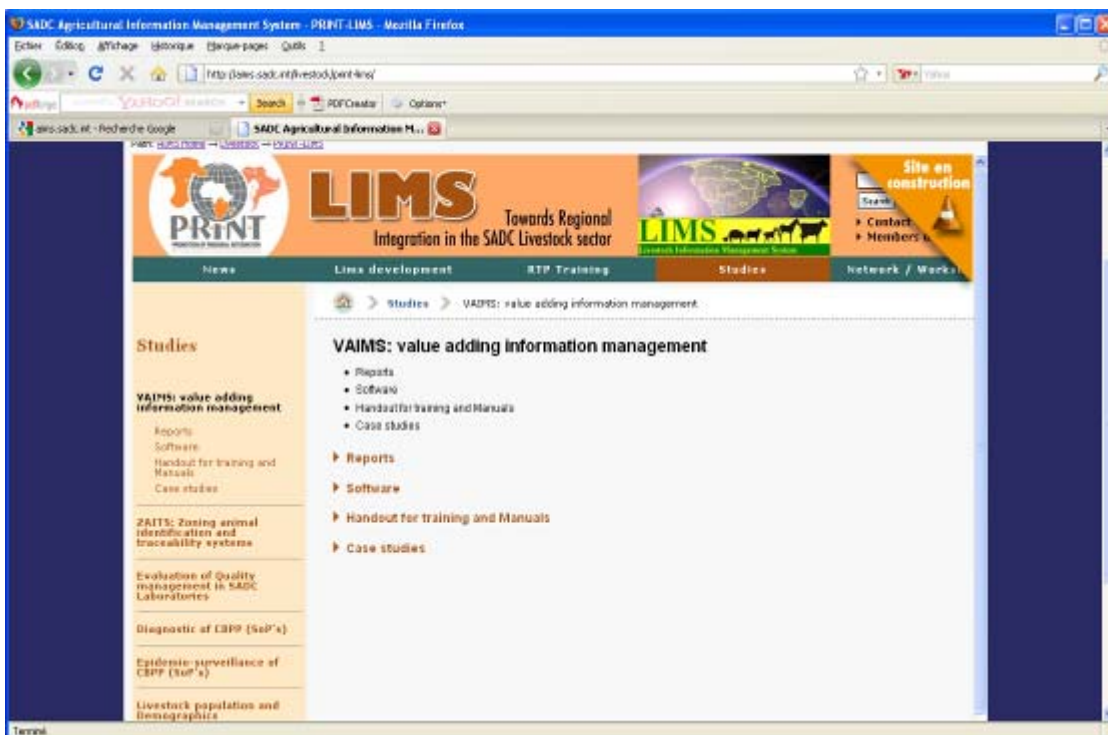

The training courses catalogue at SAHTC

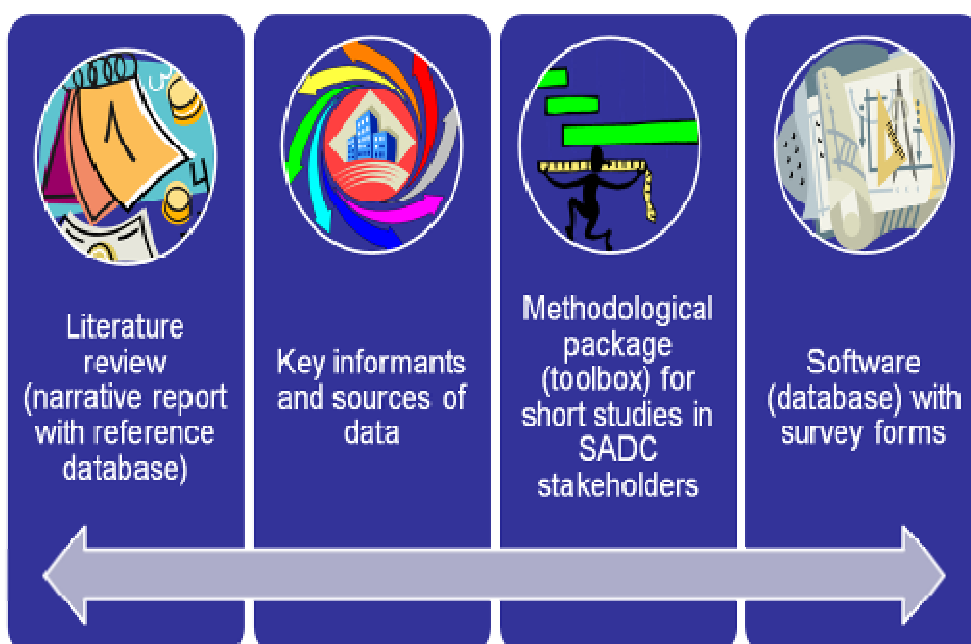

- Use of PRINT Studies and toolkits.

- Piggery Poultry production and value adding: use of the PRINT VAIMS toolkit

The VAIMS toolkit was designed firstly for use on ruminants though it can be used for poultry and piggery too with some adjustments. We recommend its use as a training item e.g. at the SAHCT centre at Anse la Mouche before being fully used by SAA and possibly at the research centre (which so far does not cover the livestock research).

- **Demographic modelling and surveying the LS Foot-print:**

In a context where the foot print of Livestock is seriously considered (piggery and poultry could easily be hampering the environment in an island), the use of demographic tools to monitor LS population should be promoted. Some were developed and made available by PRINT.

The Environmental Management Plan of islands (Mahé and others) is based upon Land Use Plan LUP which sets out categories of land usage e.g. as listed below for Denis island. The LUP is the foundation upon which other aspects of the EMP (such as Biodiversity plan and ecotourism plan) are logically built.

- **Zone A:** Primary Production Area: designated for intensive human activity, infrastructure placement and production landscapes.
- **Zone B:** Secondary Production Area: designated primarily for production landscapes and low-density tourism/residential infrastructure.
- **Zone C:** Conservation Management Area: designated primarily for management to attain conservation/biodiversity objectives.
- **Zone D:** Ecosystem Restoration Area: area designated for restoration to island's natural state. All other activities are subordinated to that end.
- **Coastal Zone:** Land within 25m of high water mark – designated for management to optimise natural vegetation cover, structure and function for specific defined ends depending on locality – no permanent infrastructure.

- Pink: Livestock areas.
- Dark Green: Vegetable and fruit production.
- Light Green: Hotel complex and guest villas.
- Brown: Incinerator and solid waste sorting area.

The full report on Demographic tools is available on line and under request at PRINT

5. CONCLUSIONS & Way forwards

All the points debated in this report will be soon presented during further sub committees meetings and at the next LTC in November 2009.

The road map for the way forward shall be decided by MS regarding the development of LIMS in their respective country, by **establishing a 5 years roll out plan for LIMS**.

The success of the LIMS relies on the **formation and the activity of national LIMS networks** (human-ware) and on the **collaboration between national institutions** holding information on the LS sector. Therefore, we recommend MS use the SoP's provided for guiding such exercise and convene frequent meetings of the LIMS network.

PRINT has continued providing support to MS in 2009 through the CIRAD service contract lasting up to November 2009, whereas the program estimate PE4 of PRINT ended in March 2009. The 5 years rolling plan for LIMS should be ready by then. The support in 2009 will be devoted to more training on LIMS and AIMS and to the support to MS to form their LIMS network.

Countries are expected to start drafting their **national SoP's** and build their **national system** firstly for the **9 quantitative modules** (and particularly for the following Five modules i.e. M1 census, M3 production, M5 trade, M10 outbreaks, M11 vaccination on one hand, which are considered as priority Modules, plus when possible on M2 Households and M6 infrastructures).

Member states should also **collect and send information** to SADC secretariat (to Livestock unit FANR c/o PRINT LS project), i.e. the last numerical datasets available for these priority Modules. To do so they should use preferably the software though they could use firstly the **templates provided in Excel** and formatted as import formats, as the use of LIMS software will be heterogeneous and gradually implemented in MS. They should start by providing data on **M1, M3, M5, M11**, and continue reporting on **M10** which are essential Modules if we want to publish a **production and trade yearbook** plus a **disease control yearbook** by next year 2009. M10 is relatively well advanced because of the historical accumulation of data regarding outbreaks in the region, and a first disease yearbook has already been published.

Thirdly, they should start collecting **retrospective data** to provide elements for a trends analysis (5 years retrospective data), preferably by formatting the data to be compliant with an LIMS import template.

Annexures / Annexes

ANNEX I – Terms of reference for the mission and Speech of the CEO SAA for the launching of LIMS

Annexe Ia TERMS OF REFERENCE FOR PRINT LIVESTOCK PROJECT MISSION ON LIMS Launching in SEYCHELLES

LIMS Adoption Missions: Stakeholder Consultations on AIMS and LIMS & LIMS Training: July 2008 to October 2009

A major expected output of the PRINT Livestock Project is the development of a Livestock Information Management System (LIMS) for the collection of livestock data, processing and reporting of information between Member States and the SADC Secretariat. LIMS is a component of the SADC/FANR/AIMS i.e. Agricultural Information Management System.

The development of LIMS has necessarily, been undertaken in stages as follows:

- Situation Analyses to establish systems of livestock data management in Member States;
- Consultative workshops on the development of reporting templates for data-capture with Sub Committees of the SADC Livestock Technical Committee, namely:- 1) Epidemiology & Informatics, 2) Animal Production, Veld & Marketing, 3) Veterinary Public Health & Food Safety, and 4) Veterinary Laboratories & Diagnostics;
- Approval of the data-capture templates by the Livestock Technical Committee; and
- Sub-contracting of the LIMS database development.

The LIMS application is now in its final stages of development. The stage has been reached where the LIMS application must be rolled out to Member States for installation, training and final testing, whilst providing an opportunity for establishing institutional networks for livestock data collection at the national level.

To this end, so-called LIMS Adoption Missions to Member States are planned from July to December 2008. Attached is a table giving details regarding the month and proposed dates relevant for each Member State.

The LIMS Adoption Missions will comprise the following activities:

- A stakeholders workshop to present the entire SADC/FANR information strategy i.e. the AIMS portal, the LIMS application, the LIMS Web/GIS, associated reporting templates, national standard operating procedures (SOPs), and the institutional network for implementation;
- Training of trainers on the LIMS application for a limited number of key personnel who will conduct further training at national level;
- A final evaluation of sources of information and use of the harmonized data-capture templates;

Therefore member(s) of the PRINT Livestock Project will firstly hold a one-and-half day workshop whose participants should include representatives of livestock departments, public and private institutions who are a source of livestock data and / or information, including all livestock personnel

who have participated in previous workshops or training courses organized by the project as well as selected participants to recent AIMS workshops.

The one-day workshop will be followed by a three-day LIMS training course of a maximum 8 identified personnel involved in livestock data management.

Please note that there will be follow-up communication with each Member State close to the date of the mission. The PRINT Livestock Project will meet all costs associated with the above-mentioned activities i.e. per diems, travel and workshop facilities.

We look forward to your usual support in this important regional activity.

Yours Sincerely,

Dr Pascal Bonnet
CTA
PRINT Livestock Project

Annexe I b

Speech from the CEO of SAA in Seychelles

The speech delivered by the SAA CEO during launching LIMS in the Seychelles.

A Statement at the Launching of the Livestock Information Management System (LIMS) and the Agricultural Information Management System (AIMS) in the Seychelles Delivered on the 23rd July 2009 at the Care House Conference Room

Workshop facilitators, participants, ladies and gentlemen .Welcome to the launching of the livestock information management system (LIMS) and the agricultural information management system (AIMS) in the Seychelles. A special welcome to the two facilitators who travelled from afar just to be with us at this historic occasion and who have been facilitating since the beginning of the week.

Seychelles rejoined the Southern African Development Community (SADC) in August 2008 after an absence of more than two years in order to promote as well as benefit from regional trade. Evidently as a member state it also has the responsibility to fulfill a number of obligations.

One of Seychelles' obligations as SADC member states is to collate in the correct format and forward livestock data to the SADC headquarters. There are different stages of the adoption process and some have already been completed. The launching brings us one step closer to the adoption point and I am glad all of you are here to witness it.

Since Monday, the two facilitators have been involved in the training of the officers in charge of livestock information collection. As I understand it the training has been a success. So I believe then that you are now equipped with the tools to provide accurate livestock production data to the decision makers and to SADC headquarters. I appreciate the enthusiasm displayed by the facilitators and the officers collecting data.

Seychelles has some advantages that will make livestock production data collection somewhat easier in comparison to the other member states. Firstly, the country is physically small with much fewer livestock producers, so getting livestock production information should be easier.

Secondly, most livestock i.e. broilers, cattle and pigs are slaughtered at one abattoir which makes the data easily available. A set back though is that no red meat abattoir is available currently on Praslin Island. We look forward to this issue being resolved in the near future. The broiler abattoir is still in working order on the island.

Every one of us here has a stake in proper livestock production data. I therefore seize this opportunity to make a plea to some of the layer farmers to help us, help themselves and help the country at the same time in providing their livestock production statistics on a consistent basis. I say this because even though there are many layer farms that keep records, there are still few that don't. To get the correct data, all the layer farms without exception have to keep daily records of eggs laid and the number of birds left on the farm. The livestock officers will be going round soon to see how we can help you keep these records required. I thank you in advance because I know you will cooperate with us. After today's launching, there will be a wrap-up session tomorrow, when the final touches and the icing on the cake will be put. I believe every person will participate actively as in the past three days.

I thank you all in your dedicated participated and above I thank the facilitators for a job well done.

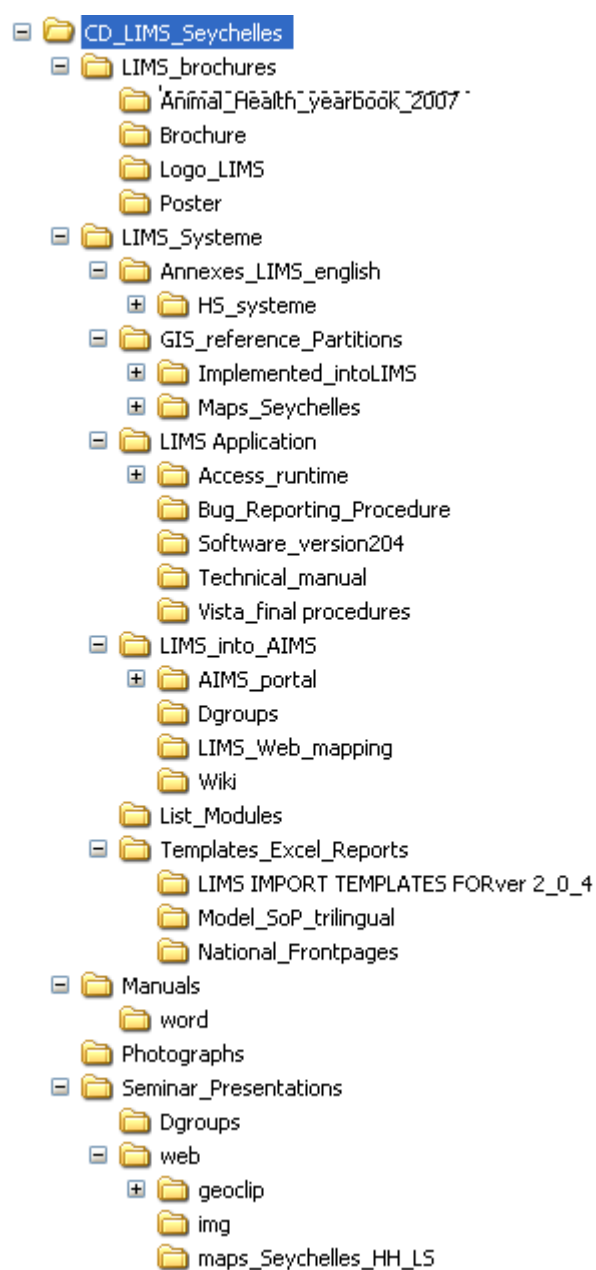

ANNEX II – Training Handout left to Seychelles:

A full package of documents has been distributed at the end of the training with a CD including.

- Software's released at per the date of the training (Beta version still under evolution): LIMS beta version
- CODEC to read movie for the AIMS demo video (in file .avi)
- LIMS Templates in Excel (version to date)
- Etc..

ANNEX IV – Proposed SoP sheet (excerpt to be improved by MS)

			LIMS / Seychelles 
---	---	--	---

LIMS Standard Operating Procedures SoP ‘elaboration Sheet for a module or some excerpts of a Module (template) (to complement the LIMS Comment sheet)

Country: **Seychelles**

Preamble

This sheet is used to respond to the 5W questions: Who will do What regarding LIMS templates (harmonized reports on Livestock LS stats) and LIMS application (software), Why? When? and Where? (Who = Institution and name of a personnel with details etc..)?

Why such a procedure?: The objective is to develop and gradually finalize the **national & specific SoP's** on **LIMS** in the country (SoP: i.e. **standard operating procedures**). The SoP is used for running the LIMS system, using a **national network** of **stakeholders** (with their names and positions) which will have **FUNCTIONS** regarding data contribution and use of the system, such as:

- Be part of the **LIMS national taskforce** which establish the organizational chart and specific procedures for the country
- Take responsibility and **leadership** to **provide data** (**contributors** as **primary** of **secondary** sources) and **submit** dataset to “parent” partners within the country (could be e.g. Meat board transmitting information to Agric Stats or DVS...) following an organizational chart established for the country (a decentralized system)
 - e.g. function like fill some templates (Paper report or Excel based)
 - e.g. enter data into screens of the LIMS application (MS Access based)
 - e.g. transfer (send) such data regularly to a parent partner
- Take a responsibility and **leadership** to **coordinate** the LIMS system and its various functions e.g. the data capture within the country and the submission of regular statistics to SADC (i.e. manage the centralized database in the country and liaise with SADC secretariat)
 - Submit to SADC and **liaise** with the Livestock unit of SADC
 - Download the new **versions** of LIMS application and of training material (manuals) when released and
 - Revise the national SoP's regularly (yearly), make sure that the procedures used by the contributors follow the one agreed upon
 - Organize **refreshing training** when need be
- Act as a Trainer on LIMS system using the generic manuals and update some contents by drafting “**country specific contents**” (to customize manuals for national purpose)
- Interact on the **AIMS LIMS portal**: use the tools provided and contribute to the forums through the portal, participate to the **AIMS national network**

This activity of drafting the very first SoP's will also insure the proper collection of data with **three folds**:

1/ to assure the proper **starting of the data reporting onwards** (to SADC) from the date of the visit to MS or from the date agreed upon during the November 2008 and April 2009 LTC' and other sub committee's meetings,

- By using LIMS application (software), you will also have to follow up updates of new versions on the LIMS software and manuals on the AIMS portal; <http://aims.sadc.int> (livestock section); web-mapping at <http://lims.sadc.int> (new specific LIMS pages will be added after the first round of country visits achieved by PRINT by mid 2009)

- By using TEMPLATES in EXCEL, only if you cannot use the application for some reasons (you must have a good reason!), or in a decentralized system when you wish firstly to use the excel templates in hard and soft copies in the field (at province and district levels), before capturing aggregates in the LIMS software

firstly look at the LIMS templates and prepare the compilation of datasets, and gradually move to full use of the application

This activity needs to clearly:

- **Identify and list the various & potential source(s) of information / data** in the country, with the type of data that they could provide / manage. One should know when and where data are available and published, .i.e. use some sources like the web sites of institutions where data are managed by experts and published after finalization of specific surveys, like the CSO and agricultural surveys, or the Meat board which provides regular compilation of data on trade & commodity prices etc...
 - **Prioritize and Select the most relevant sources** that will contribute to the system (relevant means also that the methodology to acquire the data is well described and known and accessible, cf. Metadata part of the LIMS) and start dispatching the roles and functions in the organizational chart established by the LIMS national task force (a network)
 - firstly list the sources so that one or two will be selected to report / contribute to the system

2/ to start the in depth collection of at least **one year of detailed data** in hard or electronic copies. This dataset is needed in order to properly prepare the **SADC Regional Livestock yearbook like the Animal Production and Trade Yearbook** for 2007-2008 (or with the year of reference according to stats available in the MS) to be published in 2009 and onwards. This dataset will be used to support various on going initiatives at SADC level, like the drafting of a regional livestock policy part for the RAP Policy an initiative lead by FANR

-(Electronic files are preferred)

3/ thirdly to **continue this process by collecting** and sending elements for a "**5 years data retrospective time series**" in hard or electronic copies as well (in order to properly prepare trends analysis which will complement the simple snapshot of one year data from 2/)

-(Particularly ask NSO to provide all relevant documents (possibly purchased for PRINT))

SoP LIMS for Country = Seychelles

For a Component or a Module = Templates / Screens part of a Module

SoP's per Module (11 Modules with their Template) / part of component (4 components see LIMS structure)
Use **one individual SoP sheet per template / screen** so that we can update one individually if the source or the procedure is changing

Recap on Modules and templates

- Headers
- Module 1 Numbers & Composition of Herds
 - 1. Nr by species

- Module 10 Disease Outbreak notification
 - Outbreaks
- Module 11 Vaccinations (e.g. TAD's)
 - 1.Vaccination

Part 1: Header of the SoP

Date of elaboration of the SoP:

Persons who elaborated the SoP:

(Generally elaborated after a meeting of the LIMS taskforce in MS, give details and email of contact persons for the modification requested):

This SoP is for which Template / Screen : Give Number: (code : **Component - Module - and Template Number / Screen number** taken from Excel templates or MS Access Screens read from left to right if possible, or copy paste the image of the screen or template)

Part 2: Image of the templates / screens dealt with (when needed)

Template

e.g. Module 3, Template 4 / Screen 4 (with header accounted for in numbering Excel working sheets)

4. Processed Dairy Products (from all species)												
Partition 1, e.g. Region/Province	Partition 2, e.g. District	Pasteurized milk Lt**	UHT milk Lt	Fermented milk Lt	Yoghurt Lt	Cheese Kg**	Butter Kg	Cream Lt	Powder milk Kg	Other* products	Other* products	Other* products
Reg/prov 1.....	Dist 1.....											
	Dist 2.....											
	Dist 3.....											
Reg/prov 2.....	Dist 1.....											
	Dist 2.....											
	Dist 3.....											
etc												
* Specify which product												
** Lt= Litres, Kg= Kilograms												
LIMS: Milk equivalent not working												
LIMS: unit of measure kiloliters??												
LIMS gives option for cattle and goat = wrong												
LIMS: take out option "milk"												
Not in LIMS: fermented milk, cream, other products												
LIMS: Yoghurt/fermented products together												

Corresponding Screen

e.g. Module 3, Template 4 / Screen 4 (with header accounted for in numbering Tab of screens)

Part 3: Comments on who could / will be responsible for the templates / screens of the module studied, and with which functions?

Firstly List all potential sources of information for the Module / Template / Screen

Make assumption on where the system will be centralized at national level. Here it is assumed that DVS will take this leading role.

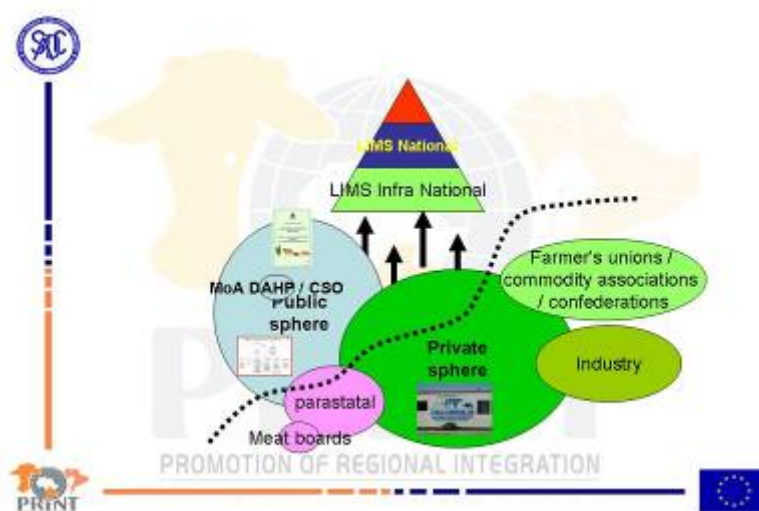

List them: e.g. hierarchical role of DVS from HQ to region, districts, and elaborate on Partnership / Functional role of other institutions (Meat Dairy Boards, CSO's, Agric Stats...)

e.g. Hierarchical role: how the information will flow from fields to HQ DVS

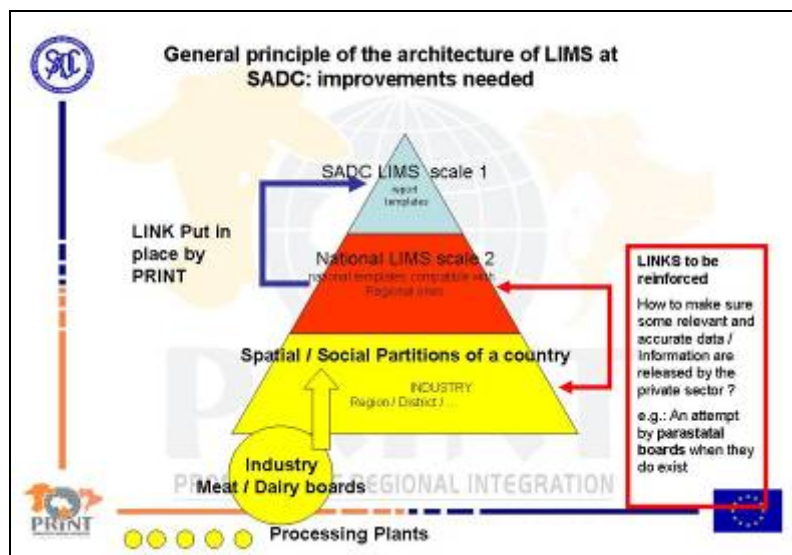

LIMS Module 3 / Template - Screen Dairy ###

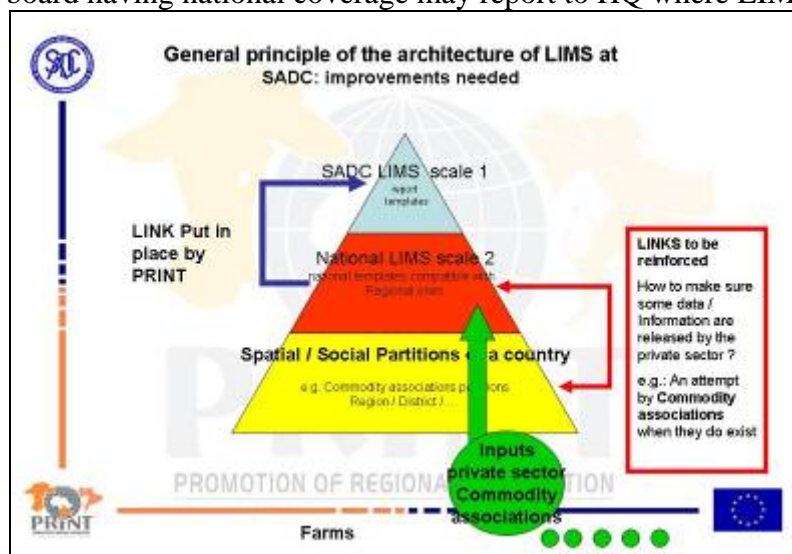

e.g. Functional role: Which institutions outside DVS could take a role , or have a function regarding this template? Do they cover the entire territory or not (partial coverage of a commodity association for instance)? Therefore, should they report to intermediate levels like to regions / province / district offices or to HQ? etc..

Link such institutions to the hierarchical system at the appropriate level to start drafting the organisational chart for running the LIMS system (here for a selection of templates or modules)

e.g. a dairy board having national coverage may report to HQ where LIMS is installed

e.g. a commodity association having provincial coverage may report to HQ or to the province where LIMS is installed

Selection of sources: after having listed them now rank the “players”, make the selection for the best bet (and also keep some alternatives, therefore the ranks 2 and 3)

a/ Major Role for the template / module to be distributed to:

- 1/
- 2/
- 3/

b/ **Describe role** and responsibility of selected sources / methods they use / frequency of their reports

- 1/
- 2/
- 3/

Part 4: Elaborate a Diagram with Boxes (institutions) and Flows (relationship between institutions) for SoP / i.e. an Organisational chart for the template / module

i.e. take an image of what you have drafted on a flip chart with the flow of data between partners, type of transfer, i.e. who does what? Each flow can be given attributes like in this small table attached to the flow

Source involved directly into LIMS which will contribute to the system	Parent partner? (primary source) if any one	Child partner to receive data
What is transferred		
How is it transferred		
Who is transferring		
When is it done		
Where: From Where to Where ?		
Etc..		

Functions to be achieved: Stage 1: collection and capture of data**What?**

- Collection with paper report?
- Collation into Excel templates (and compile report by printing in hard copy when needed)
- Direct Data capture into LIMS screens?
- **Who is responsible for filling** the paper report / template / **capturing** data into LIMS excel sheets or application' screens (can be private / public sector)
- Name of stakeholder(s) and **Institution(s) of reference at national level**
 - (email of contact person)
- **Name of Institution(s) of reference at regional/provincial level**
- Name of Institution(s) of reference at **district level**

Functions to be achieved: Stage 2: Supervision and submission

Data transfer is **controlled** by a supervisor / Data **submission** to upper scales / levels (the data collected will flow to "child partners": HQ? province etc..? and eventually to SADC

Who is responsible for coordinating & controlling data quality for this module? = Who is responsible for **coordinating the completion** on time, and **submission to SADC** for this set / component / module?

- Name of stakeholder(s) and **Institution(s) of reference at national level**
 - (email of contact person)
- **Name of Institution(s) of reference at regional/provincial level**
- Name of Institution(s) of reference at **district level**

How to formulate responsibility in the SoP

e.g. LIST of players

ORGANIZE FLOW of DATA between players

Diagram of REPORT USING TEMPLATES or ELECTRONIC FILE + DIRECT input into LIMS Screen

Part 5: Rank the difficulty of this module / screen / template in terms of contents and organisation of data flow

- Easy to fill with little effort: ☐ Y/N ☐
- Relatively Easy to fill with significant effort: ☐ Y/N ☐
- To gradually o fill with strong effort: ☐ Y/N ☐

Part 6: Can this Module/ Template be integrated in another IS and methodologies of surveys that co exists at national level (by CSO etc.):

e.g. DEVinfo, VACinfo, M and E systems of Programs, CSO surveys etc..

if yes then this module could be adopted as one component of a larger survey initiative

Part 7: In conclusion Decision Table (to be consolidated for all modules)

5 W : What to do / when? where? who is in charge, why?

After having elaborated the diagram, try to fill in a summary table a bit like this one:

What	Who	When	Where	Why	How
Module Number Screen / template number					
e.g. supervising M10 / S2 / T2	Name of the Institution and name of a person and his functions:	Frequency will be monthly	At National level HQ		LIMS application Or TEMPLATES in EXCEL

Note:

When various sources coexist in an information chain, put them by order and indicate the one used to input data into LIMS

- Primary source: Institution & Person in charge for the template in Module
- Secondary source: Institution & Person in charge for the template in Module

e.g. Institution that will enter data into LIMS

e.g. Institution who will submit data from LIMS to SADC: Frequency of submission

Part 8: How to gradually implement the LIMS in the entire territory with its hierarchy /Comments on Hierarchical partition

Hierarchical partition

Provinces / Regions:

Districts

Try to indicate in which Partitions you should start implementing the LIMS system with:

a/ LIMS application installed on computers or/and

b/ Paper Report + Excel sheet (template)

ADMIN type, Level 1 and 2, Region / Province and District names

Proposed Edited Version of Partitions agreed on during the mission to be implemented into LIMS
In red result of proof reading of original data provided (i.e. editing)

25 administrative districts (source LIMS adoption mission):

Districts:

[Anse aux Pins](#) [Anse Boileau](#) [Anse Étoile](#) ~~[Anse Louis](#)~~ [Anse Royale](#) [Baie Lazare](#) [Baie Sainte-Anne](#) (Ste Anne) [Beau Vallon](#) [Bel Air](#) [Bel Ombre](#) (Belombre) [Cascade](#) [Glacis](#) [Grand' Anse](#) (Mahé) [Grand Anse Mahe](#) [Grand' Anse](#) (Praslin) [Grand Anse Praslin](#) [La Digue](#) [English River](#) ~~[La Rivière Anglaise](#)~~ [Mont Buxton](#) [Mont Fleuri](#) [Plaisance](#) [Pointe La Rue](#) (Larue) [Port Glaud](#) [Saint-Louis](#) (St Louis) [Takamaka](#) [Roche Caïman](#) [Au Cap](#) [Les Mamelles](#) [Other Islands](#)

One removed: (Anse Louis) not a district

4 added: Roche Caiman, Au Cap, Les Mamelles, Other Islands

Some editing in the spelling (the official way to write it only one way please !) e.g. [Bel Ombre](#) or (Belombre)

Regions: 5, Central, East, West, North, Praslin/La Digue

A correspondance list has been established by NSB for parent / child partitions (with options for writing them)

Part 9: Validation of ADMIN and TECHNICAL partitions

ADMIN Partition list as implemented into LIMS before the training

Public Web source: 23 administrative districts (source Wikipedia):

District [Anse aux Pins](#) [Anse Boileau](#) [Anse Étoile](#) [Anse Louis](#) [Anse Royale](#) [Baie Lazare](#) [Baie Sainte-Anne](#) [Beau Vallon](#) [Bel Air](#) [Bel Ombre](#) [Cascade](#) [Glacis](#) [Grand' Anse \(Mahé\)](#) [Grand' Anse \(Praslin\)](#) [La Digue](#) [La Rivière Anglaise](#) [Mont Buxton](#) [Mont Fleuri](#) [Plaisance](#) [Pointe La Rue](#) [Port Glaud](#) [Saint-Louis](#) [Takamaka](#)

ADMIN type, Level 1 and 2, Region / Province and District names

Proposed Edited Version of Partitions agreed on during the mission **to be implemented into LIMS**, In **red** result of proof reading of original data provided (i.e. editing)

25 administrative districts (source LIMS adoption mission)

Districts : [Anse aux Pins](#) [Anse Boileau](#) [Anse Étoile](#) ~~[Anse Louis](#)~~ [Anse Royale](#) [Baie Lazare](#) [Baie Sainte-Anne](#) (~~Ste Anne~~) [Beau Vallon](#) [Bel Air](#) [Bel Ombre](#) (~~Belombre~~) [Cascade](#) [Glacis](#) [Grand' Anse](#) (~~Mahé~~) [Grand Anse Mahe](#) [Grand' Anse](#) (~~Praslin~~) [Grand Anse Praslin](#) [La Digue](#) [English River](#) ~~[La Rivière Anglaise](#)~~ [Mont Buxton](#) [Mont Fleuri](#) [Plaisance](#) [Pointe La Rue](#) (~~Larue~~) [Port Glaud](#) [Saint-Louis](#) (~~St Louis~~) [Takamaka](#) [Roche Caiman](#) [Au Cap](#) [Les Mamelles](#) [Other Islands](#)

One removed: (~~Anse Louis~~) not a district, **4 added:** [Roche Caiman](#), [Au Cap](#), [Les Mamelles](#), [Other Islands](#) ; **Some editing in the spelling** (the official way to write it to comply with NSB) e.g. [Bel Ombre](#) or (~~Belombre~~)

Addition of Regions: 5; Central, East, West, North, Praslin/La Digue

A correspondance list has been established by NSB for parent / child partitions (with options for writing them)

Country	Region (admin level 1)	District (admin level 2)	codes
Seychelles	Central	English River	ER
	Central	Mont Buxton	MB
	Central	St Louis	SL
	Central	Bel Air	BA
	Central	Mont Fleuri	MF
	Central	Plaisance	PA
	Central	Roche Caiman	RC
	Central	Les Mamelles	LM
Seychelles	East	Cascade	CA
	East	Pointe Larue	PL
	East	Anse Aux Pins	AA
	East	Au Cap	AC
	East	Anse Royale	AR
	East	Takamaka	TA
Seychelles	West	Anse Boileau	AB
	West	Baie Lazare	BL
	West	Gran Anse Mahe	GM
	West	Port Glaud	PG
Seychelles	North	Belombre	BO
	North	Beau Vallon	BV
	North	Glacis	GL
	North	Anse Etoile	AE
Seychelles	Praslin La Digue	Grand Anse Praslin	
	Praslin La Digue	Baie Ste Anne	GM
	Praslin La Digue	La Digue	BS
Seychelles	Other Islands	Other Islands	LD

TECHNICAL Type:

Proposed Technical partitions to be implemented into LIMS: Status of our discussions

Areas used by Extension services etc..

In red result data provided (i.e. editing)

Enumeration areas: mad of 50 dwelling , therefore dynamic changes from census to census

Health zones: no

Agro Eco zones: no

Vet districts: no

Extra comments

Part 10: Comments on the **Functionalities of AIMS portal** (cf. portal) and LIMS portal (web mapping so far) on the web that you would like:

<http://aims.sadc.int/> / <http://lims.sadc.int>

Reminder: objectives of functionalities:

- To present spatial and non-spatial information
- To develop directories of institutions (and experts) – information exchange standards
- To carry out customised search for projects, technologies, people, institutions, publications
- To establish electronic networks- thematic & national, with associated tools (discussion forums, collaborative, dissemination)
- To devolve content generation to level of information producer
- To aggregate national news/events at regional level
- To host Learning tools and materials
- ...

Facilities to use / Facilities to contribute to:

- Web pages: create new contents and Web pages (e.g. national LS pages)
- Web mapping
- Post News and use News list (events list) and their aggregation (i.e. of most recent news, through « syndication » of news and RSS feeds)
- Use Search engine (custom search with specific engine)
- Use and contribute to a Non spatial library: documents of interest
- Wiki : contribute to an encyclopaedia of LS sector in SADC, to the LIMS manual enriching the manual about the country livestock profile
- Use D-groups (discussion), e.g. one group for LIMS Seychelles, possibly link to SMS
- Build contents for a Distance learning and Training on line – (Moodle platform), e.g. training on LIMS adapted for the National context
- Use links to important Information sites thanks to E-Frame (web frame of other sites into AIMS)
- Use RSS feeds
-

e.g. I would like a web page to get the updated versions of LIMS and of the manual
 I would like a FAQ questions page
 I would like a D-Group for discussing agric. stats in a forum

Most feature to be used:

Most feature to contributed to:

ANNEX VI – List of Modules into LIMS

Module per component (see LIMS structure : individual sheet per module so that we can update one individually)

Modules et écrans correspondants au système LIMS / *Modulos e ecrã do LIMS* / Modules and screens (templates) of LIMS

- Headers / Timbre / Entête
- Module 1 *Numbers & Composition of Herds* / Effectivos animais do rebanho nacional / Effectifs nationaux – recensement animal
 - 1. *Nr by species* / efectivos animais por espécies / Nombre par espèce
 - 2. *Nr by economics* / efectivos animais por função económica / Nombre par fonction économique
 - 3. *Nr by breeds* / Effectivos animais por raça / Nombre par race
 - 4. *Nr by herd structure* / Effectivos animais por idade e sexo / Nombre par âge et sexe (démographie)
- Module 2 *Human Households & Population in Livestock farming* / Agregados familiares criadores / Ménage engagés dans l'agriculture et l'élevage
 - 1. *Human Population* / Agregados familiares / Ménages et population humaine
- Module 3 *Production Parameters* / Produção animal / Production animale
 - 1. *Slaughter* / Abate (carne) / Abattages
 - 2. *Milk* / Leite / Lait
 - 3. *Dairy products* / Lacticínios / Produits laitiers
 - 4. *Eggs* / Ovos / Oeufs
 - 5. *Hides, skins* / Curos e Peles / Cuirs et peaux
- Module 4 *Livestock & Products Price* / Preços dos productos animais / Prix des produits d'élevage et animaux vivants
 - 1. *Live animals* / Animal vivo / Animaux vivants
 - 2. *Meat products* / Producto de carne / Produits carnés
 - 3. *Milk products* / Leite e Lacticínios / Produits laitiers
 - 4. *Eggs* / Ovos / Oeufs
 - 5. *Hides & skins* / Curos e Peles / Cuirs et peaux
 - 6. *Fiber & feathers* / Fibras e plumas / Fibres animales et plumes
- Module 5 *Livestock & Products trade: import/export* / Importação e Exportação / Import et Export
 - 1. *Live Animals* / Animal vivo / Animaux vivants
 - 2. *L. stock Products* / Producto animais / Produits d'élevage
 - 3. *L. stock Inputs* / Inputs / Intrants de l'élevage
- Module 6 *LS Infrastructures* / Infra-Estructuras / Infrastructures
 - *Generic Partitions* / Divisões do país / Divisions du pays
 - 1. *Administrative* / Administrativa / Administratives
 - 2. *Technical* / Técnico / Techniques
 - *Infrastructures Agreg.* / Infra-Estructuras Agregados / Infrastructures description agrégées
 - 3. *Dipping* / Tanque banheiros / Bain détiqueur
 - 4. *Pens* / currais / Enclos de vaccination
 - 5. *Vet clinics* / Clinicas vet. / Cliniques vétérinaires
 - 6. *Govt Offices* / Offícios do governo / Bureaux de l'état
 - 7. *Mun Abattoirs & slabs* / Matadouros municipais e locais e casas de matança / Abattoirs locaux et tueries
 - 8. *Milk Collection* / Recolha de leite / Récolte de lait liquide
 - 9. *Livestock Markets* / Mercados / Marchés
 - 10. *Storage Products* / Armazens / Entrepôts et Stocks

Infrastructures Detailed / Infra-Estructuras detalhados / Infrastructures détaillées

- 1. *Vet Diagnostic Labs* / Laboratorios / Laboratoires de diagnostic
 - 2. *Vet Vaccine Labs* / Productores de Vacinas / Producteurs de vaccins
 - 3. *Industrial Abattoirs* / Matadouros industriais / Abattoirs industriels
 - 4. *Dairy Processing Plants* / Usina de transformação de leite / Unité de transformation laitière
 - 5. *Secondary Markets* / Mercados secundarios / Marchés secondaires
 - 6. *Port of Entry & Exit* / Portos de entrada e saída / Postes d'inspection en frontière PIF
- Module 7 *Meat Inspection / Food safety* / Segurança Sanitaria dos alimentos / Sécurité sanitaire des aliments
 - 1. Ante-mortem / Inspeção ante mortem / Inspection ante mortem en abattoir
 - 2. Post-mortem / Inspeção post mortem / Inspection post mortem en abattoir
 - Module 8 *Livestock Associations and Service Providers* / Associações de criadores e fornecedores de servicios / Association d'éleveurs et fournisseurs de services
 - 1. *Umbrella org & assoc* / Associações / Associations et Confédérations
 - 2. *Private companies* / Privado / Secteur privé
 - 3. *Government* / Publico / Secteur public
 - Module 9 *LS related Laws, Regulation and Acts, policy docs* / Legislação e políticas agro pecuaria / Législation et documents et politique sur le secteur élevage
 - 1. *National Docs* / Nivel nacional / niveau national
 - 2. *International Docs* / Niveis internacional e regional (SADC) / Niveau international ou sous régional (SADC)
 - Module 10 *Disease Outbreak notification* / Notificação dos surtos de doenças / Information sanitaire notification d'épidémies animales
 - *Outbreaks* / Epidemias focos / Foyers d'Epizooties animales
 - Module 11 *Vaccinations* (e.g. TAD's) / Vacinação / Vaccinations
 - 1. *Vaccination* / vacinações efectuadas / Vaccinations effectuées (prophylactique et de contrôle)

LIMS training Procedures with VISTA

There are two security features into VISTA: UAC User Account Control & W.R.P / Windows Ressource Protection, put in place to protect systeme partition & register base

We will change the UAC: User Account Control: this introduce a first grading system for allowing some rights to administrators, users, guests etc..

Any report should be reported to PRINT: BBedane@sadc.int

CC to Livestock Unit BHulman@sadc.int

CC to the developer: INFORMATIX INDUSTRY SERVICES Pty Ltd / Thulagano Segokgo
tsegokgo@gmail.com

CC to the external tester: Xavier Juanes Xavier.Juanes@cirad.fr

- **Stage 1:**

Start with Turning User account control UAC off

Control panel / user account

Turn User account control on or off / off UAC

Then restart your computer to apply the rules

Enter as a user

Example users in Zambia

Users (Terminal2NZILA\users)

When you will exit your LIMS “session” we suggest you turn it on again for security reasons

- **Stage 2**

Install LIMS

Go to the folder

- **Stage 3**

Secondly allow all privileges to users for the LIMS folder properties

Way one to “allow” all privileges to users

Step 1

Go the LIMS folder under Program Files (where generally LIMS is installed)

Right click on the “LIMS” folder and select properties

Step 2

You may have in fact no creator owner but users only, do it on users

Step 3

Click Edit button and Click on continue if prompted

You may have to enter the windows by clicking advanced etc..

Step 4

Click Full control for “CREATOR OWNER” or USERS (better as VISTA generally does not allow changes on creator owner) or select the “Modify”, “Read & Execute”, ... permission. The permission settings should rather be modified for “Users”.

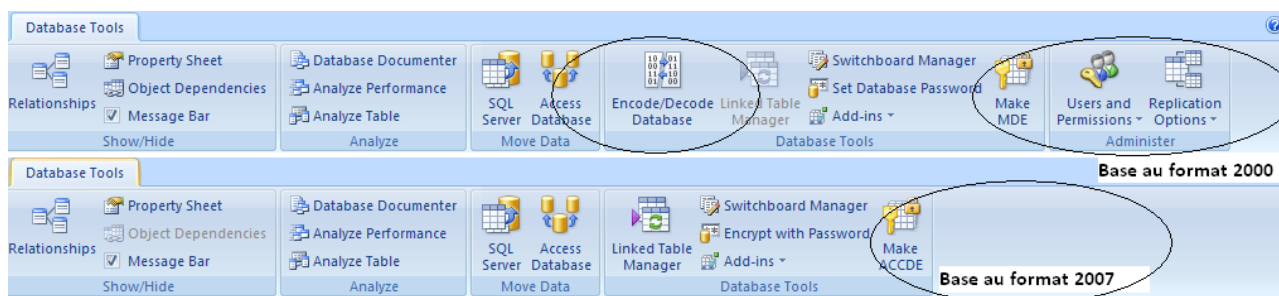

Step 5 – Click Ok

OS (Vista or XP) and versions of Access 2003 2007

Under Access 2007 (what ever the OS Vista or XP)

The header under Access 2007 will change according to the type of database application we are dealing with

LIMS is based on Access 2003 and should appear as the top header in your computer

You may face problems but every time you record and report bugs please do indicate under which platform OS and version of Access you got these bugs

The four possible configurations you will have to mention

	Access 2003	Access 2007
OS XP	1	2
OS Vista	3	4

EPIDEMIOLOGY AND INFORMATICS SUBCOMMITTEE MEETING

MAURITIUS 15 – 17 APRIL 2008

LIMS Web GIS – Introduction

The SADC Livestock Information Management System (LIMS) is a tool for collection, collation and analysis of livestock related data and sharing of information for decision making and planning. The System relies on the network of livestock professionals in the SADC Member States for data provision and operates a database for the storage and analysis of data and a portal and hardcopy publication for the dissemination of information. The PRINT Livestock Project is in charge of the establishment and running of LIMS on behalf of the Livestock Sector Unit under the Food Agriculture and Natural Resources (FANR) Directorate of the SADC Secretariat. The types of information LIMS covers include Animal Production, Animal Health and Livestock Marketing and Trade.

The LIMS Web GIS is a portal for interactive query and display of livestock information for the SADC region. The system is composed of a simple and user friendly query building and a basic mapping facility for searching animal diseases based on different criteria as well as the number of livestock by species at different administrative level in each Member State. The next target of LIMS Web GIS is expanding the interactive queries to other topics of livestock information.

This introduction highlights some of the basic functionalities that are available within the system so as to help users understand the functionality and effectively use the system for searching livestock-related information. The following section summarizes the functionality and the operation of the application.

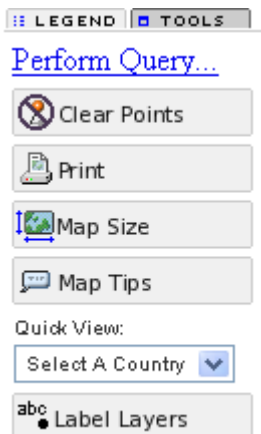

Using LIMS Web GIS

The Web GIS application interface has four main areas summarized below.

A) The Map & Navigation Tools

B) The Tools Tab

The tools tab shown on the left has a critical functionality for the user. The *Perform Query* function is the most important and is summarized in the following sections. The *Print* option is for printing maps and query results. There is a wizard which guides the user in customizing the map to be printed out. The *Map Size* option allows the user to change the size of the map display area. The *Map Tips* option allows the user to display a selected feature attribute on the map. The *Label Layer* option allows the user to label a selected layer with an attribute on the map. Users can zoom to any particular country by using the *Quick View* option.

C) The Legend Tab

The *Legend* tab displays all the map data layers. The user can select or switch off any map layer. The *Update* button regenerates the map and displays a new map after switching on or off map layers.

D) The Query Page

The **Perform Query** option on the Tools Tab opens the query page shown on the next page. Users can query all the map layers. The most important queries are on livestock diseases (Diseases) and Livestock numbers (Census) or the location of a specific administrative layer (e.g. district – Admin 3). Querying diseases and livestock numbers can be done using four criteria, namely Disease, Species, any administrative layer (spatial) and Month and Year (temporal). This implies that the user can combine various criteria e.g. disease type, species, district, and year at the same time. The user has up to 35 different queries he can perform for different criteria combinations.

Search for ...

Select Layer

1. **DISEASE** : is equal to

2. **SPECIES** : is equal to

3. **ADMIN1** : is equal to

4. **DISEASE** : is equal to

Find

E) Query results

The query results are automatically displayed (as shown below) both in a table and on the map. The user can zoom to the query results using the map navigation tools.

Physical Information System (GIS) component of the SADC Livestock Information Management System developed by the SADC Secretariat. It can query and visualise disease distribution and livestock numbers at different spatial scales in the SADC Region.

http://192.168.1.10:8080 - Search Results - Moz

File Edit View History Bookmarks Tools Help

Search results (463 found) for 'Diseases' that meet the following criteria: {DISEASE is equal to 'fmd'}

ID	DISEASE	SPECIES	ADMIN3
2517	FMD	Bov	MHALA DISTRICT
2898	FMD	Bov	MATSILOJE
2899	FMD	Bov	RAKOP
3472	FMD - SAT2	Bov	Kasane

Done

Users can further query each distribution point (location of disease outbreak) to get additional information. This can be achieved using the button (information) and clicking on individual points (the yellow points in the example above). The table like the one shown below will be displayed. Depending on the number of points selected or the distance between each of them, one or many rows of information will be displayed. The zoom-in function can be used to select the specific point of interest.

ANNEX IX – Some preamble before embarking on LIMS training

It is recommended to check for some language and numerical references (decimal issues) before starting with LIMS

Check visually the version of a keyboard you are using (external or integrated)

- QWERTY
- AZERTY
- QWERTY Portuguese etc..

1/ Do you have configured the equivalent on your laptop? If not do it

Example: This is for an AZERTY keyboard (French language in SADC)

2/ Regional parameters for numerical data

LIMS works with English UK parameter where decimal is a dot

Check on control panel and set the regional parameters accordingly

We will then have to use a dot for a decimal (in general, a space is also provided for separation of thousands)
